Treatment with Older Adults Nancy Kropf, Sherry Cummings, 2017-04-21 Evidence Based Treatment with Older Adults Theory Practice and Research provides a detailed examination of five research supported psychosocial interventions for use with older adults cognitive behavioral therapy motivational interviewing life review reminiscence problem solving therapy and psychoeducational social support approaches These interventions address the diversity of mental health conditions and late life challenges that older adults and their family members experience Detailed explanations of the approaches skills and

strategies employed in each intervention are provided as are adaptations for use of the interventions with older adults. Vignettes are also used to demonstrate the use of specific practice skills and techniques with older clients. The theory undergirding each approach and the historical development of the interventions is explained and provides the reader with a rich understanding of background and context of each therapy. In addition, the distinct issues such as depression, anxiety, substance abuse, misuse for which evidence exists are highlighted. Research support for application of the interventions in community-based acute care and long-term care settings and in individual and group formats is also discussed. Finally, implementation issues encountered in therapeutic work with older adults are described as are accommodations to enhance treatment efficacy. In sum, this book provides a comprehensive overview of evidence-based psychosocial interventions for older adults. It is ideal for students and mental health professionals interested in clinical work with older adults and their families.

Equitable Digital Medicine and Home Health Care Tambone, Vittoradolfo, Anna De Benedictis, Francesco De Micco, Emanuele Lettieri. Digital technologies shape the way in which individuals and health systems interact to promote health and treat illness. Their propensity to exacerbate inequalities is increasingly being highlighted as a concern for public health. Personal, contextual, and technological factors all interact and determine uptake and consequent use of digital technologies for health. Digitalization and the introduction of telemedicine services have demonstrably improved equity in delivering health care services. Digital tech is making healthcare proactive as opposed to reactive, enlarging and enabling access to quality healthcare for communities that were traditionally underserved or marginalized and for home health care. In this scenario, there are still relevant ethical issues that need to be addressed in order to ensure an effective and efficient care in digital medicine. The Topic Editors are inviting papers on a range of research practices and educational topics regarding ethical issues particularly related to the experience of patients, front-line healthcare professionals, and healthcare managers.

Aging and Diversity Lisa Wagner, Chandra M. Mehrotra, Man Guo, 2025-09-22. Aging and diversity intersect in important ways as individuals from different backgrounds experience aging through distinct lenses shaped by traditions, values, and beliefs. As the older population in the United States is becoming more diverse, it is important to understand the characteristics, the potential, and the needs of this population. In this new and fully revised edition of *Aging and Diversity*, Lisa S. Wagner, Chandra Mehrotra, and Man Guo address key topics in diversity and aging, discussing how the aging experience is affected by not only race and ethnicity but also gender, religious affiliation, socioeconomic status, rural/urban community location, and sexual orientation and gender identity. Taking this broad view of human diversity allows the authors to convey some of the rich complexities facing

aging populations complexities that provide both challenges to meet the needs of a diverse population of elders and opportunities to learn how to live in a pluralistic society Wagner Mehrotra and Guo present up to date knowledge and scholarship about aging and diversity in a way that engages readers in active learning placing ongoing emphasis on developing readers knowledge and skills fostering higher order thinking and encouraging exploration of personal values and attitudes

Handbook of Adolescent Health Psychology William T. O'Donohue, Lorraine T. Benuto, Lauren Woodward Tolle, 2014-07-08 Adolescence is a pivotal period of development with respect to health and illness It is during adolescence that many positive health behaviors are consolidated and important health risk behaviors are first evident thus adolescence is a logical time period for primary prevention In addition the predominant causes of morbidity and mortality in adolescence are quite different from those of adults indicating that early identification and treatment of adolescent health problems must be directed to a unique set of targets in this age group Moreover because of the particular

developmental issues that characterize adolescence intervention efforts designed for adults are often inappropriate or ineffective in an adolescent population Even when chronic illnesses are congenital or begin in childhood the manner in which the transition from childhood to adolescence to young adulthood is negotiated has important implications for disease outcomes throughout the remainder of the person s life span Organized in five major sections General Issues Developmental Issues Treatment and Training Mental Health and Physical Health and 44 chapters Handbook of Adolescent Health Psychology addresses the common and not so common health issues that tend to affect adolescents Coverage includes Context and perspectives in adolescent health psychology Health literacy health maintenance and disease prevention in adolescence Physical disorders such as asthma obesity physical injury and chronic pain Psychological disorders such as substance abuse attention deficit hyperactivity disorder depression and eating disorders Congenital chronic diseases such as type 1 diabetes and spina bifida Handbook of Adolescent Health Psychology is the definitive reference for pediatricians family physicians health psychologists clinical social workers rehabilitation specialists and all practitioners and researchers working with adolescents
