The Zero-Carbon House Martin Godfrey Cook, 2011-09-16 Zero Carbon is an abstract concept for most people but we have lived energy profligate lifestyles for too long on finite fossil fuel resources We now face potential environmental catastrophe from climate change and global warming with a continuing exponentially expanding global population that doubles every four decades The capacity of the planet to reabsorb carbon dioxide is about two to three tonnes of carbon equivalent per person at current population levels of seven billion and therefore there is a desperate need for us to reduce our carbon footprint A way of helping to achieve this is to live in a zero carbon house and this will become UK legislation for new homes by 2016 This fascinating book covers all aspects of the zero carbon house from its evolution to achieving carbon neutrality in old and new homes as well as entire communities Includes

an overview of zero carbon and how to achieve it on a global scale covers communities of zero carbon houses and provides inspirational examples of low carbon lifestyles Case studies show how principles are put into successful practice to save energy carbon money and the environment **The Art of Natural Building** Joseph F. Kennedy,1999 *Introduction to Urban Housing Design* Graham Towers,2013-05-13 This clear and concise guide is the ideal introduction to contemporary housing design for students and professionals of architecture urban design and planning With the increasing commitment to sustainable design and with an ever increasing demand for houses in urban areas housing design has taken on a new and crucial role in urban planning This guide introduces the reader to the key aspects of housing design and outlines the discussion about form and planning of urban housing Using chapter summaries and with many illustrations it presents contemporary concerns such as energy efficient design and high density development in a clear and accessible way It looks at practical design solutions to real urban problems and includes advice on reclamation and re use of buildings The guidance it presents is universally relevant Part two of the book features current case studies that illustrate the best in high density sustainable housing design providing the reader with design information and design inspiration for their own projects

Industrial Ecology and Spaces of Innovation K. Green,2006-01-01 This is an especially timely book Carefully organized and well motivated its power lies in the explicit effort to ask how industrial ecology and innovation studies do can and should intersect Reid Lifset Yale School of Forestry and Environmental Studies and editor Journal of Industrial Ecology This book explores the disciplinary interfaces and practical implications of working across the two disciplines of industrial ecology IE and innovation studies IS Both disciplines have something to say about instigating environmental improvement and more sustainable futures IE is predicated on the idea that social and economic systems mirror or should be made to mirror natural ecological systems Proponents of IE devise models and techniques to trace material and energy resource flows as they move through social and economic systems They propose policy and management improvements to increase the resource efficiency of such systems By contrast IS researchers work with the idea that innovation is a dynamic activity vital to social and economic change and is shaped by a range of actors in industry in government and in households The authors illustrate the conceptual and practical problems and opportunities of working across this bi disciplinary interface with case studies presented from each and from hybrid perspectives that draw on both These include applied examples from IE such as an evaluation of industrial symbiosis in the UK and from working projects in industrialising countries Cases that originate with IS cover the areas of food construction and waste incineration New directions for conceptual development and further research are also offered Conceptual blindspots and research gaps are identified at the interface of the two disciplines Industrial Ecology and Spaces of Innovation will appeal to a wide and interdisciplinary audience including academics and researchers of environmental innovation management and economics industrial ecology and schools of environmental engineering Business environmental practitioners consultants and managers working with techniques such as life cycle

analysis environmental impact assessment and collaborative industrial symbiosis initiatives will also find much to engage them within this book
