Economic Valuation Of Natural Resources Rebecca L Johnson,2019-04-24 Allocation of natural resources has become a prominent concern at the local state and federal

level Competing uses for increasingly scarce resources are requiring that the relative values of those uses be investigated Although many types of value are important in decision making this book is concerned with the economic value of natural resources Economic values for certain natural resources are readily observable in markets For others however market prices are not available and estimates of value must be made through nonmarket valuation techniques The progress that has been made in improving the theory methods and applications of these techniques has been remarkable Along with the progress however come new problems that must be addressed The chapters presented in this volume are a collection of examples of both progress and problems

Valuing Environmental and Natural Resources Timothy C. Haab, Kenneth E. McConnell, 2002-01-01 Non market valuation has become a broadly accepted and widely practiced means of measuring the economic values of the environment and natural resources In this book the authors provide a guide to the statistical and econometric practices that economists employ in estimating non market values The authors develop the econometric models that underlie the basic methods

contingent valuation travel cost models random utility models and hedonic models They analyze the measurement of non market values as a procedure with two steps the estimation of parameters of demand and preference functions and the calculation of benefits from the estimated models Each of the models is carefully developed from the preference function to the behavioral or response function that researchers observe The models are then illustrated with datasets that characterize the kinds of data researchers typically deal with The real world data and clarity of writing in this book will appeal to environmental economists students researchers and practitioners in multilateral banks and government agencies
