Case studies that examine how firms coordinate economic activity in the face of asymmetric information information not equally available to all parties are the focus of this volume In an ideal world the market would be the optimal provider of coordination but in the real world of incomplete information some activities are better coordinated in other ways Divided into three parts this book addresses coordination within firms at the borders of firms and outside firms providing a picture of the overall incidence and logic of economic coordination The case studies drawn from the late nineteenth and early twentieth century when the modern business enterprise was evolving address such issues as the relationship between coordination mechanisms and production techniques the logic of coordination in industrial districts and the consequences of regulation for coordination Continuing the work on information and organization presented in the influential *Inside the Business Enterprise* this book provides material for business historians and economists who want to study the development of the dissemination of information and the coordination of economic activity within and between firms **Federal Tax Policy for Economic Growth and Stability** United States. Milesi-Ferretti,Nouriel Roubini,1995-07-01 The effects of income and consumption taxation are examined in the context of models in which the growth process is driven by the accumulation of human and physical capital The different channels

through which these taxes affect economic growth are discussed and it is shown that in general the taxation of factor incomes human and physical capital is growth reducing The effects of consumption taxation on growth depend crucially on the elasticity of labor supply and therefore on the specification of the leisure activity The paper also derives some implications for the optimal intertemporal choice of tax instruments **Revenue Revisions, 1947-48** United States.
