**Land Resource Economics and Sustainable Development** G. Cornelis Van Kooten, 2011-11-01. This text seeks to provide an introduction to issues of land use and the economic tools that are used to resolve land use conflicts. In particular, tools of economic analysis are used to address allocation of land among alternative uses in such a way that the welfare of society is enhanced. Thus the focus is on what is best for society and not what is best for an individual, a particular group of individuals or a particular constituency. What this text seeks to provide is a balanced and just approach to decision making concerning allocation of land. From the Introduction. Land Resource Economics and Sustainable Development has already been tested in a slightly different format on over 400 students in a number of upper level undergraduate and lower level graduate courses. It presents a pragmatic approach to the issues of land use and sustainable development and breaks away from the narrow focus of most economics texts on resources as it takes into account current political and ecological concerns while at the same time providing readers

with the essential economic tools for a rational discussion of land use conflicts Land Resource Economics and Sustainable Development addresses a wide range of issues not covered in other economics texts These include soil erosion wetlands preservation global climatic change urban rural conflict urban land use range management forest management and public land management The broad scope and practical perspective make Land Resource Economics and Sustainable Development useful to students interdisciplinary researchers and professional economists and managers working in the fields of economic development the environment agriculture and forestry Both U S and Canadian data are used throughout the text to illustrate the issues discussed in the book *Resources in Education*, 1985-08 *The Quarterly Journal of Economics* Charles Franklin Dunbar, Frank William Taussig, Abbott Payson Usher, Alvin Harvey Hansen, William Leonard Crum, Edward Chamberlin, Arthur Eli Monroe, 1911 Vols 1 22 include the section Recent publications upon economics **Alternative Political Economy Models of Transition** Marangos, *Alternative Political Economy Models of Transition* John Marangos, 2017-07-05 The collapse of centrally administered socialism in Russia and Eastern Europe resulted in what is commonly referred to as the transition problem the transformation from a centrally administered socialist economic system to one that is market based Economic science has been faced with the challenge of developing an appropriate body of analysis advice and direction to help other nations that may be undergoing this process In this volume John Marangos adopts a political economy approach that yields alternative models of transition The volume develops transition models from what Marangos defines as the primary elements of six variables 1 economic analysis 2 definitions of the Good Society 3 speed of transition 4 political structure 5 ideological structure and 6 initial conditions The models developed include the shock therapy model the neoclassical gradualist model of transition the post Keynesian model the pluralistic market the socialist model and the non pluralistic market socialist model After identifying the primary elements of each transition model Marangos considers the elements of each model with respect to the desirable reforms An essential element of the transition process is not only to identify the necessary reforms but also a sequence in which the reforms should be introduced For each transition model developed in this book a set of primary and secondary elements were provided in conjunction with a sequence of reforms Analyzing the transition problem from a political economy perspective Marangos shows that it is possible to have inconsistencies within each transition model and between transition models yet be able to identify the potential for implementation and maintenance of necessary reforms each model recommends This volume contributes to the understanding of the process of transition with the objective of identifying an optimal model of transition **Paperbound** **Books in Economics** J.
