## **Economic Crisis A Christian Perspective:**

**Economic Crisis** John F. Sleeman, 1976 Why doesn't the church say more about what Christians should do at a time of economic crisis Perhaps it may be retorted because the issues involved in the situation are complex and many church leaders do not feel that they have the necessary knowledge and experience But the church is more than its leaders and here an economist who is a Christian offers more detailed discussion and explanation than has so far been available He begins by asking whether there can be a particular Christian economic and social philosophy and then goes on to examine the main economic issues of our time inflation fair shares within the nation fair shares internationally growth and environment and economic organization and participation In the final chapter the author attempts to draw specific conclusions about an effective Christian approach to the economic order and gives his own personal view Publisher Gender Perspectives and Gender Impacts of the Global Economic Crisis Rania Antonopoulos, 2014-01-03 With the full effects of the Great Recession still unfolding this collection of essays analyses the gendered economic impacts of the crisis The volume from an international set of contributors argues that gender differentiated economic roles and responsibilities within households and markets can potentially influence the ways in which men and women are affected in times of economic crisis Looking at the economy through a gender lens the contributors investigate the antecedents and consequences of the ongoing crisis as well as the recovery policies adopted in selected countries There are case studies devoted to Latin America transition economies China India South Africa Turkey and the USA Topics examined include unemployment the job creation potential of fiscal expansion the behavioral response of individuals whose households have experienced loss of income social protection initiatives food security and the environment shedding of jobs in export led sectors and lessons learned thus far From these timely contributions students scholars and policymakers are certain to better understand the theoretical and empirical linkages between gender equality and macroeconomic policy in times of crisis **Surviving a Global Economic Crisis** Hillary Dawes, 2008-09 Our country and the world are going through some very hard economic times and many people including Christians are distressed and are wondering what is going to happen next This book seeks to address some of those concerns from both a Biblical and experiential perspective In this book you will learn about false economic teachings that are prevalent in the world and church today You will learn about true Biblical prosperity and the Biblical economy of ancient Israel You will learn about the Biblical teachings concerning global recessions and whether a global economic recession will usher in the Anti Christ You will have opportunity to dissect some of the most controversial prophecies in the book of Revelation in order to get an economic forecast for the future All this and more will be discovered in this book as I unearth the secrets of surviving a global economic crisis Are you ready for the meltdown Hillary Dawes is a Christian writer who hails from Florida She is a graduate of Florida International University Miami Florida where she received her Bachelors of Science degree She is a certified Biblical Health Coach and a Christian Spiritual Teacher in her church Ms Dawes is a student of

The Crisis and the Kingdom E. Philip Davis,2012-01-01 The ongoing global financial crisis was not simply the fault of the financial sector Bankers households and governments had all entered a spiral of greed selfishness and impatience in pursuit of their respective aims of higher remuneration greater consumption and enhanced popularity The outcome besides costly bank bailouts has been rising private and public debt and stagnant economies Economics the ruling paradigm in today s society can explain their motivation of self interest but not the underlying irrationality of their behavior Taking a view from Scripture Philip Davis critiques the overall aims of individuals as assumed by economics wealth consumption and power in contrast to Jesus proclamation of the kingdom of God the love for God and neighbor and responsible stewardship of resources In doing so he aims to equip Christians to better understand the crisis from a kingdom perspective to provide the church with a distinctive voice in these troubled times and to press for radical Christian solutions to address the underlying difficulties This little book aims to redress the gap in Christians understanding that led the theologian Jurgen Moltmann to remark trenchantly The neglect of economics is a wound in the side of the church

Economics, Ethics and Religion R. Wilson,1997-02-24 There is a revival of interest by economists in ethical issues and beliefs and by moral philosophers and theologians in economics This book is intended to make a contribution to this cross fertilisation of ideas Rodney Wilson has undertaken an extensive survey of Jewish Christian and Muslim views on economics and reviewed the rapidly expanding business ethics literature from a religious perspective The juxtaposition of the work of theologians and moral philosophers with that of economists results in some interesting comparisons

**Islam and Economic Policy** Rodney Wilson,2015-05-15 This textbook looks at the impact of Islamic teaching on public economic policy and asks how Islamic economics differs from mainstream micro and macroeconomics

**Christian Economics** Kit H. Lui,2024-01-31 In today s ever changing economic landscape understanding the principles of Christian economics is crucial for individuals communities and policymakers alike This insightful book delves into the intersection of faith and economics presenting a comprehensive exploration of Christian principles and their application in the realm of finance This book was entirely written by my POE AI bot called KitLuiChristianEcon This book offers a fresh and compelling perspective on economic theory and practice It begins by defining Christian economics as the application of biblical principles to the study and understanding of economic behavior and systems By examining the authority of biblical revelation readers gain a deeper understanding of how faith can shape economic decision making The book goes beyond theoretical discussions providing practical guidance on applying Christian

principles to various economic issues It explores the importance of stewardship and responsible resource management highlighting the biblical perspective on wealth and poverty Additionally it sheds light on the ethical dimensions of business and commerce emphasizing the pursuit of justice and fairness This book also critiques secular economic theories and policies highlighting their limitations without biblical standards It challenges popular ideologies such as socialism and state interventionism while exploring the compatibility of capitalism with Christian values The book encourages readers to evaluate the impact of economic systems on society and advocates for a more just and equitable economic order Furthermore this book addresses contemporary economic challenges such as globalization environmental stewardship and the Christian response to economic inequality It offers insights into successful models of Christian entrepreneurship and social enterprise showcasing real world examples of how Christian economic principles can be put into action Whether you are an economist a business professional or simply interested in understanding the intersection of faith and economics this book provides a thought provoking and practical guide With its clear and accessible writing style this book invites readers to engage in economic discourse and action encouraging a vision for a more just and flourishing economy that aligns with biblical principles While the Bible does not provide a specific economic system or blueprint for modern economies it does offer principles that can guide our thinking and actions These principles highlight the importance of economic justice ethical business practices responsible stewardship and the pursuit of the common good One key aspect highlighted by the bot is the understanding that God is the ultimate owner of all creation and we as His stewards are called to manage our resources in a way that reflects His character and values This perspective challenges us to consider the impact of our economic choices on others particularly the marginalized and vulnerable Moreover the biblical perspective on Christian economics calls for a holistic understanding of human well being It recognizes that economic flourishing is not solely measured by material wealth but encompasses the social emotional and spiritual dimensions of life This challenges us to prioritize relationships community and the pursuit of justice alongside economic growth Another crucial theme identified by the bot is the call to address economic injustices and promote a more just and equitable society Christians are encouraged to advocate for policies and practices that alleviate poverty redistribute resources and challenge systems that perpetuate inequality The vision for a more just and flourishing economy presented by the bot is not detached from the realities of modernity but rather seeks to engage with them It recognizes the need for structural analysis responsible business practices environmental stewardship collaboration and solidarity to bring about meaningful change In conclusion a call for Christian economics in modernity compels us to examine economic principles and practices through the lens of scripture It challenges us to integrate our faith into our economic decisions advocating for justice stewardship and the well being of all individuals and communities By embracing this biblical perspective we can work towards a more just and flourishing economy that reflects God s character and values in the modern world

*Christian Release , God the Economist* M. Douglas Meeks, God does not appear in the modern market For most economists this is as it should be It is in no way necessary according to modern economic theory to consider God when thinking about economy Indeed the absence of God in economic matters is viewed as necessary to the great advances in modern economy The difficulty with modern market economies however is that human livelihood is also left out of the theory and practice of the market economy I propose to bring the church s teaching about God the doctrine of the Trinity to bear on the masked connections between God and economy I will treat the Trinity as the way of understanding what the Bible calls the economy of God

**Profitability and the Great Recession** Ascension Mejorado, Manuel Roman, 2013-10-23 From the mid 1980s investors in the US increasingly directed capital towards the financial sector at the expense of non financial sectors lured by the perception of higher profits This flow of capital inflated asset prices creating the stock market and housing bubbles which burst when the imbalance between stagnant incomes and rising debts triggered the banking meltdown Profitability and the Great Recession analyses these trends in profitability and capital accumulation which the authors identify as the root cause of the financial crisis in the context of the US and other major OECD countries Drawing on insights from Adam Smith David Ricardo John Stuart Mill and

Karl Marx the authors interpret the relationship between capital accumulation and profitability trends through the conceptual lens of classical political economy The book provides extensive empirical evidence of declining rates of US non financial corporate accumulations from the mid 1960s and profitability trends in that sector falling from post war highs In contrast to this it is shown that there was a vigorous rise of profitability in the financial sector from a 1982 trough to the early part of the twenty first century which led to the bloating of that sector The authors conclude that the long term falling accumulation trend in the non financial corporate sector highlighted by the bankruptcy of major automobile corporations stands out as the underlying force that transformed the financial crisis into a fully fledged Great Recession This book will be of interest to students and researchers in the areas of economics political economy business and finance **United and**

**Uniting:** Fredrick R. Trost, Barbara Brown Zikmund, 2005-06-01 United and Uniting studies the commitments covenants and challenges of the United Church of Christ in the twentieth century with reflections from significant theologians and historians of United Church of Christ thought Edited by Frederick R Trost and Barbara Brown Zikmund Series editor Barbara Brown Zikmund Humanism in Economics and Business Domènec Melé, Martin Schlag, 2015-02-25 This book offers

different perspectives on Humanism as developed by Catholic Social Teaching with a particular focus on its relevance in economics and business The work is composed of three sections covering what is meant by Christian Humanism how it links with economic activity and its practical relevance in the business world of today It reviews the historical development of Christian Humanism and discusses the arguments which justify it in the current cultural context and how it contributes to human development The book argues that the current recognition of human dignity and the existence of innate human rights are both ultimately rooted in Christian Humanism It sets out the importance of the concept for economic activities and how Christian Humanism can serve as a metaphysical foundation and ethical basis for a social market economy Applying Christian Humanism to business leads to the centrality of the person in organizations and to seeing the company as a community of persons working together for the common good Three thought provoking case studies illustrate the wide reaching positive impacts of applying Christian Humanism in the organization **Towards an Ethical Framework for Poverty reduction ,**

*Faith and Fragmentation* J. Philip Wogaman, 2004-01-01 In this classic reissue scholar pastor and author J Philip Wogaman addresses people who wonder whether Christian Faith makes sense in light of the sweeping changes of our age changes that have created at the same time a pluralistic world a technologically sophisticated world a dangerous world a world of great prosperity and yet great suffering What are we to make of this time we live in Can the Christian faith really provide a stable foundation Wogaman wrestles with these and other questions as he investigates the true meaning of a Christian faith with a positive understanding of religious pluralism and a rejection of fanaticism He concludes that this faith is a hopeful love that proclaims the centrality of love against selfishness and the power of hope against despair **From Pluralism to Extinction? *Less Than Two Dollars a Day* Kent A. Van Til, 2007-03-02 Christian tradition demands basic sustenance for all as a human right Yet the contemporary capitalist economy makes no such demands and the free market is not designed to provide basic human sustenance As Western Christians how ought we to solve this conundrum Kent Van Til maintains that the gulf between the two calls for an alternative system of distribution In this constructively critical work Van Til takes a hard look at the realities of life in a free market system including illuminating examples from his own experience in Latin America He considers how the contemporary capitalist economy guides the distribution of goods around the world and he examines the inadequacies of this system Drawing heavily on the ideas of political theorist Michael Walzer and nineteenth century theologian statesman Abraham Kuyper Van Til proposes an alternative system of distributive justice equalizing the claims to both burdens and benefits
