Econometric Modelling Of World Shipping:

Econometric Modelling of World Shipping M. Beenstock, A. Vergottis, 1993-09-30 Econometric Modelling of World Shipping describes an economic model that may be used to forecast world shipping markets A unique feature of the model is that it relates to both sectors of world shipping the dry cargo sector and the tanker sector This is the first time that a model of this type has been published This book also breaks new ground in explaining the behaviour of vessel prices both new and secondhand

Current Issues in Shipping, Ports and Logistics Theo Notteboom, 2011 Bringing together an international network of leading scholars this multidisciplinary book unravels some of the most pressing challenges to shipping ports and logistics Divided into five parts shipping the analysis of flows and networks terminal operations and performance logistics and port development and governance this record is an essential read for practitioners in the maritime and logistics world postgraduate students policy makers and professional organizations As market players expand and improve their services in line with increased requirements on rates reliability environmental footprint and safety and security this compendium encourages further systematic thinking

Shipping Economics Kevin Cullinane, 2005-06-15 Shipping is by far the most significant mode of transportation for the carriage of freight In terms of volume alone no other mode comes close Its dominance is even more overwhelming when distances are accounted for This book is concerned with the economics of this pivotal mode of transportation It reveals that the influences on the development and current state of shipping economics research are extremely eclectic The various chapters in the book represent areas that are of central concern to ongoing research in the field As such the book is useful to students researchers industrialists policy makers and consultants The authors of the contributed chapters are some of the leading names in the world of shipping economics addressing a number of diverse areas The econometric modeling of shipping markets Shipping finance a critical issue in such a capital intensive industry Fiscal policy and its impact on an international industry with great asset mobility and Safety and security aspects that have risen to prominence with increasing concerns over the environment and international terrorism Ultimately while shipping as a business depends upon trade it is absolutely certain that the business of trade depends upon shipping The final two chapters therefore incorporate aspects of network economics welfare economics and international trade theory to analyze where and how shipping sits within the wider perspective of industrial supply chains Professor Kevin Cullinane BA BSc MSc PhD FCILT CNIP Professor Kevin Cullinane is Chair in Marine Transport and Management at the University of Newcastle in the U K He was previously Professor and Head of the Department of Shipping and Transport Logistics at the Hong Kong Polytechnic University Head of the Centre for International Shipping and Transport at Plymouth University Senior Partner in his own transport consultancy company and Research Fellow at the University of Oxford Transport Studies Unit He is a Fellow of the Chartered Institute of Logistics and Transport and has been a transport adviser to the governments of Hong Kong Egypt Chile and the U K He holds visiting Professorships at a number of institutions and an Honorary

Professorship at the University of Hong Kong International Handbook of Maritime Economics Kevin Cullinane, 2011-01-01
This timely and comprehensive new Handbook brings together an unrivalled group of distinguished scholars and practitioners to provide in depth analysis and a contemporary perspective on a wide ranging array of topics in maritime economics Inherently global in nature the economics of the maritime sector has proved pivotal in facilitating globalization and international trade This Handbook offers a unique and indispensable source of reference and information for researchers students and practitioners interested in the relationship between these developments and maritime markets **Shipping Business Unwrapped** Okan Duru, 2018-09-05 The shipping business is a lesser known industry but it is an extremely influential element in the global economy This book provides a snapshot of the shipping business with micro foundations from the perspectives of institutional and behavioural economics while uncovering hidden facts about the industry Rather than spending a great deal of time reading many books or consulting costly advisors about fundamental issues readers can quickly and easily find core concepts examined from multiple perspectives They will certainly enjoy the engaging narrative driven content and learn many surprising truths about this fascinating business Maritime Economics 3e Martin Stopford, 2008-12-19 Combining a sophisticated historical and theoretical analysis of the shipping industry with a practical explanation of all aspects of the shipping industry this third edition is essential reading for students and professionals with an interest in this area **Tankers in Trouble** Stig Tenold, 2017-10-18 This book analyses the causes and effects of the shipping market crisis in the 1970s and 1980s the most severe of the twentieth century It approaches the subject from three viewpoints The first is the tanker sector where the crisis began spread and caused the most damage The second is from a national perspective focusing on the impact on Norwegian shipping and shipowners The third narrowed further in scope analyses the crisis from the business perspective of four individual tanker owners taking into account their business strategies and eventual fates The aim of the journal is to add to the knowledge of recent maritime history by examining the transformation of the industry during a period of rapid change One distinct conclusion is that shipowners to their detriment assumed that the demand for tankers would continue to increase as it had consistently done so throughout the century thus far The overall conclusion is that shipping is a cyclical industry and that the oversupply of ships produced during the 1970s took its toll toward the end of the century By 2004 and 2005 however the industry began to bounce back offering hope for the future The book consists of an introductory chapter seven chapters of analysis a concluding chapter select bibliography and three appendices tabling Norwegian tanker statistics **Maritime Economics** E. Karakitsos, L. Varnavides, 2014-06-24 This book analyses shipping markets and their interdependence This ground breaking text develops a new macroeconomic approach to maritime economics and provides the reader with a more comprehensive understanding of the way modern shipping markets function Economic Progress and Growth H.M. Scobie, 2013-03-07 This volume puts forward a group of models applied to different economies capturing the progress and growth of their economic systems The models provide a

quantified framework for the formulation of economic policy They aid the introduction of targets and policy instruments taking account of constraints in the process of development Also an evaluation of external and internal shocks is taken using a comparative static type of analysis The models take into account constraints which are in the nature of institutional as well as supply constraints Problems of data exist in any quantitative analysis and account was taken of this factor in presenting the models and the results reached Nonetheless the models attempt to specify estimate and simulate a given macroeconomic system Models of this type are not freely available to the interested reader but only in a fragmented way This book puts the efforts of a group of economists worldwide under one cover It is believed that the collection will be of interest both for courses in planning and for those advising these countries such as international organizations research bodies etc Moreover an overview of trade policy and income distributional factors is presented It is hoped that this collection will prove interesting and useful to economists world wide

Dynamic Modelling Alisson Brito, 2010-01-01 When talking about modelling it is natural to talk about simulation Simulation is the imitation of the operation of a real world process or systems over time The objective is to generate a history of the model and the observation of that history helps us understand how the real world system works not necessarily involving the real world into this process A system or process model takes the form of a set of assumptions concerning its operation In a model mathematical and logical assumptions are considered and entities and their relationship are delimited The objective of a model and its respective simulation is to answer a vast number of what if questions Some questions answered in this book are What if the power distribution system does not work as expected What if the produced ships were not able to transport all the demanded containers through the Yangtze River in China And what if an installed wind farm does not produce the expected amount of energyt Answering these questions without a dynamic simulation model could be extremely expensive or even impossible in some cases and this book aims to present possible solutions to these problems

A Select Bibliography of British and Irish University Theses about Maritime History, 1792-1990 David M. Williams, Andrew P. White, 2017-10-18 This book provides a bibliography of a wide scope of British and Irish post graduate theses of maritime economic and social history Its intent is to make these informative under utilised texts more accessible for scholars in response to the deep expansion of subject as a historical discipline It aims to keep these texts often unpublished from lapsing into obscurity The author takes a broad approach to the subject area including strands more particular to science than the humanities and history as recent as the year of publication intending the resource to be as comprehensive as possible and of maximum use to present and future scholars The material is primarily gathered and cross referenced from Roger R Bilboul s Restrospective Index to Theses of Great Britain and Ireland 1716 1950 the ASLIB Index and the Institute of Historical Research of the University of London Each entry comprises Surname Thesis Title truncated for length where necessary Degree Awarded Awarding Institution and Date The database comprises 2500 entries subdivided into twenty five sections concerning the shipping business and all commercial mercantile aspects of operation exploration cartography and

navigation shipping and shipbuilding technologies docks and harbours maritime labour maritime medical issues naval history piracy privateering international relations maritime law pollution and the maritime environment fishing sea port communities culture literature and art maritime economics marine architecture coastal planning tourism and off shore oil The sections are further subdivided by location and a geographical index is included for ease of reference The author assures that the majority of theses are readily accessible Advances In Maritime Logistics And Supply Chain Systems Ek Peng Chew, Loo Hay

Lee, Loon Ching Tang, 2011-08-10 This timely book discusses the recent developments in maritime logistics an important specialized area for the global economy It includes issues such as the recent economic crisis port competition and development and provides insights and trends relating to these issues Consisting of renowned researchers worldwide the primary objective of the book identifies some of the new problems and challenges faced and innovative solutions to address these problems **The Applied Economics of Transport** Mark Taylor, 2014-07-16 This book provides an introduction and overview to nine applied financial studies on the theme of transport The studies cover a wide range of topics from value

based trading of real assets in shipping to the determinants of efficiency and productivity in European railways to the market for used cars The studies employ a variety of applied techniques across a range of countries analysing a range of different modes of transport This book was originally published as a special issue of Applied Economics Financial History of Shipping Cycles Andreas Vergottis, 2025-02-21 This book presents the financial performance of shipping industry since 1896

and how fortunes were made and lost through the market cycles In addition to profitability of the maritime industry the book looks at the underlying causes that moved the shipping market such as trade growth and supply influx By reading the maritime press of the time we can track how views were shaped as events unfolded and thus evaluate where and when industry players got their speculative act right or wrong or badly wrong The natural audience of the book includes maritime economists economic historians and behavioural finance members of academia Being simple in presentation the book will also appeal to practitioners of the maritime industry such as shipowners charterers shipping financiers shipbrokers shipbuilders and others Finally the book will also appeal to financial investors outside shipping as a prime example of a speculative industry where ships are being bought and sold on speculation of future profits and resale gains *IBSS:*
