The Green Encyclopedia Irene M. Franck, David M. Brownstone, 1992 Presents information on a variety of environmental concerns and solutions The New Politics of Class Prof Klaus Eder, 1993-06-10 Are contemporary societies organized by class In recent years the apparent fragmentation of established class structures and the emergence of new social movements in particular the women s movement and environmentalism have altered the traditional expressions of class in society At the same time these changes have posed fundamental questions for the concept of class in sociology and political science In this major reassessment Klaus Eder offers a new perspective on the status of class in modernity Drawing on a critique of Bourdieu Touraine and Habermas he outlines a cultural conception of class as the basis for understanding contemporary societies His model reevaluates the role of the middle classes traditionally the crux of class analysis and links class to social theories of power and cultural capital The result is a cultural theory of class which incorporates the changing forms of collective action and the new social movements of contemporary societies

The Greening of London, 1920-2000 Matti O. Hannikainen, 2017-05-15 The long term development of public green spaces such as parks public gardens and recreation grounds in London during the twentieth century is a curiously neglected subject despite the fact that various kinds of green spaces cover huge areas in cities in the UK today This book explores how and why public green spaces have been created and used in London and what actors have been involved in their evolution during the course of the twentieth century Building on case studies of the contemporary boroughs of Camden and Southwark and making use of a wealth of archival material the author takes us through the planning and creation stages to the intended and actual uses and ongoing management of the spaces By highlighting the rise and fall of municipal authorities and the impact of neo liberalism after the 1970s the book also deepens our understanding of how London has been governed planned and ruled during the twentieth century It makes a crucial contribution to academic as well as political discourse on the history and present role of green space in sustainable cities
