The Political Economy of the Small Firm Charlie Dannreuther, Lew Perren, 2013 For many small firms are everyday realities of the economy and visible in every high street and industrial estate Their existence and importance is unquestionable Such beliefs are understandable but the authors of this new book would suggest they are misguided The Political Economy of the Small Firm challenges the assumptions regarding small firms that pervade society and political representation Small firms are not organised into a homogenous sector that has a clear constituency or political influence In fact the small firm is shown to be an inconstant political construct that is discursively ethereal and vulnerable to political exploitation Fusing theories from political science management and linguistics Dannreuther and Perren assert that the idea of the small firm is an important discursive resource used by political actors to legitimise their actions influence their citizens and help sustain regimes of accumulation On top of this the authors also empirically test their claims against 200 years of UK parliamentary debate from the Industrial Revolution to the Blair government The political construction of the small firm is shown not only to provide rhetorical mechanisms to maintain periods of capitalist accumulation but also to increase the relative autonomy of the state and to centralise power to elite politicians For a period of 150 years up to the 1970s the small firm was an unexplored presence below the political radar and resonant with poor working standards and extreme forms of competition During the so called Fordist period from the 1930s the small firm was seen as the dirty out dated contrast to the clean modern future represented by mass production and corporations The perceived failure of Fordism led to the invention

of the small firm and its presentation as an ideal political construct By fabricating assertions of what small firms are and what they want frequently out of conjecture the authors of this book show how political elites have been able to advocate radical reformist agendas since the 1970s in the name of a phantom constituency Vocational Learning Ralph Catts,Ian Falk,Ruth Wallace,2011-08-12 Effective knowing and learning for vocational purposes must take account of the wide range of variables that impact on knowledge formation and that promote learning In light of those many variables the formal sector of technical and vocational education and training TVET must constantly ask itself what it could and should do to better provide vocational learning for those people likely to pursue learning via the informal sector This book addresses that question Vocational Learning Innovative Theory and Practice discusses four theoretical aspects of vocational learning that support understanding of vocational learning processes and practices the situations of vocational learning the power and roles of social networks and identity in vocational learning knowing and knowledge management processes and the implications for pedagogic practices in both informal and formal TVET systems The book provides an overview of a series of international examples of innovative approaches to vocational educational theory and practice and it draws on empirical research to analyze the effects of those approaches It includes unique insights into aspects of TVET for Indigenous peoples With a discussion of policy implications for Europe North America and Australia this book is an instrumental tool to understand the underlying factors that generate effective educational and workforce outcomes through effective formal and informal learning **Eco-Innovation and Green Productivity for Sustainable Production and Consumption, 2nd edition** Munir Ahmad,Cem Işık ,Zeeshan Fareed,2025-09-12 With the graduation of time the desire for enhanced production and consumption scales motivated the global economies to opt for the race to the bottom approach leading to environmental unsustainability On the one hand economies focused on escalated production levels proliferating non renewable energy consumption and reducing energy productivity leading to production based carbon dioxide CO2 emissions On the other hand international trade of high CO2 emissions embedded goods has skyrocketed the consumption based CO2 emissions Since production and consumption based CO2 emissions challenge environmental sustainability there is an urgent need to pursue sustainable production and consumption to realize the United Nations Sustainable Development Goals SDGs dream In this regard eco innovation came into play to transition the conventional production setup to a cleaner production mode Eco innovation involves all types of technological advancements extending contributions to the SDGs In this regard climate technologies and environmental technologies involving renewable energy e g wind solar biogas energy efficient technologies e g energy efficient electric appliances environmental pollution reduction technologies e g carbon scrubbing filters water purifiers waste mitigation technologies play a tremendous role in mitigating climatic adversities and environmental unsustainabilities By contributing to the responsible use of natural capital eco innovation facilitates efficient energy utilization improving energy productivity as well as environmental sustainability Moreover eco innovation has the inherent
