course is the correct answer for a math test Intelligent people say five because it is valid in mathematical systems and contemporary thinking and is highly regarded and rewarded by our society However we don't solely live our lives or think in mathematical systems Our natural sense of reason can consider what we know from our actual contact with a real normal dog too That's when our multitude of other natural senses come into play senses of touch motion color texture language sound smell consciousness community trust contrast and love They each provide further information and help our sense of reason make more sense and a more informed decision They enable our thinking to register that a tail is different than a leg that a dog has four legs not five no matter what might be correct in mathematical logic It is a grave mistake for anyone not to take seriously the difference between 4 leg and 5 leg ways of knowing and our learned prejudice for the latter As this book shows when they are not in balance the schism between their two different ways of registering the world is significant Four leg knowing is a magnificent psychological and physiological phenomenon with deep natural system roots into the eons the heart of Earth and our psyche It brings our widely diverse multiplicity of natural sensory experiences into our awareness Five leg knowing produces important awareness through abstract imagination labels and stories However when it does not also seek and contain 4 leg knowledge it results not only in our desensitization but in the separation of our thinking from the regenerative powers of Earth's natural systems within and around us This profound loss produces the many destructive side effects of our artificial world that we can not readily solve Four leg versus 5 leg discord creates an entrenched conflict in our psyche between how we think and how nature works This is a point source of the stress and contamination our society produces in the integrity of people and the environment It generates our many disorders and troubles that are seldom found in nature It is important to recognize is that by financially and socially rewarding us for getting good grades or for making the grade by using nature isolated 5 leg thinking our socialization habitually bonds conditions programs or ad
