**The Ecoregions of Saskatchewan** G. A. Padbury, Donald F. Acton, Colette T. Stushnoff, University of Regina. Canadian Plains Research Center, Saskatchewan. Saskatchewan Environment and Resource Management, 1998 This book describes the ecoregions of Saskatchewan following a hierarchical framework for terrestrial ecosystems in Canada The introduction reviews ecological land classification and the various interrelated factors that are involved in the development of ecosystems geology water climate vegetation soils wildlife and human impacts The main section describes the province within the context of the four ecozones and 11 ecoregions that were identified in the framework For each ecoregion the book provides a description of the physical setting such as geology climate as well as the biological features that have developed in response to this physical environment The impact of human activities on the ecology of the area concludes each of these descriptions Appendices include lists of animal plant species found in Saskatchewan and a glossary Ecological Classification of Saskatchewan's Mid-boreal Ecoregions Using Resource Maps and Aerial Photographs John David Beckingham, Ian George William Corns, V. A. Futoransky, Northern Forestry Centre (Canada), 1999 This guide has been developed to provide insight in applying ecological information to classify and map forest land in mid boreal Saskatchewan It begins with an overview of the province's ecological classification system and a review of the five types of information sources of ecological information It then describes the four steps used to determine the ecosite phase level of a site from aerial photographs and associated sources Section 5 contains keys to identifying the ecosite phase through the interpretation of resource information Section 6 provides five examples of typical toposequences found in mid boreal regions of Saskatchewan Each example includes an aerial photo stereogram of the selected area an example transect a forest inventory and soil survey maps of the area and interpreted landscape profile and summary tables The final sections include references and a glossary Appendices include lists of ecological units and soil types information on the ecology identification of tree species and soil classification information *Ecoregions of Saskatchewan* Canada. Supply and Services Canada, Saskatchewan Property Management Corporation, Canada-Saskatchewan Agricultural Green Plan Agreement, Canada-Saskatchewan Partnership Agreement in Forestry, 1994 Field Guide to Ecosites of the Mid-Boreal Ecoregions of Saskatchewan John David Beckingham, D. G. Nielsen, V. A. Futoransky, 1996 **Wetland Environments** James S. Aber, Firooza Pavri, Susan W. Aber, 2012-08-24 Wetlands swamp marsh bayou tundra and bog are places that are rarely visited and often misunderstood but they have in fact conspicuous roles in the physical biological and cultural geography of the world They are intrinsically beautiful environments where one may see the natural and essential values in the interaction of water soil vegetation wildlife and humans Wetlands occur at the confluence of unique terrestrial hydrological and climatic conditions that give rise to some of the most biodiverse regions of the world They also play vital roles in the cycling and storage of key nutrients materials and energy through the Earth's system A complete study of wetland environments requires the assessment of their physical and

biological attributes properties and functions of these ecosystems and the economic political and social aspects that mediate their use globally A systems approach is taken throughout this book which emphasizes the interactions between these elements of wetland ecosystems Moreover selected case studies from across the world are used to illustrate wetland characteristics and circumstances This book is intended to foster a greater awareness and appreciation of wetlands promote a culture of conservation and wise management and spread the knowledge that wetlands are important indeed crucial elements of the global environment Our attempts to understand manage and enhance wetlands in the twenty first century are part of the larger effort to maintain a sustainable Earth Readership Introductory or intermediate level undergraduates taking courses on wetland environments Additional resources for this book can be found at [www.wiley.com/go/aber/wetland](http://www.wiley.com/go/aber/wetland)

Transcending Boundaries Rabel J. Burdge, 2001-04 A compilation of abstracts of papers presented at the 8th International Symposium on Society and Resource Management held June 17-22 2000 The abstracts explore the social dimensions of managing spatial landscapes for various purposes The theme of the symposium Transcending Boundaries Natural Resource Management from Summit to Sea provided participants with the opportunity to explore the challenges of working across conceptual cultural and physical boundaries The symposium focused on how social science research is being brought to bear on the exploration of boundary issues in resource management

**Terrestrial Ecoregions of North America** Taylor H. Ricketts, 1999 Lauded in the New York Times science section as a sweeping analysis of the ecosystems of the United States and Canada this volume represents an unparalleled source of information and data for scientists and conservationists working in North America Using a rigorous ecoregion based approach rather than the more common state by state analysis a team of scientists from World Wildlife Fund has produced a stunning and comprehensive assessment of the current status of biodiversity in North America north of Mexico **Terrestrial Ecoregions of North America** begins with six chapters that present the rationale for the ecoregion approach describe the biological distinctiveness of North American ecoregions assess the level of threats facing each present a conservation agenda for the next decade and set forth recommendations for preserving and restoring biodiversity In addition nineteen essays by leading scientists address specific topics such as the effect of cattle on riparian areas and the problem of invasive exotic plant species Following the main text are substantial appendixes that describe each ecoregion in detail including information on unique features of the ecoregion that set it apart from the others its biological distinctiveness threats to habitats and wildlife and important sites for conservation activities that enhance biodiversity conservation in the ecoregion conservation partners working in the ecoregion including addresses and other contact information the relationship of the ecoregion to other classification schemes literature cited for that ecoregion One of the most useful and unique features of the book is the series of thirty full color maps that present essential information about the ecoregions and the biodiversity they contain in a compelling and easily understood graphical format The ecoregion based approach has been adopted by many conservation groups as the most effective way to ward off massive losses of biodiversity

and this volume provides a road map to that important new strategy With a significant number of previously unpublished data sets and new analytic approaches Terrestrial Ecoregions of North America is both a guidebook for describing the biological wealth of the continent and a handbook for restoring and conserving it It will be an essential reference for anyone concerned with biodiversity conservation in North America General Technical Report RM. ,1994 *General Technical Report PNW-GTR* ,2002 **Fire Regimes: Spatial and Temporal Variability and Their Effects on Forests** Yves Bergeron,Sylvie Gauthier,2018-04-13 This book is a printed edition of the Special Issue Fire Regimes Spatial and Temporal Variability and Their Effects on Forests that was published in *Forests* A Research Guide to Cartographic Resources Eva H. Dodsworth,2018-09-22 The interdisciplinary uses of traditional cartographic resources and modern GIS tools allow for the analysis and discovery of information across a wide spectrum of fields A Research Guide to Cartographic Resources navigates the numerous American and Canadian cartographic resources available in print and online offering researchers academics and students with information on how to locate and access the large variety of resources new and old Dozens of different cartographic materials are highlighted and summarized along with lists of map libraries and geospatial centers and related professional associations A Research Guide to Cartographic Resources consists of 18 chapters two appendices and a detailed index that includes place names and libraries structured in a manner consistent with most reference guides including cartographic categories such as atlases dictionaries gazetteers handbooks maps plans GIS data and other related material Almost all of the resources listed in this guide are categorized by geography down to the county level making efficient work of the type of material required to meet the information needs of those interested in researching place specific cartographic related resources Additionally this guide will help those interested in not only developing a comprehensive collection in these subject areas but get an understanding of what materials are being collected and housed in specific map libraries geospatial centers and their related websites Of particular value are the sections that offer directories of cartographic and GIS libraries as well as comprehensive lists of geospatial datasets down to the county level This volume combines the traditional and historical collections of cartography with the modern applications of GIS based maps and geospatial datasets **Book of Abstracts** ,2000 Themes include Crossing conceptual cultural and political boundaries ideas of community place and landscape working in new temporal and spatial scales resource management and environmental justice bioregional deep ecological and ecofeminist perspectives on natural resources cultural definitions of resources co management between state provincial federal national governments and aboriginal native peoples First Nations involvement of ethnic and racial minorities in policy making fisheries parks protected areas in transboundary areas public private sector collaboration etc Atlas of Alberta Lakes Patricia Mitchell,Ellie E. Zielinski, Thomas E. Kucera, 1998-05 In the Western U S the forest carnivores in this assessment are limited to boreal forest ecosystems These forests are characterized by extensive landscapes with a component of structurally complex mesic coniferous stands that are characteristic of late stages of forest development This report assesses the scientific basis for conserving the American marten fisher lynx wolverine It consists of literature reviews for each species a discussion of management considerations information needs Comprehensive *A Dry Oasis* Gregory P. Marchildon, 2009 Scientists have been issuing increasingly direct warnings about the impact that climate change is having on the planet These interdisciplinary studies break new ground in terms of our understanding of the climate experience in the Great Plains before and after agriculture was introduced the current array of institutions surrounding water governance and the strengths and weaknesses of rural and Aboriginal communities Four chapters focus on the present attributes of as well as future scenarios for the South Saskatchewan River Basin in southern Alberta and southwestern Saskatchewan The final group of chapters present case studies of rural communities Cabri and Stewart Valley Saskatchewan and Hanna as well as a First Nation reserve in Alberta as well as a major conflict over water rights in Alberta **Canadian Geography** Thomas A.

Rumney, 2009-12-10 **Canadian Geography A Scholarly Bibliography** is a compendium of published works on geographical studies of Canada and its various provinces It includes works on geographical studies of Canada as a whole on multiple provinces and on individual provinces Works covered include books monographs atlases book chapters scholarly articles dissertations and theses The contents are organized first by region into main chapters and then each chapter is divided into sections General Studies Cultural and Social Geography Economic Geography Historical Geography Physical Geography Political Geography and Urban Geography Each section is further sub divided into specific topics within each main subject All known publications on the geographical studies of Canada in English French and other languages covering all types of geography are included in this bibliography It is an essential resource for all researchers students teachers and government officials needing information and references on the varied aspects of the environments and human geographies of Canada

**The Scientific Basis for Conserving Forest Carnivores** Leonard F. Ruggiero, 1994 This cooperative effort by USDA Forest Service Research and the National Forest System assesses the state of knowledge related to the conservation status of four forest carnivores in the western United States American marten fisher lynx and wolverine The conservation assessment reviews the biology and ecology of these species It also discusses management considerations stemming from what is known and identifies information needed Overall we found huge knowledge gaps that make it difficult to evaluate the species conservation status *Managing for Healthy Ecosystems* David J. Rapport, Bill L. Lasley, Dennis E. Rolston, N. Ole Nielsen, Calvin O. Qualset, Ardeshir B. Damania, 2002-10-29 One of the critical issues of our time is the dwindling capacity of the planet to provide life support for a large and growing human population Based on a symposium on ecosystem health

Managing for Healthy Ecosystems identifies key issues that must be resolved if there is to be progress in this complex area such as Evolving methods for regional ecosystem health assessment employing complex adaptive systems coupled with adaptive technologies to permit accurate determination of changes in regional and global environments Issues and methods for assessing monitoring and managing diversity and its impact on human health in the context of climate change agroecosystems restoration of forests politics culture and tradition Leading thinkers in the field provide a coherent synthesis and a benchmark for the practice of this emerging field worldwide The more than 100 peer reviewed papers are grouped into three major parts The first Emerging Concepts explores the diverse meanings of ecosystem health within ecological socio economic and human health perspectives and the linkages to related concepts such as ecological integrity sustainable development and ecological footprints The second part Issues and Methods introduces methods for assessing and monitoring ecosystem health including strategies for gaining political and stakeholder input and support for science based ecosystem management The final part Case Studies reports experiences of interdisciplinary teams grappling with specific issues in a variety of aquatic and terrestrial ecosystems
