Economic Democracy Martin Carnoy, Derek Shearer, 1980 **Mother Jones** , 1982-05 **Economic Democracy: The Challenge of the 1980's** Martin Carnoy, Derek Shearer, 2023-03-31 This text discusses the economic social and political implications of redirecting labour and capital from a military based to a post Cold War economy *The Community of Rights* Alan Gewirth, 1996 The Community of Rights provides a detailed explication of the fundamental rights of agency as derived from a single rationally justified principle of morality and develops the contents of economic and social rights as a basic part of human rights A critical alternative to both liberal and communitarian views this authoritative work will command the attention of anyone engaged in the debate over social and economic justice **The Social Production of Urban Space** M. Gottdiener, 2010-07-22 From reviews of the first edition This is perhaps the best theoretically oriented book by a United States urban sociologist since the work of Firey Hawley and Sjoberg in the 1940s and 1950s Gottdiener is on the cutting edge of urban theoretical work today Joe R Feagin Contemporary Sociology Since its first publication in 1985 The Social Production of Urban Space has become a landmark work in urban studies In this second edition M Gottdiener assesses important new theoretical models of urban space and their shortcomings including the global perspective the flexible accumulation school postmodernism the new international division of labor and the growth machine perspective Going beyond the limitations of these and older theories Gottdiener proposes a model of urban growth that accounts for the deconcentration away from the central city that began in the United States in the 1920s and continues today Sociologists political scientists economists geographers and urban planners will find his interdisciplinary approach to urban science invaluable as it is currently the most comprehensive treatment of European and American work in these related fields

Compliance Ideologies Richard W. Wilson, 1992-05-29 Originally published in 1992 this book is about political culture It examines developments in the social sciences and integrates them into a theoretical explanation of historical changes in political values The starting point is the premise that political culture is rooted in the interaction between individual thinking and social norms Unjust Legality James L. Marsh, 2001 This book is an interpretation and critique of Habermas s philosophy as contained in his book Between Facts and Norms The main argument is that while Habermas does succeed in laying out foundations conceptual and methodological for the philosophy of law the book is flawed by a fundamental contradiction between a democracy ruled by law and capitalism Visit our website for sample chapters **Friendly Fascism** Bertram Myron Gross, 1980 Widely acclaimed and hotly debated this provocative and original look at current trends in the United States presents a grim forecast of a possible totalitarian future a book that offers a very clear exposition of where America is and how we got there William Shirer Becoming Free William L. study demonstrates that because their opposing nature democracy and capitalism or socialism cannot coexist To have a democratic society we have to replace capitalism or socialism with a democratic free market economy and take government out of regulating peoples business and daily life The author attempts to present such a democratic concept its societal structure and function and how under such a system people understand the purpose of life work less hours yet have a prosperous leisurely and satisfying life The book is actually the story of some parts from the authors life written in an autobiographical form showing hardships sufferings failures incredible adventures romance and love he encountered in developing his theory and how persistence and determination despite repeated failures helped him to succeed in developing his theory and at the same time transformed him to a better human being *Schooling and Work in the Democratic State* Martin Carnoy, Henry Levin, 1985-06-01 A new explanation of the relation between schooling and work in the democratic advanced industrial state emerges from this study that rejects both traditional views and the more recent Marxian perspective Traditional views consider schools as autonomous institutions that are able to pursue the goals of equality and social mobility irrespective of the inequalities of capitalist society the Marxian perspective views schools as serving the role of producing wage labor for capitalistic exploitation The authors suggest that the shortcomings of both views are rooted in the fact that they do not recognize the true functions of the democratic capitalist state The state is seen as an arena for struggle between forces pushing for egalitarian democratic reforms and those seeking to use the resources of the state for private capital accumulation Depending on which side has primacy at the moment schools will reflect one set of goals over the other However victory is never complete and the tide of battle has shifted back and forth historically The authors develop this theory through interpreting the dynamic relation between U S schools and the workplace Based on this approach they predict changes in both schooling and work as well as the forms that future conflicts between the contending forces are likely to take **Rights and Goods** Virginia Held, 1989-07-19 Theories of justice argues Virginia Held are usually designed for a perfect hypothetical world They do not give us guidelines for living in an imperfect world in which the choices and decisions that we must make are seldom clear cut Seeking a morality based on actual experience Held offers a method of inquiry with which to deal with the specific moral problems encountered in daily life She argues that the division between public and private morality is misleading and shows convincingly that moral judgment should be contextual She maps out different approaches and positions for various types of issues including membership in a state legal decisions political activities economic transactions interpersonal relations diplomacy journalism and determining our obligation to future generations Issues such as these provide the true test of moral theory since its success is seen in the willingness of conscientious persons to commit themselves to it by acting on it in their daily lives *Urban Fortunes* John R. Logan, Harvey Luskin Molotch, 2007-08-28 Twenty years after publication *Urban Fortunes* remains the best book on urban sociology around Starting from a political economy analysis Logan and Molotch develop a picture of the formative processes creating the

contemporary American city while managing to avoid the pitfalls of determinism Susan Fainstein Harvard University

Spirituality and Society David Ray Griffin, 1988-01-01 This book takes a genuinely new spiritual stance reflecting the emergence of a post modern science and differing from the relativistic nihilism that calls itself postmodern but is really modernism extended to its limit Based on a direct experience of reality as divine this postmodern spirituality transcends modernity s individualism and patriarchy its forced choices between dualism and materialism anthropocentrism and relativism supernaturalism and atheism intolerance and nihilism Bringing moral and ethical values back into rational discourse this book provides a critique of various aspects of modern society political economic social agricultural and technological aspects This criticism informed by the postmodern worldview points toward a more satisfying form of personal existence and a sustainable form of global order

The New Politics of Science David Dickson, 1988 How science gets done in today s world has profound political repercussions since scientific knowledge through its technical applications has become an important source of both economic and military power The increasing dependence of scientific research on funding from business and the military has made questions about the access to and control of scientific knowledge a central issue in today s politics of science In *The New Politics of Science* David Dickson points out that the scientific community has its own internal power structures its elites its hierarchies its ideologies its sanctioned norms of social behavior and its dissenting groups And the more that science as a social practice forms an integral part of the economic structures of the society in which it is imbedded the more the boundaries and differences between the two dissolve Groups inside the scientific community for example will use groups outside the community and vice versa to achieve their own political ends In this edition Dickson has included a new preface commenting on the continuing and increasing influence of industrial and defense interests on American scientific research in the 1980s

The Latino Question Armando Ibarra, Alfredo Carlos, Rodolfo D

Torres, 2018-08-20 While so many Latino Chicano Americans struggle in pursuit of the American dream while figures such as Donald Trump are accepted in mainstream politics and scaremongering and paranoia is rife the need for a vivid empirically grounded study on Latino politics culture and society has never been greater *The Latino Question* fulfils this need offering a cutting edge analysis of the transformative nature of Latino politics in the US In a radical alternative to dominant ideas the authors emphasise the importance of political economy for understanding Latino politics culture and social issues It draws from original research and a number of critical traditions including the thought of Karl Marx and Antonio Gramsci to understand the politics of race and ethnicity in a modern capitalist society Including case studies of how Latino Chicano communities across the US are not only resisting but also reinventing and transforming ethnic politics in the age of neoliberalism this book is required reading for all those hoping to understand the Latino question in contemporary America

Refounding Democratic Public Administration James F. Wolf, 1996-05-29 The American political system is undergoing a serious governmental crisis our political leaders know only how to campaign not how to gain consensus on

goals or direct a course that is for the good of the nation Continuing research that began over a decade ago with Gary L Wamsley s Refounding Public Administration this informative new volume continues the argument that public administration is at the center of the governance process and is therefore forced to compensate for the growing inadequacy of our leaders Refounding Democratic Public Administration offers a revisualization of the relationship between public servants and the citizens they serve as well as a continuing discourse on how public administration can constructively balance forces of change and stability in order for democracy to evolve and mature This eye opening volume will be required reading for students and professionals in public administration political science and management organization studies

Restoring Real Representation Robert Cowan Grady, 1993 Popular representation seen by constitutional founders including James Madison as the pivot of republicanism has been gradually ritualized and discounted Robert Grady maintains that contemporary pluralist theory

devalues citizens' civic roles and reduces elections to symbolic exercises. In its more recent incarnations as interest group liberalism and corporatism, he believes pluralism undercuts the grounds for real representation in favor of representation for the organized and privileged. In *Restoring Real Representation*, Grady argues for restoration of real citizen representation through democratic functional jurisdictions rather than by means of the usual electoral and political party reforms. In fact, he says many critics of contemporary politics have proposed reforms that inadequately account for constitutional principles. Analyzing pluralist, corporatist, and participatory theory, Grady shows how these jurisdictions principally the workplace community but by extension other ethnic, religious, and geographic associations can serve as constituent organizations for participation and reaffirm the pivotal role of representation.
