The Limits of Choice Sahra Wagenknecht, 2013-10-02 In *The Limits of Choice* Sahra Wagenknecht examines household saving decisions and basic needs in Germany and the United States based on official data from both countries from the 1950s to present day Arguing against the hypothesis that assumes consumers optimize their consumption intertemporally based exclusively on their permanent or lifetime income Wagenknecht proposes a rule of thumb according to which consumers will save if their current income exceeds basic expenditure while they will demand credit when income can no longer meet basic needs

**The Economics of Saving** James H. Gapinski, 2013-03-09 This book began when a letter reached my desk in November 1989 Written by Warren Samuels professor of economics at Michigan State University and editor for Kluwer Academic Publishers the letter reviewed the philosophy behind Kluwer's series on recent economic thought and accordingly expressed interest in the controversies that surround contemporary topics in the discipline It graciously went on to invite me to organize consonant with that philosophy a volume of chapters on saving Soon thereafter I learned that the chapters were to be original compositions I also learned that I would have substantial flexibility in structuring the volume and in recruiting contributors who logically would be authorities in the field Succinctly Samuels was inviting me to work with leading scholars in exploring the current controversies in saving one of my favorite subjects That invitation was simply too tempting to refuse Preparation of the book's outline went smoothly It was obvious that the statistics of saving should be covered along with the theories of saving It was equally obvious that special issues must be addressed Ricardian Equivalence supply side doctrine and economic development among others These themes should be handled so as to bring out the ideological tensions in the profession and that criterion helped to shape the list of potential contributors That is both sides of a conflict should be represented and both should be given the same treatment
