A Selected Annotated Bibliography on the Analysis of Water Resource Systems Water Resources Scientific Information Center, 1975 **Sustainable Development and Planning** V C. A. Brebbia, Élias Beriatos, 2011 This book contains the proceedings of the latest in a series of biennial conferences on the topic of sustainable regional development that began in 2003 Organised by the Wessex Institute of Technology the conference series provides a common forum for all scientists specialising in the range of subjects included within sustainable development and planning It has become apparent that planners environmentalists architects engineers policy makers and economists have to work together in order to ensure that planning and development can meet our present needs without compromising the ability of future generations The topics covered by the papers included in the book include City planning Regional planning Social and political issues Sustainability in the built environment Rural developments Cultural heritage Transportation Ecosystems analysis protection and remediation Environmental management Environmental impact assessment Indicators of sustainability Sustainable solutions in developing countries Sustainable tourism Waste management Flood risk management Resources management and Industrial developments *Communist Planning versus Rationality* János Mátyás Kovács, 2022-04-14 This volume examines concepts of central planning a cornerstone of political economy in Soviet type societies It revolves around the theory of optimal planning which promised a profound modernization of Stalinist style verbal planning Encouraged by cybernetic dreams in the 1950s and supporting the strategic goals of communist leaders in the Cold War optimal planners offered the ruling elites a panacea for the recurrent crises of the planned economy Simultaneously their planning projects conveyed the pride of rational management and scientific superiority over the West The authors trace the rise and fall of the research program in the communist era in eight countries of Eastern Europe including the Soviet Union and China describing

why the mission of optimization was doomed to fail and why the failure was nevertheless very slow The theorists of optimal planning contributed to the rehabilitation of mathematical culture in economic research in the communist countries and thus to a neoclassical turn in economics all over the ex communist world However because they have not rejected optimal planning as computopia there is a large space left behind for future generations to experiment with Big Optimal Plans anew based at this time on artificial intelligence and machine learning
