Smith, 2003-03-20 Now in its 2nd edition this comprehensive and accessible text provides a detailed study of labour market issues This excellent new book is a must see for all those involved in Labour Economics **Competitiveness Matters** Candace Howes, Ajit Singh, 2010-08-27 This book argues against the current view that competitiveness that is the competitiveness of the manufacturing sector matters to the long term health of the U S economy and particularly to its long term capacity to raise the standard of living of its citizens The book challenges the arguments popularized most recently by Paul Krugman that competitiveness is a dangerous obsession that distracts us from the question most central to solving the problem of stagnant real income growth namely what causes productivity growth especially in the service sector The central argument is that if the U S economy is to achieve full employment with rising real wages it is necessary to enhance the competitiveness of its tradable goods sector The book shows that current account deficits cannot be explained by macroeconomic mismanagement but are rather the consequence of an uncompetitive manufacturing sector It finds that the long term health of the manufacturing sector requires not only across the board policies to remedy problems of low or inefficient investment but also sectoral policies to address problems that are strategic to resolving the balance of payments problems Lessons are drawn from the experience of some European and Asian countries This book will be of interest to economists political scientists and business researchers concerned with the place of the manufacturing sector in overall health of the U S economy with issues of industrial policy and industrial restructuring and with the conditions for rising standards of living Candace Howes is Associate Professor Barbara Hogate Ferrin Chair Connecticut College Ajit Singh is Professor of Economics Queens College Cambridge *Small Business* D. J. Storey, 2000 Managing the Economy, Managing the People Jim Tomlinson, 2017 This study offers a distinctive new account of British economic life since the Second World War focussing upon the ways in which successive governments in seeking to manage the economy have sought simultaneously to manage the people to try and manage popular understanding of economic issues In doing so governments have sought not only to shape expectations for electoral purposes but to construct broader narratives about how the economy should be understood The starting point of this work is to ask why these goals have been focussed upon and differentially over time how they have been constructed to appeal to the population and insofar as this can be assessed how far the population has accepted these narratives The first half of the book analyses the development of the major narratives from the 1940s onwards addressing the notion of austerity and its particular meaning in the 1940s the rise of a narrative of economic decline from the late 1950s and the subsequent attempts to modernize the economy the attempts to roll back the state from the 1970s the impact of ideas of globalization in the 1990s and finally the

way the crisis of 2008/9 onward was constructed as a problem of debts and deficits. The second part of the book focuses on four key issues in attempts to manage the economy: productivity, the balance of payments, inflation and unemployment. It shows how in each case governments sought to get the populace to understand these issues in a particular light and shaped strategies to that end.

**The Labour Movement in Britain from Thatcher to Blair** Keith Barlow, Geoffrey Keith Barlow, 2008. British economic and industrial policy since 1979 is examined using a wide range of sources. Was this really new revival of earlier approaches or a rigorous extension of the IMF imposed policies on the 1974-79 Labour Government? The question is asked: Was the creation of a large pool of unemployed labour necessary for reshaping the economy or was the aim to secure fundamental changes in the relations between capital and organised labour? Due to setbacks suffered by trade unions in the 1980s with factory closures and major job losses, the author questions Labour's motives in softening any meaningful opposition to the Conservatives supporting ERM in 1990, reducing the role of trade unions in the Party itself and retaining key policies of the Thatcher era, especially its trade union laws.

**Modern Britain** Sean Glynn, Alan Booth, 2020-08-17. Modern Britain focuses on two major periods of British history: the interwar period and postwar Britain. The authors compare and contrast developments in the two periods dealing with the themes of growth and welfare, industry, labour, social policy, the economy. Combining a narrative with a conceptual and analytic approach, Modern Britain provides an end of century review of progress and decline and an essential background to current polemics and major issues of concern. Clearly structured and written, this is an invaluable textbook for students of twentieth century British history.
