Ego Development And The Personality Disorders:

Ego Development and the Personality Disorders David Paul Ausubel,1952 *Ego Development and the Personality Disorders*,1952 **Developmental Psychopathology, Volume 1** Dante Cicchetti,Donald J. Cohen,2006-03-24

Developmental Psychopathology Second Edition contains in three volumes the most complete and current research on every aspect of developmental psychopathology This seminal reference work features contributions from national and international expert researchers and clinicians who bring together an array of interdisciplinary work to ascertain how multiple levels of analysis may influence individual differences the continuity or discontinuity of patterns and the pathways by which the same developmental outcomes may be achieved This volume addresses theoretical perspectives and methodological issues including cross cultural perspectives developmental epidemiology self determination theory and gender issues **Ego** David Paul Ausubel, *Ego Development and Psychopathology* presents an original theoretical underpinning for classification and interpretation of the major mental disorders one based largely on the author s clinical experience Ausubel s central thesis is that the most significant and crucial factors predisposing persons to mental disorders are critical developmental defects that arise at vital transitional phases of ego development He sees both normal and pathological personality functioning as most cogently explained in terms of an individual s ego structure at a given point in the life cycle Ausubel relates his developmental theory to the phenomenology and related clinical problems of psychiatric diagnosis He classifies mental disorders in terms of their developmental history Such factors in his opinion offer the most precise delineation of etiological functional and phenomenological similarities and differences among the various psychiatric syndromes He provides an overview of ego development as well as major variants of the norm He also discusses development of conscience and moral values as well as psychopathological considerations that follow from deficiencies defects failure and distortions in ego development He examines at length classification of mental disorders such as anxiety states psychotic depression and mania schizophrenia autism antisocial and narcissistic personality disorders and defense mechanisms Ausubel is careful to point out that ego development is not the only significant determinant of normal and aberrant personality Genetic predispositions situational stress and sociocultural factors must always be taken into consideration since mental disorder is always a product of multiple causality However he believes ego development is by far the most critical factor and hence offers the most for classification of mental illness This intriguing study will be of interest to professionals as well as educated and concerned practitioners in the fields of psychology psychiatry psychoanalysis child psychotherapy and social work **Ego**

Development and Psychopathology David Ausubel,2018-02-05 *Ego Development and Psychopathology* presents an original theoretical underpinning for classification and interpretation of the major mental disorders one based largely on the author s clinical experience Ausubel s central thesis is that the most significant and crucial factors predisposing persons to mental disorders are critical developmental defects that arise at vital transitional phases of ego development He sees both normal

and pathological personality functioning as most cogently explained in terms of an individual's ego structure at a given point in the life cycle. Ausubel relates his developmental theory to the phenomenology and related clinical problems of psychiatric diagnosis. He classifies mental disorders in terms of their developmental history. Such factors in his opinion offer the most precise delineation of etiological, functional and phenomenological similarities and differences among the various psychiatric syndromes. He provides an overview of ego development as well as major variants of the norm. He also discusses development of conscience and moral values as well as psychopathological considerations that follow from deficiencies, defects, failure and distortions in ego development. He examines at length classification of mental disorders such as anxiety states, psychotic depression and mania, schizophrenia, autism, antisocial and narcissistic personality disorders and defense mechanisms. Ausubel is careful to point out that ego development is not the only significant determinant of normal and aberrant personality. Genetic predispositions, situational stress and sociocultural factors must always be taken into consideration since mental disorder is always a product of multiple causality. However, he believes ego development is by far the most critical factor and hence offers the most for classification of mental illness. This intriguing study will be of interest to professionals as well as educated and concerned practitioners in the fields of psychology, psychiatry, psychoanalysis, child psychotherapy and social work.

Theory and Problems of Adolescent Development, Third Edition, 2002. *The Psychopathology of Personality Disorders* Helyn M. Edwards, 1977. **Personality Disorders** Mario Maj, 2005-03-11. Personality Disorders is a general term for a group of behavioural disorders characterised by usually lifelong ingrained maladaptive patterns of deviant behaviour, lifestyle and social adjustment that are different in quality from psychotic and neurotic symptoms. This book aims to review recent progress and current controversies in this area, providing a guide to clinicians and a contribution to the ongoing revision of the two main diagnostic systems, the DSM IV and ICD 10.

The Psychoanalytic Study of the Child, 1972. Risks and Problem Behaviors in Adolescence Richard M. Lerner, Christine M. O'Hanessian, 2014-02-04. The articles in this volume illustrate how development is propelled by the bidirectional relations that occur between the person and all levels of the context. The authors argue that adolescent life is embedded in a complicated developmental system involving multiple features of the individual, e.g. biology, emotions, personality and cognition, and the multiple levels of his or her social ecology, e.g. peers, family, school, the workplace and the public policy and legal systems that structure and impact behavioural opportunities for and the actions of adolescents. These articles have important implications for the design of interventions.
