Civil Service Reform in Francophone Africa 'Ladipo Adamolekun, Guy de Lusignan, Armand Atomate, 1997-01-01

The world s financial markets are rapidly integrating into a single global marketplace and developing countries are being drawn into this process starting from different points and moving at various speeds Those with adequate institutions and sound policies in place may proceed smoothly along the road toward financial integration and gain the many benefits that integration can bring Most of the developing economies lack many of the necessary prerequisites for such a move a few are so unprepared that integration may do them more harm than good Developing countries may have little choice about whether to follow this path advances in communications and new developments in finance have made the course inevitable but they may still choose the ways in which they proceed choosing the policies that benefit the economy and averting potential shocks This World Bank report looks at the important challenges both sets of countries face in a new age of global capital The book presents new and compelling evidence that while low interest rates in industrial countries provided an initial impetus to the surge in private capital flows during 1989 93 these flows have entered a new phase driven by increased financial integration The report analyzes the causes and effects of integration with a particular emphasis on how developing countries in the nascent stages of integration can learn from the experiences of the more rapidly integrating developing countries

including political changes such as the fall of the Iron Curtain and the ascendance of democracy economic factors such as globalization and outsourcing and technological advances e g increased information technology and electronic commerce Their analysis covers many different contexts and regions For example William Ascher of Claremont McKenna College chronicles how decentralization concepts are playing out in natural resources policy while Kadmeil Wekwete United Nations outlines the specific challenges to decentralizing governance in sub Saharan Africa In each case contributors explore the objectives of a decentralizing strategy as well as the benefits and difficulties that will likely result
