Economic Thought And Economic Reform In The Soviet Union:

Economic Thought and Economic Reform in the Soviet Union Pekka Sutela, 1991-07-26 Although the history of centrally planned economies has been widely studied the development of socialist thinking on the subject has remained largely uncharted In this 1991 work Pekka Sutela presents a detailed analysis of Soviet economic thought and theory Dr Sutela traces the competing currents in the Marxist tradition of socialist economies from the Revolution to the present day In particular he shows how the Gorbachev economic reform programme of 1987 rose from the work of Nobel Prize economist L V Kantorovich and his followers However this programme failed and the author explains in some detail why this happened Since then Soviet economists have tried to abandon their traditional theory of central planning and move along the path and long established contacts with leading Soviet economists Pekka Sutela is able to show how Soviet economic thinking has moved from dogmatism through reformism to pragmatism

The Bibliographical Dictionary of Russian and Soviet Economists Robert Campbell, 2012-08-21 Despite the restrictions on their work and actions the economists of the Soviet period produced a great deal of bold and important work With the erosion of the old Stalinist controls economists in the

Soviet Union themselves became very interested in the history of their profession not least in order to find authentic voices that might offer reinforcement or counterpoint to the policy analyses and recommendations with which policy makers in the transition countries are today being bombarded This major new reference work pulls together many years of research in order to present a bio bibliographic dictionary of Russian and Soviet economists many of whom have previously had no coherent record compiled of their careers achievements and wider significance Through exploring this rich tradition of economic thought we can go some way in understanding the role of economists in the functioning of the Soviet system as well as bringing previously forgotten work to light raising new questions and providing a memorial to those who suffered as a result of the system This hugely detailed and important new volume takes into account all the nuances of the story of Russian and Soviet economic thought such as regional issues the reform and transition to a market economy and the economic output of non economists Featuring nearly 500 entries and including a detailed contextual introduction this landmark volume will be a vitally important reference work for all those with an interest in the history of economic thought the history of economics and Russian and Soviet history more generally Economic Thought in Communist and Post-Communist Europe

Liberalism in Russia is one of the most complex multifaced and indeed controversial phenomena in the history of political thought Values and practices traditionally associated with Western liberalism such as individual freedom property rights or the rule of law have often emerged ambiguously in the Russian historical experience through different dimensions and combinations Economic and political liberalism have often appeared disjointed and liberal projects have been shaped by local circumstances evolved in response to secular challenges and developed within often rapidly changing institutional and international settings This third volume of the Reset DOC Russia Workshop collects a selection of the Dimensions and Challenges of Russian Liberalism conference proceedings providing a broad set of insights into the Russian liberal experience through a dialogue between past and present and intellectual and empirical contextualization involving historians jurists political scientists and theorists The first part focuses on the Imperial period analyzing the political philosophy and peculiarities of pre revolutionary Russian liberalism its relations with the rule of law *Pravovoe Gosudarstvo* and its institutionalization within the Constitutional Democratic Party Kadets The second part focuses on Soviet times when liberal undercurrents emerged under the surface of the official Marxist Leninist ideology After Stalin s death the thaw intelligentsia of Soviet dissidents and human rights defenders represented a new liberal dimension in late Soviet history while the reforms of Gorbachev s New Thinking became a substitute for liberalism in the final decade of the USSR The third part focuses on the time of troubles under the Yeltsin presidency and assesses the impact of liberal values and ethics the bureaucratic difficulties in adapting to change and the paradoxes of liberal reforms during the transition to post Soviet Russia Despite Russian liberals having begun to draw lessons from previous failures their project was severely challenged by the rise of Vladimir Putin Hence the fourth part focuses on the 2000s when the liberal alternative in Russian politics confronted the ascendance of Putin surviving in parts of Russian culture and in the mindset of technocrats and system liberals Today however the Russian liberal project faces the limits of reform cycles of public administration suffers from a lack of federalist attitude in politics and is externally challenged from an illiberal world order All this asks us to consider what is the likelihood of a reboot of Russian liberalism *Industrial Policy in Europe after 1945* C. Grabas,A. Nützenadel,2014-03-31 Bringing together renowned scholars in the field with younger researchers this interdisciplinary study of the history of post war industrial policy in Europe investigates transfers across borders and locates industrial policy in the context of the Cold War from a global perspective
