Hirsch,2014-01-10 This groundbreaking survey of significant work and ideas focuses on imagemakers who have pushed
beyond the boundaries of photography as a window on our material world Through interviews with more than 40 key artists
this book explores a diverse group of curious experimentalists who have propelled the medium s evolution by visualizing their
subject matter as it originates from their mind s eye Many favor the historical techniques commonly known as alternative
photographic processes but all these makers demonstrate that the real alternative is found in their mental approach and not
in their use of physical methods Within this context photographer and photography historian Robert Hirsch outlines the
varied approaches these artists have utilized to question conventional photographic practices to convey internal realities and
to examine what constitutes photographic reality Hirsch explores the half century evolution of these concepts and
methodologies and their popularity among contemporary imagemakers who are merging digital and analog processes to
express what was thought to be photographically inexpressible Read an interview with the author at Photo net <http://photo.net>
