Multimodal Evaluation of Passenger Transportation G. Scott Rutherford, 1994 This synthesis will be of interest to transportation planners environmental analysts and government officials at the federal state regional and local levels It describes the state of the practice with respect to the procedures and methodologies used by planning agencies at all levels to plan and evaluate alternative multimodal passenger transportation and to integrate these plans with related land use and environmental issues This report of the Transportation Research Board describes the federal studies and guidelines that are available and presents the findings of an extensive survey of state regional and local agencies to identify the evaluation methods that are being used in the practice Selected case studies for five types of modal evaluation are presented intercity corridor regional study regional screening urban corridor and regional programming

Transport Project Evaluation Elvira Haezendonck, 2008-01-01 This timely book puts transport cost benefit analysis in a wider institutional perspective relating it in particular to decision making The book will be of interest to practitioners consultants and academics who are active in the evaluation of transport projects Erik T Verhoef VU University Amsterdam The Netherlands This is an important piece of work

on project evaluation An attractive feature is the balanced treatment of theory and application The book provides very useful information on efforts of national governments in various countries to increase the quality of project evaluation studies by formulating guidelines for project evaluation One of the strong points of the book is that it does not only address technical aspects of project evaluation tools but also the institutional structures within which decisions are taken Piet Rietveld Vrije Universiteit and Tinbergen Institute Amsterdam The Netherlands This book revisits traditional evaluation methods such as cost benefit analysis to try and find a balance between the ever increasing demand for transport the search for sustainable mobility and green transport solutions and the limited financial resources that governments are able to invest in transport infrastructure projects In this respect the effects of transport policy need to be measured and evaluated based on multiple criteria and the need to take into consideration a larger group of stakeholders and investors in transport projects The book illustrates methodologically and empirically why and how the institutional and multi actor environment impacts upon the analysis evaluation and decision making of transport projects in Europe Including contributions from scholars with considerable expertise in the field this book will be of great interest to consultants policymakers and researchers *The Economic Appraisal of Investment Projects at the EIB - 2nd Edition* European Investment Bank, 2023-05-03 The EIB performs economic appraisals of the projects it considers for investment Thereby it ensures that projects add sufficient value to society to merit support Beyond considerations of financial profitability to investors the economic appraisal also addresses the wider value generated by the project to society This comprises benefits and costs to project final users the taxpayer and third parties allowing for all applicable market failures such as environmental externalities Since the publication of the first edition of this document in 2013 the EIB has been transformed into the EU Climate Bank The way it values carbon emissions has been updated as have various other elements of economic appraisal in keeping with developments in the specialist literature policy and practice This second edition of the document gives the reader an updated view of how economic appraisal is currently conducted at the Bank It also mentions the areas on which the EIB is currently working to ensure that it is at the forefront of economic appraisal practice Transport Projects, Programmes and Policies John Nellthorp, Peter Mackie, 2017-11-30 This title was first published in 2003 The European Union is constantly struggling to find effective ways to plan major transport infrastructure developments at a European level This is a critical factor in the emerging debates surrounding the absorption of the accession states into the EU but it is essential for these states that their economic competitiveness is supported by appropriate and effective transport infrastructure It is therefore crucial to find innovative approaches to the infrastructure itself how it is financed and the ways in which proper evaluation procedures are implemented to select which policies programmes and projects should be supported This informative volume brings together leading international specialists in economic evaluation applied within the transport sector Their contributions encompass all the main levels at which transport planning is typically conceptualized strategic regional policy programme and project

planning It therefore examines how coherent economic evaluation practice can be developed and applied not only across different physical scales but also across national borders

The Full Costs and Benefits of Transportation David L. Greene, Donald W. Jones, Mark A. Delucchi, 2012-12-06 Modern transportation systems have pervasive and far reaching effects on society and the environment Mobility and other benefits of modern transportation arrive with many serious undesired consequences deaths and injuries in transport accidents pollution of air water and groundwater noise congestion greenhouse gas emissions etc Governments and markets both play critical roles in providing infrastructure and operating and policing transportation systems As world transport systems expand and become increasingly motorized the transportation community is searching for transportation systems that are both efficient and sustainable In this book leading international researchers explore the issues and concepts and define the state of knowledge concerning transportation s full costs and benefits
