The Management of Science Douglas Hague, 2016-07-27 The Management of Science contains essays from nine internationally known experts in the rapidly developing field of science studies These contributions deal both with the broader issues such as government intervention and with detailed problems such as advances in biotechnology They will be of interest to politicians civil servants academics research planners and other members of the community who want to see administered science the obedient but enterprising servant of a democratic society

Good Growth and Governance in Africa Akbar Noman, 2012 This volume reflects the highlights of their deliberations

Economics and the Social Sciences Stavros Ioannides, Klaus Nielsen, 2007-01-01 This book is based on the premise that mainstream economics has become excessively specialized and formalized entering a state of de facto withdrawal from the study of the economy in favour of exercises in applied mathematics The editors believe that there is much scope for synergies by engaging in an encounter with economics and the other social sciences The chapters in this book offer important new contributions to such a development A select group of highly regarded contributors illustrate the potentially enlightening relationship between economics and a wide range of social science disciplines In addition some important concepts for economic analysis for example the notion of routines of social capital and of flexibility are explored from the vantage point of several social sciences Postgraduate students in most social science disciplines and in economic sociology will find much to interest them in this book as will students of psychology and economics

Market- Based

Instruments for Environmental Management Mikael Skou Andersen, Rolf-Ulrich Sprenger, 2000-01-01 This volume brings together contributions from political scientists and environmental economists and will prove invaluable for academics practitioners and policymakers interested in the experiences of countries where market based instruments are well established BOOK JACKET

Patent Intensity and Economic Growth Daniel Benoliel, 2017-12-14 Economic growth has traditionally been attributed to the increase in national production arising from technological innovation Using a panel of seventy nine countries bridging the North South divide Patent Intensity and Economic Growth is an important empirical study on the uncertain relationship between patents and economic growth It considers the impact of one size fits all patent policies on developing countries and their innovation based economic growth including those policies originating from the World Intellectual Property Organization the World Trade Organization and the World Health Organization as well as initiatives derived from the TRIPS Agreement and the Washington Consensus This book argues against patent harmonization across countries and provides an analytical framework for country group coalitioning on policy at UN level It will appeal to scholars and students of patent law national and international policy makers venture capitalist investors and research and development managers as well as researchers in intellectual property innovation and economic growth Economic Development Through Entrepreneurship

Scott Andrew Shane, 2007-01-01 Despite a wealth of efforts that examine separately the role entrepreneurs and universities play in economic development no systematic effort has been made to examine the role universities play in promoting economic development through entrepreneurship This book fills that gap focusing on policy aspects of government university partnerships with a discussion both of best practices and problematic strategies The book begins by tracing the history of American government university industry partnerships that have promoted economic development In succeeding chapters well known scholars focus on linkages in different domains such as technology transfer innovation networks brain drain cluster based planning and manufacturing Practitioner commentaries follow many of the chapters in order to present an evaluation of the arguments from the perspective of someone directly involved in the fostering of these relationships Non technical and accessible in nature the chapters summarize existing knowledge and research in order to help policymakers foundations university officials business leaders and other stakeholders create and enhance partnerships between universities and governments that encourage economic development through entrepreneurship

Technical Change and Economic Growth George M. Korres, 2016-12-05 Technological change is not only a determinant of growth but is also a pivotal factor in international competition and the modernization of an economy In one of the most in depth and detailed studies of its kind George Korres analyzes the macroeconomic and the microeconomic factors influencing the economics of innovation and the economic relations between technology innovation knowledge and productivity In particular this book examines both the theoretical framework and the applications for empirical results This second edition contributes updated figures and estimations for technical change from EU member states and features new

subjects including growth models productivity models production function models and non parametric models In one of the most in depth and detailed studies of its kind this book captures all the existing contemporary techniques in the theoretical fields as well as the empirical applications of the models The Culture and Power of Knowledge Nico Stehr, Richard V. Ericson, 2013-05-08 The Culture and Power of Knowledge *Experts* Nico Stehr, Reiner Grundmann, 2011-02-23 In this book Stehr and Grundmann outline the theoretical significance and practical importance of the growing stratum of experts counsellors and advisors in contemporary society and claim that the growing spectrum of knowledge based occupations has led to the pluralisation of expertise As decision makers in organizations and private citizens for various reasons increasingly seek advice from experts the authors examine the nature of expert activity and suggest that the role of experts needs to be distinguished from other roles such as professionals scientists or intellectuals Experts they argue perform knowledge based activities that mediate between the context of knowledge creation and application Existing approaches tend to restrict the role of the expert to scientists or to conflate the roles of professionals with experts In avoiding such restrictions this book sets out a framework to understanding the growing role of expertise in a better way Experts provides thought provoking discussion that will be of interest to postgraduate students and academics working within the fields of social theory knowledge and consumption Evolutionary Patterns of Local Industrial Systems Fiorenza Belussi, Giorgio

Gottardi, 2018-08-20 Pulished in 2000 a selection of contributions presented in 1998 at the conference of Udine entitled The Development of Industrial Districts in Italy The theoretical aim of the book is to explain the dynamic mechanism of the growth of Italian industrial districts shifting attention from Marshallian industrial districts where focus is not just on the decentralization of production among small batch firms Determinant factors explaining growth seem related to the ways in which firms explore the markets learn tacit knowledge network with subcontractors and make incremental innovations In substance the work offers a cognitive approach to the issue of industrial districts **Creating Economic Space for Social**

Innovation Alex Nicholls, Rafael Ziegler, 2019-12-12 This book draws upon economic and sociological theory to provide a comprehensive discussion of economic space for social innovation addressing especially marginalized groups and the long term projects programmes and policies that have emerged and evolved within and across European states It approaches the explanatory and normative questions raised by this topic via a novel approach the Extended Social Grid Model ESGM Taking inspiration from the fields of economic sociology and ethics this model shows that social innovation processes must be structural and require change in power relations if marginalization is to be effectively dealt with via social innovation Part I of the book sets out the ESGM including an exposition on the model along with background chapters on innovation power and marginalization ethics and social innovation and empirical methods Part II explores the model with a focus on social innovation trajectories of social housing drinking water provision employment education and food provision It also explores the operationalization of the model with a view to agency and empowerment as well as social innovation policy in Europe and

the use of social impact bonds as a tool for financing social innovation Part III revisits the ESGM and considers the explanatory adequacy and fruitfulness of the model for innovation research and for theorizing social innovation addressing questions on the role and limitations of participation in social innovation for the marginalized the role of capital for creating economic space for capabilities and how we can approach the social impact of social innovation This collection of essays presents a diverse range of perspectives on understanding and addressing the key issue of marginalization and offers key recommendations for policy makers engaging with social innovation across the European Union and beyond **Handbook**

of Innovation Systems and Developing Countries Bengt-Åke Lundvall,K.J. Joseph,Cristina Chaminade,Jan Vang,2011-01-01 The innovation systems IS approach emerged as a theoretical framework in the industrialized world in the mid 1990s to explain innovation and growth in the developed world This Handbook is the first attempt to adapt the IS approach to developing countries from a theoretical and empirical viewpoint The Handbook brings eminent scholars in economics innovation and development studies together with promising young researchers to review the literature and push theoretical boundaries They critically review the IS approach and its adequacy for developing countries discuss the relationship between IS and development and address the question of how it should be adapted to the realities of developing nations Spanning national sectoral and regional innovation systems across Asia Latin America and Africa and written by the world s leading scholars within the field this comprehensive Handbook will strongly appeal to academics researchers and students with an interest in innovation and technology in developing countries **The Future of Global Business** Michael

Hage,2018-12-20 Published in 1998 In the past year the 300 largest global companies increased their research budgets by an average of 12 per cent Governments now measure how technologically advanced they are as they worry about their trade balances and unemployment Many public sector organizations for example hospitals universities and welfare agencies are struggling to keep up with the rate of technological progress The selections in this book provide a number of insights on how private firms can be more innovative and public sector organizations can keep up with rapid technological change They emphasize both radical and incremental innovations and both product and process innovation In particular the advanced manufacturing technologies so central to Piore and Sabel s Second Industrial Divide receive a great deal of attention Finally the consequences of innovation are the focus of the last section *Growth, Trade and Endogenous Technology* O.

Ochoa,1996-10-29 What part does technological knowledge accumulation play in modern economic growth This book

investigates and examines the predictions of new growth theory using OECD manufacturing data. Its empirical findings portray a novel and complex picture of the features of long term growth where technological knowledge production and diffusion play a central part alongside variations in capital and employment. A parallel examination of long run trade patterns and government policy issues completes a broader account of how knowledge based growth in industrial output is at the heart of modern economic prosperity.
