Teaching Pluralism in Economics John Groenewegen, 2007-01-01 This volume is concerned with the different schools within the discipline of economics theoretical pluralism and the relationship of economics to other disciplines such as sociology political science and philosophy interdisciplinarity It addresses the important implications of pluralism and interdisciplinarity for teaching economics at both undergraduate and graduate level and argues that the economics curriculum should pay equal attention to these new perspectives rather than concentrate on the traditional neoclassical mainstream The distinguished contributors highlight the inherent challenges of presenting a combination of mainstream economics with more heterodox approaches in such a way that the student is not confused but better understands the possibilities and limitations of different schools in economics how to apply these different approaches and when the boundaries of the economics discipline have been reached how then a more interdisciplinary approach can be followed This volume attempts to offer insights into the content of such a revised curriculum and the process of how to achieve this This book will be required reading for every serious teacher and student of economics It will also be invaluable to anyone who questions the validity of current economic orthodoxy
