Economics As Culture Models And Metaphors Of Livelihood:

Culture and Enterprise Emily Chamlee-Wright, The late Don Economics as Culture Stephen Gudeman, 1986 Lavoie, 2002-01-04 What is the animating spirit behind what may appear to be the coldly calculating world of markets and business enterprise Though often mathematically modelled in dry terms markets can be looked at instead as meaningful domains of human activity To economists markets have been seen as nothing but objective forces or allocation mechanisms This book however argues that they can be seen as involving the human spirit personal expression and moral commitments It presents the view that markets are not so much things that need to be measured as meanings that need to be narrated and interpreted The aim of this book is to introduce two scholarly fields to one another economics and cultural studies in order to pose the question how does culture matter to the economy When we look at the economy as a legitimate domain of culture it transforms our understanding of the nature of business life By viewing markets as an integral part of our culture filled with the drama of human creativity we might begin to better appreciate their role in the world **Cultures of Energy** Sarah Strauss, Stephanie Rupp, Thomas Love, 2016-06-16 This path breaking volume explores cultures of energy the underlying but under appreciated dimensions of both crisis and innovation in resource use around the globe Theoretical chapters situate pressing energy issues in larger conceptual frames and ethnographic case studies reveal energy as it is imagined used and contested in a variety of cultural contexts Contributors address issues including the connection between resource flows and social relationships in energy systems cultural transformation and notions of progress and collapse the blurring of technology and magic social tensions that accompany energy contraction and sociocultural changes required in affluent societies to reduce dependence on fossil fuels Each of five thematic sections concludes with an integrative and provocative conversation among the authors The volume is an ideal tool for teaching unique contemporary and comparative perspectives on social theories of science and technology in undergraduate and graduate courses Morality and Economic Growth in Rural West Africa Paul Clough, 2014-06-01 The land labor credit and trading institutions of Marmara village in Hausaland northern Nigeria are detailed in this study through fieldwork conducted in two national economic cycles the petroleum boom prosperity in 1977 1979 and the macro economic decline in 1985 1996 and 1998 The book unveils a new paradigm of economic change in the West African savannah demonstrating how rural accumulation in a polygynous society actually limits the extent of inequality while at the same time promoting technical change A uniquely African non capitalist trajectory of accumulation subordinates the acquisition of capital to the expansion of polygynous families clientage networks and circles of trading friends The whole trajectory is driven by an indigenous ethics of personal responsibility This model disputes the validity of both Marxian theories of capitalist transformation in Africa and the New Institutional Economics

Encyclopedia of Social and Cultural Anthropology Alan Barnard, Jonathan Spencer, 2009-12-04 Written by leading scholars in the field this comprehensive and readable resource gives anthropology students a unique guide to the ideas

arguments and history of the discipline The fully revised and expanded second edition reflects major changes in anthropology in the past decade Work and Migration Karen Fog Olwig, Ninna Nyberg Sorensen, 2003-08-27 Using case studies from those who have moved either transnationally or internally within their own country international contributors offer various definitions of what it means to make a living on the move Economic Ideology and Japanese Industrial Policy Bai Gao, 2002-05-16 A major addition to the literature on modern Japanese development emphasizing the role of ideas and ideology A Dictionary of Cultural Anthropology Luis Vivanco, 2018-09-20 This new dictionary comprises more than 400 entries providing concise authoritative definitions for a range of concepts relating to cultural anthropology as well as important findings and intellectual figures in the field Entries include adaptation and kinship scientific racism and writing culture providing readers with a wide ranging overview of the subject Accessibly written and engaging A Dictionary of Cultural Anthropology is authored by subject experts and presents anthropology as a dynamic and lively field of enquiry Complemented by a global list of anthropological organizations more than 20 figures and tables to illustrate the entries and web links pointing to useful external sources this is an essential text for undergraduates studying anthropology and also serves those studying allied subjects such as archaeology politics economics geography sociology and gender studies

Social Science Knowledge and Economic Development Vernon W. Ruttan, 2003 The central premise of this book is that the demand for social science knowledge is derived from the demand for institutional change pref **Progress** Richard E. Schade, Dieter Sevin, 2007 The essay reads an Enlightened and modern critique of progress in Mozart s Cosi fan tutte With numerous references to other operas and texts and with a storyline that emphasizes inevitable yet mutable aspects of human nature Cosi presents an ambivalent picture of the ways in which even the most disinterested and best informed attitude toward the past can affect the future At the same time the opera seems to embrace the notion of freedom of choice without rejecting tradition or repetition. The essay also comments on the performance of Cosi in Zurich in 2000 conducted by Nikolaus Harnoncourt who often works with authentic period instruments Global Ecology and Unequal Exchange Alf Hornborg, 2012-03-29 In modern society we tend to have faith in technology But is our concept of technology itself a cultural illusion This book challenges the idea that humanity as a whole is united in a common development toward increasingly efficient technologies Instead it argues that modern technology implies a kind of global zero sum game involving uneven resource flows which make it possible for wealthier parts of global society to save time and space at the expense of humans and environments in the poorer parts We tend to think of the functioning of machines as if it was detached from the social relations of exchange which make machines economically and physically possible in some areas But even the steam engine that was the core of the Industrial Revolution in England was indissolubly linked to slave labour and soil erosion in distant cotton plantations And even as seemingly benign a technology as railways have historically saved time and accessed space primarily for those who can afford them but at the expense of labour time and natural space lost for

other social groups with less purchasing power The existence of technology in other words is not a cornucopia signifying general human progress but the unevenly distributed result of unequal resource transfers that the science of economics is not equipped to perceive Technology is not simply a relation between humans and their natural environment but more fundamentally a way of organizing global human society From the very start it has been a global phenomenon which has intertwined political economic and environmental histories in complex and inequitable ways This book unravels these complex connections and rejects the widespread notion that technology will make the world sustainable Instead it suggests a radical reform of money which would be as useful for achieving sustainability as for avoiding financial breakdown It brings together various perspectives from environmental and economic anthropology ecological economics political ecology world system analysis fetishism theory semiotics environmental and economic history and development theory. Its main contribution is a new understanding of technological development and concerns about global sustainability as questions of power and uneven distribution ultimately deriving from the inherent logic of general purpose money It should be of interest to students and professionals with a background or current engagement in anthropology sustainability studies environmental history economic history or development studies Cultural Factors in Economic Growth Mark Casson, Andrew Godley, 2012-12-06 This volume is the product of the Sixth Annual SEEP Conference on Economic Ethics and Philosophy on the theme of Cultural Factors in Economic Growth held at Marienrode Monastry Hildesheim in April 1998 Our thanks go to our colleagues including Avner Offner whose paper could not be included here the staff at the monastry and Professor Peter Koslowski of the Forschungsinstitut fUr Philo sophie Hannover and editor of this series for contributing to a very enjoyable conference and we hope an interesting collection of essays Mark Casson and Andrew Godley University of Reading March 2000 Contents Preface v Chapter 1 Cultural Factors in Economic Growth MARK CASSON AND ANDREW GODLEY 1 Chapter 2 Trust as a Governance Device BART NOOTEBOOM 44 Chapter 3 A Measure of Culture Trust and Defection in Southern Italy FRANCESCO L GALASSI 69 Chapter 4 Entrepreneurial Minorities A Typology WILLIAM D RUBINSTEIN III Chapter 5 Cultural Determinants of Jewish Immigrant Entrepreneurship in the UK and USA and British and American Culture ANDREW GODLEY 125 CONTENTS Chapter 6 Jurisprudence Expected Value and the Culture of Innovation FRED V CARSTENSEN 142 Chapter 7 Constitutions Liberties and Growth in Pre Modem Europe STEPHAN R EpSTEIN 152 Chapter 8 Culture and the Myth of Economic Determinism in Global History and World Politics KEN DARK 182 Chapter 9 The Case for a Shared World Language ERIC L JONES 21 0 List of Authors 237 Index of Names Creativity and Cultural Improvisation Elizabeth Hallam, Tim Ingold, 2021-01-07 There is no prepared script for social and cultural life People work it out as they go along Creativity and Cultural Improvisation casts fresh anthropological eyes on the cultural sites of creativity that form part of our social matrix The book explores the ways creative agency is attributed in the graphic and performing arts and in intellectual property law It shows how the sources of creativity are embedded in social political and religious institutions examines the

relationship between creativity and the perception and passage of time and reviews the creativity and improvisational quality of anthropological scholarship itself Individual essays examine how the concept of creativity has changed in the history of modern social theory and question its applicability as a term of cross cultural analysis. The contributors highlight the collaborative and political dimensions of creativity and thus challenge the idea that creativity arises only from individual talent and expression. Contrasting Involvements Thomas Ahrens, 1999. Drawing on interviews and observations in matched pairs of firms Contrasting Involvements explores the differences between management accounting practices in Britain and Germany The author deals with contrasting Anglo German approaches particularly regarding how organizational members verbally mobilize accounting how management accountants relate their craft to processes of strategy making and how accounting becomes implicated in organizational processes of accountability. These three themes point towards specific appreciations of the reality of accounting and management by organizational members in the two countries Ahrens gives readers a sense of the immediacy with which accounting practitioners in both countries appreciate their craft while emphasizing that they have different kinds of knowledge Detailed examples illustrate how different enactments of organizational structures can be related to management accountants contrasting involvements in organizational action

Peopled Economies Staffan Löfving, 2005 **Economy and Ritual** Stephen Gudeman, Chris Hann, 2017-05 According to accepted wisdom rational practices and ritual action are opposed Rituals drain wealth from capital investment and draw on a mode of thought different from practical ideas The studies in this volume contest this view Comparative historical and contemporary the six ethnographies extend from Macedonia to Kyrgyzstan Each one illuminates the economic and ritual changes in an area as it emerged from socialism and re entered market society Cutting against the idea that economy only means markets and that market action exhausts the meaning of economy the studies show that much of what is critical for a people s economic life takes place outside markets and hinges on ritual understood as the negation of the everyday world of economising Work, Learning and Sustainable Development John Fien, Rupert Maclean, Man-Gon Park, 2008-10-26 This book is the first that provides a comprehensive overview of the way countries education systems and institutions have responded to the call for an integration of learning for work citizenship and sustainability at the Second International Conference on Technical and Vocational Education which was held in Seoul in 1999 Discussions on the central theme of the Seoul Conference lifelong learning and training for all a bridge to the future led to the conclusion that a new paradigm of both development and Technical and Vocational Education TVET was needed This book showcases the wide range of international initiatives that have sought to put such exhortations into practice It includes case studies of national TVET policy reforms reoriented curricula sustainable campus management programs and examples of innovative approaches to integrating learning in TVET with on the job training and in community service It also focuses on the issues and challenges being faced and ways of moving forward Case studies feature initiatives in a wide range of world regions and countries and

include authors from UK Germany Finland Canada USA Australia South Africa China Republic of Korea India Pakistan and **Economic Development** Jeffrey H. Cohen, Norbert Dannhaeuser, 2002-04-23 Economic development is the Philippines an important focus of anthropological work in rural and urban communities around the world and in this volume the contributors offer expert analyses on the theory and practice of development Chapters cover the key topics of market systems agricultural knowledge modernization population growth participatory development conservation strategies culturally sustainable development globalization and privatization tourism urban development and financial markets The cross cultural focus of the volume provides original data on development processes in many countries including the Philippines Bali Costa Rica Mexico Honduras Venezuela Kazakstan and the United States The book will be a welcome source of comparative research for anthropologists development specialists agricultural researchers environmentalists and geographers Published in cooperation with the Society for Economic Anthropology Visit their web page **Society** Philippe Descola, Gisli Palsson, 2003-12-16 The contributors to this book focus on the relationship between nature and society from a variety of theoretical and ethnographic perspectives Their work draws upon recent developments in social theory biology ethnobiology epistemology sociology of science and a wide array of ethnographic case studies from Amazonia the Solomon Islands Malaysia the Mollucan Islands rural comunities from Japan and north west Europe urban Greece and laboratories of molecular biology and high energy physics. The discussion is divided into three parts emphasising the problems posed by the nature culture dualism some misguided attempts to respond to these problems and potential avenues out of the current dilemmas of ecological discourse Structures of Capital Sharon Zukin, Paul Dimaggio, 1990-05-25 Although market importance is acknowledged this work s emerging theme is the need to account for the ways in which multiple forms of social organization elite groups communities government structures influence economic processes
