Kumar, Ramkishen S Rajan, Nicola Virgill, 2008-05-27 The phenomenon of South South FDI flows particularly those arising from multinational companies from China and India has generated considerable interest among policymakers academics and the popular press in recent times This phenomenon raises several questions such as What is behind the rise of such intra regional investment flows What is the magnitude of such flows and can they be expected to persist accelerate over time What are the challenges faced by emerging market multinationals and the future prospects of intra Asian FDI flows This book written by top scholars from academia international organizations as well as think tanks consists of a set of papers focusing on these issues The book is unique in its coverage focusing on China India and Southeast Asia rather than limiting itself to a sub regional or country specific focus The chapters in this book highlight important policy issues but are supported with relevant data and empirics with rigorous empirical analysis being applied to important practical policy issues The book also provides pertinent overviews of recent research on the questions explored While the chapters have been crafted to be able to stand up to academic scrutiny they are also written in a manner that makes them easily accessible to all policymakers students and business financial journalists who are interested in Asia and in the emergence of South South FDI flows

Asia's Transformation Joergen Oerstroem Meoller, 2020-10-23

Moeller's book *The Veil of Circumstance* published in 2016 discussed the impact of technology dehumanization and values on politics and economics. In this book he takes the analysis one step further. The cocktail of capitalism, globalization and technology has turned toxic, causing disruptions and cracks in the global economy and societal structures. Economic globalization is being replaced by a mixture of globalization, regionalization and economic nationalism. Neither the United States nor China will in the mid 2030s possess the strength to be a global leader. Power will mainly rotate around a regional axis instead of globally. The existing political systems and institutions governing the global system see their primogeniture challenged. Social networks open the door to communication for literally everybody while they link the world to a degree never seen before; they also divide people according to cultural norms and values. The large data companies possess enormous power that threatens both national governments and the global political and economic infrastructure.

Globalisation and Defence in the Asia-Pacific Geoffrey Till, Emrys Chew, Joshua Ho, 2009 *Emerging States and Economies* Takashi Shiraishi, Tetsushi Sonobe, 2018-11-19. This open access book asks why and how some of the developing countries have emerged under a set of similar global conditions, what led individual countries to choose the particular paths that led to their emergence and what challenges confront them. If we are to understand the nature of major risks and uncertainties in the world, we must look squarely at the political and economic dynamics of emerging states such as China, India, Brazil, Russia and ASEAN countries. Their rapid economic development has changed the distribution of wealth and power in the world. Yet many of them have middle income status. To global governance issues, they tend to adopt approaches that differ from those of advanced industrialized democracies. At home, rapid economic growth and social changes put pressure on their institutions to change. This volume traces the historical trajectories of two major emerging states, China and India, and two city states, Hong Kong and Singapore. It also analyzes cross country data to find the general patterns of economic development and sociopolitical change in relation to globalization and to the middle income trap.

Time's Arrow, Time's Cycle Peter A. Coclanis, 2006. No part of the world has been affected more by globalization in recent decades than Southeast Asia. This has led many observers to believe that the region's present experience with globalization is at once unprecedented, inevitable and irreversible. Professor Peter A. Coclanis challenges such beliefs and in so doing provides a history of globalization in Southeast Asia over the past two millennia. Employing Stephen Jay Gould's famous temporal metaphors, time's arrow and time's cycle, Coclanis traces the trajectory of globalization, arguing that globalization has ebbed and flowed in the region over the centuries, that globalization is best viewed as a process rather than a permanent condition, and that its effects have differed considerably across space and over time. Professor Peter A. Coclanis is Associate Provost for International Affairs and Albert R. Newsome Professor of History and Economics at the University of North Carolina at Chapel Hill. He was Raffles Visiting Professor in the Department of History at the National University of Singapore in 2005.

The Rise of Asia Prema-chandra Athukorala, 2010-07-12. *The Rise of Asia* examines emerging trends and patterns of foreign trade

and investment in Asia with a view to contributing to the policy debate on how development strategies should be adopted in response to challenges to economic globalization. The existing body of knowledge in this subject area has predominantly been shaped by the experiences of the newly industrialized countries (NICs) in East Asia. This volume is inspired by the conviction that generalization from the NIC experience is hazardous because the on-going process of economic globalization over the past two decades has dramatically transformed the international context of national development policy making. Moreover, as embracing market albeit at varying degree and rapidly has now become an Asia-wide phenomenon, it is vital to look at the issues from a broader relational perspective, paying attention to opportunities for intra-regional division of labour within the wider context of global economic integration. This book will be of interest to students and scholars with an interest in Asian studies, economics, political economy and globalization.

The Poor under Globalization in Asia, Latin America, and Africa Machiko Nissanke, Erik Thorbecke, 2010-05-13. This volume uses thirteen case studies to analyze the impact of economic globalization on poverty and inequality in different regions of the developing world. Southeast Asia in the Global Economy Helen E. S. Nesadurai, J. Soedradjad Djiwandono, 2009. While economic globalization benefited Southeast Asia, especially during the 1990s boom, the region now seems to be caught between two emerging economic giants, China and India. What challenges and opportunities does the rise of China and India pose for Southeast Asia, and how should policy makers respond? Are bilateral free trade arrangements and bilateral economic partnerships a boon or bane for competitiveness? In identifying approaches and strategies to coping with these challenges and leveraging on the opportunities available, this book also links the quest for competitiveness with the necessity of social protection. The link comes in the form of the people who work for firms as human resources and as users and innovators of technology. The book acknowledges and discusses the problems of inadequate technological and innovative capacity and the problems of managing labour productivity in Southeast Asia. However, the book also cautions against focusing on people solely as productive labour, whether in production or the knowledge sector. By highlighting the adverse social, economic and political consequences of ignoring social protection issues and challenging the myth that addressing social protection undermines competitiveness, the book emphasizes the social responsibilities incumbent on governments and firms in this age of growing economic insecurities.

The Local Impact of Globalization in South and Southeast Asia Bart Lambregts, Niels Beerepoot, Robert C. Kloosterman, 2015-08-27. In the past two decades, several millions of IT-enabled services jobs have been relocated or offshored from the US and Europe to, in particular, low-cost economies around the world. Most of these jobs so far have landed in South and South East Asia, with India and the Philippines receiving the bulk of them. This has caused profound changes in the international division of labour and has had correspondingly wide social and economic effects. This book examines how this next wave in globalization affects people and places in South and South East Asia. It brings together twelve case studies from India, the Philippines, China, Hong Kong and Thailand and explores how and for whom services offshoring creates

opportunities triggers local economic transformations and produces challenges This book in addition compares how different countries take part in this second global shift investigates service sector driven economic development from a historical perspective and engages with the question whether and to what extent services offer a new promising avenue of sustained economic growth for developing countries It argues that service led development in developing countries is not easy for all the workers involved or a guaranteed path to sustained economic development and prosperity This volume stands out from other books in the field in its exploration of the social and economic outcomes in the cities and countries where services have been located Based on cutting edge empirical research and original data the volume offers a state of the art contribution to this growing debate The book provides valuable insights for students scholars and professionals interested in services offshoring socio economic development and contemporary transformations in South and South East Asia

Globalization and Equity Natalia E. Dinello, Lyn Squire, 2005-01-01 In bringing together seven regional studies by economists from the Global Development Network Natalia Dinello and Lyn Squire provide an insightful perspective on the relationships between globalization and equity The topic is important but too often has been oversimplified and viewed through western lenses Complexity does not preclude strong conclusions dubbed the Cairo Consensus here but its analysis is helped by the mix of expertise and local knowledge embodied in this book Richard Pomfret University of Adelaide Australia
