Douglas Auld

Economics Of Air Pollution:

Controlling Industrial Pollution Robert W. Crandall,1983 Discusses the effectiveness of government regulations designed to reduce air pollution and recommends changes in air pollution policies and laws **The Economics of Air Pollution in China** Jun Ma,2016-11-29 Suffocating smog regularly envelops Chinese metropolises from Beijing to Shanghai clouding the future prospect of China s growth sustainability Air pollutants do not discriminate between the rich and the poor the politician and the average Joe They put everyone s health and economic prosperity at risk creating future costs that are difficult to calculate Yet many people including some in China are concerned that addressing environmental challenges will jeopardize economic growth In *The Economics of Air Pollution in China* leading Chinese economist Ma Jun makes the case that the trade off between growth and environment is not inevitable In his ambitious proposal to tackle severe air pollution and drastically reduce the level of so called PM 2.5 particles microscopic pollutants that lodge deeply in lungs Ma Jun argues that in targeting pollution China has a real opportunity to undertake significant structural economic reforms that would support long term growth Rooted in rigorous analyses and evidence based projections Ma Jun s big bang proposal aims to mitigate pollution and facilitate a transition to a greener and more sustainable growth model **The Economic**

Consequences of Outdoor Air Pollution OECD,2016-06-09 This report provides a comprehensive assessment of the economic consequences of outdoor air pollution in the coming decades focusing on the impacts on mortality morbidity and changes in crop yields as caused by high concentrations of pollutants Economic Instruments for Air Pollution Control Ger Klaassen,Finn R. Førsund,2012-12-06 Economic theory and empirical models suggest that economic instruments should help us to meet environmental goals at lower cost Practical experience however shows that the cost savings of emission trading are smaller than expected and charges usually have had small incentive impacts This book gives the first comprehensive review of economic theory simulation models and practical experience with the use of economic instruments The book focuses on air pollution control Part I examines theoretical aspects and simulation modeling in a national context Part II surveys the practical experience in a variety of countries Part III explores international issues such as joint implementation Because of its unique blend of theoretical and empirical research the book will prove interesting for both economists and those interested in environmental policy **The Economics of Airborne Emissions** Douglas R. Mackintosh,1973

Links Between Air Quality and Economic Growth Shanthi Nataraj,Ramya Chari,Amy Richardson,Henry H. Willis,2013-12-20 This report assesses the evidence that exists for the ways in which local air quality could influence local economic growth through health and workforce issues quality of life issues or air quality regulations and business operations It then extrapolates some of the existing results to the Pittsburgh region *The Economics of Environmental Policy A.* Myrick Freeman,Robert H. Haveman,Allen V. Kneese,1984 Methods Development for Assessing Air Pollution Control Benefits: Experiments in the economics of air pollution epidemiology United States. The Economics of Environment Peter Bohm,Allen V. Kneese,1971-06-18 Environmental Economics: The Essentials Tom Tietenberg,Lynne Lewis,2019-08-01 Environmental Economics The Essentials offers a policy oriented approach to the increasingly influential field of environmental economics that is based upon a solid foundation of economic theory and empirical research Students will not only leave the course with a firm understanding of environmental economics but they will also be exposed to a number of case studies showing how underlying economic principles provided the foundation for specific environmental and resource policies This key text highlights what insights can be derived from the actual experience Key features include Extensive coverage of the major issues including climate change air and water pollution sustainable development and environmental justice Introductions to the theory and method of environmental economics including externalities experimental and behavioral economics benefit cost analysis and methods for valuing the services provided by the environment Boxed Examples and Debates throughout the text which highlight global examples and major talking points The text is fully supported with end of chapter summaries discussion questions and self test exercises in the book as well as with multiple choice questions simulations references slides and an instructor s manual on the Companion Website This text is adapted from the best selling Environmental and Natural Resource Economics 11th edition by the same authors

Economics of Atmospheric Pollution E.C. van Ierland,Kazimierz Gorka,2013-04-17 This book contains a selection of papers that have been prepared for the NATO Advanced Research Workshop on the Economics of Atmospheric Pollution that took place in Wageningen The Netherlands November 1994 hosted by Wageningen Agricultural University and sponsored by NATO Scientific and Environmental Affairs Division Participants from the USA and a large number of countries in Western Central and Eastern Europe have participated to discuss the economic aspects of transboundary air pollution and climate change A number of selected papers have been reviewed and revised on the basis of the comments provided The editors kindly acknowledge the support of Prof Charles Kolstad University of California Santa Barbara and Prof Stef Proost Center for Economic Studies Catholic University Leuven for reviewing several chapters of the book Also the assistance of several anonymous reviewers is kindly acknowledged We hope that the book will contribute to a better understanding of the most relevant issues in the area of international policymaking on transboundary pollution and climate change and that it contributes to further economic analysis in this interesting research area The topic of transboundary pollution related to climate change acidification and tropospheric ozone will in the coming decades continue to be relevant for all countries in the world Ekko van Ierland Kazimierz Gorka WageningeniCracow June 1996 CONTENTS 1 On the Economics of Atmospheric Pollution Ekko van Ierland and Wageningen Agricultural University The Netherlands **The Political Economy of Smog in Southern California** Jeffry Fawcett,2017-10-19 This study first published in 1990 explores the ways in which institutions can succeed or fail at environmental improvement The author first takes a look at the nature of environmental politics and

the history of air pollution control in Southern California He then develops a political economic model that asks the question what effect have the dramatic changes that have occurred throughout the history of air pollution control in Southern California had on air quality Jeffry Fawcett uses the information gathered to both evaluate the relationship between air quality and institutional change and to evaluate how political economists explain how state environmental institutions work This title will be of interest to students of environmental economics and policy

Economic Thinking and Pollution Problems Douglas Auld, 1972-12-15 The purpose of this collection is to provide the student with an introduction to the way in which the discipline of economics tackles the problems posed in affluent societies by their various waste products Pollution economics introduces a student to aspects of price economics public finance and political economy in relation to a pressing and complex public concern The work includes a number of Canadian statements on pollution and its control in this country and gives the text of two recent pieces of legislation on the topic The selections in this volume present a wide variety of opinions ideas and facts about the economic dimension of the ecological crisis Pollution costs money pollution abatement also costs money and these costs will have to be paid somehow by some people The contributors politicians businessmen and professors explore the problem of pollution and its control as each sees it and the volume as a whole should help encourage a greater awareness both of economics as a way of thinking and of the difficulties in making the right public policies

Measuring the Benefits of Clean Air and Water Allen V. Kneese, 1984 This book examines the current state of the art regarding benefits assessment including such tools as bidding games surveys property value studies wage differentials risk reduction evaluation and mortality and morbidity cost estimation It is based on research sponsored by the United States Environmental Protection Agency related to the quantitative estimation of benefits derived from the maintenance or improvement of air and water quality Part I is a presentation of basic concepts and methods which underlie the case studies in Parts II and III Areas addressed include benefit cost analysis the technique of policy analysis that under Executive Order 12291 must be applied to all major federal regulatory actions the concept of economic benefits links between actions affecting the environment and their effects on humans and why an understanding of those links is important for benefits estimation and problems of assigning economic values to cleaner air and water Part II presents case studies dealing with urban air pollution Part III presents case studies dealing with rural and regional air and water pollution and discusses benefit estimation related to acid rain groundwater contamination and visibility in national parks Parts IV and V contain concluding remarks and a bibliography and index JN

Environmental Concepts, Policies, and Strategies John Rose, 1991 This compilation of 20 papers published in the International journal of environmental studies in the last three years shows results obtained from surveys into the economic social and political background of environmental decisions and planning These results encompass a wide range of topics relevant to the study of the environment The main areas under discussion are politics control strategies determinism rural planning and styles of environmental and agricultural strategies Annotation
