## **Economic Policy For The European Community The Way Forward:**

**Economic Policy for the European Community** Sir Alec Cairncross, 1974-06-18      Economic Policy for the European Community Alec Cairncross, 1974      European Communities John Paxton, 1992-01-01 The establishment of the European Economic Community in 1958 was one of the most remarkable developments in the history of the post World War II era. It aimed for nothing less than a complete economic union so that goods, people, and capital would be able to pass over national boundaries of member countries as freely as they move within any one country. As the Community's target date of 1992 for economic integration draws closer, the need for information, both current and historical, becomes more urgent. The aim of this annotated bibliography is to create a critical and descriptive list of books published mainly in English for businessmen and analysts, combining older publications with new. The literature on the EC is vast and issues. The Community itself nearly 3000 publications a year. The range of material covered in this volume is distinguished by its great scope. Historical sections provide listings on the postwar years of economic recovery, the development of the EC, and biographies of the leading personalities involved. Policy-oriented sections encompass such subjects as labor, transportation, environment, energy, and education. The political ramifications of economic union, financial and fiscal affairs, relations between the EC and the Third World, and foreign relations in general are dealt with in separate sections. The volume concludes with a listing of major European Community publications. The sheer bulk of published material on the EC, much of it duplication, has made keeping up with its developments difficult for small and medium-sized firms in Europe and elsewhere. This invaluable sourcebook will provide the business community and the political establishments with better access to EC information as they grapple with the implications of 1992.

**The Political Economy of the European Social Model** Philip Whyman, Mark Baimbridge, Andrew Mullen, 2012-05-31 This book seeks to analyse the development of the European Union (EU), which was founded upon the principle of the free movement of capital, goods, services, and people in 1957. Its central thesis is that from a practical and theoretical point of view, such a basis is fundamentally at odds with the creation of an interventionist regime. That the construction of a social Europe would require. The authors argue convincingly that economically, the EU does not currently possess the budget or the economic tools to pursue such a strategy. Politically, close to none of the institutions of the EU have backed such a policy. Practically, conservative and neo-liberal forces among member states, and the institutions of the EU, have repeatedly thwarted any moves in this direction. In reality, the Single Internal Market, Economic and Monetary Union, enlargement, the Lisbon Agenda, and European Constitution projects all prioritise supply-side measures and expanding the scope of the market rather than the boosting of demand and other economic intervention. Consequently, constructing a social Europe in the face of this would appear problematic. Hence, in both theory and practice, the idea that there can be a social Europe vis-à-vis neoliberalisation is a contradiction in terms. This controversial book will be an educating and refreshing read for advanced students and academics involved with European politics, the European Union, European Economics, and

Economic institutions      **A Handbook of International Economic Institutions** M. A. G. van Meerhaeghe, 2012-12-06  
 What made me write this book was a feeling that students of international economics needed to find out their knowledge of the theory with work on the practice of the major international economic organizations many of which are having a growing influence on the national economies of their members There was no single volume given over to a concise treatment of these organizations of the international organizations themselves can be seen The annual reports suited of course but as a rule these are not noted for being brief and to the point the items of importance have to be fished out of a sea of useless detail nor do they go in for criticism of their own activities In selecting the organizations to be dealt with in the book I was guided by the influence they exert I have left out those whose activities consist mainly in the drafting recommendations to which however meritorious they may be little or no attention is paid Some of them are included in the Introduction which provides a summary of a number of institutions not discussed separately in the body of the work There are however two exceptions the Organization for Economic Cooperation and Development OECD as the organization replacing the Organization for European Economic Cooperation OEEC and the United Nations Conference on Trade and Development UNCTAD whose meetings have succeeded in drawing much attention of the press      **Fiscal Policy in the European Union** J. Ferreiro, G. Fontana, F.
