Managing and understanding the value of an organization's reputation is essential in the digital age where the slightest negative incident can go viral and quickly become a major PR containment exercise. Reputation management is an integrated part of any organization's risk management plan so this intangible yet vital asset has to be assessed, managed and protected. Reputation Management provides advice on how to define and value your organization's reputation and techniques for maintaining and protecting it from risks that may arise on a daily basis. This book also covers where the responsibility for reputation management lies, risk identification, governance aspects and containment and mitigation of a negative event. Aimed at the risk manager, corporate communicator, business strategist, auditor and senior manager, Reputation Management covers the governance of reputation, measuring and managing reputation, managing and monitoring external perceptions, reputation crisis management, strategic planning and reputation, reputation and investors. Reputational Risk Derek Atkins, Lynn Drennan, Ian Bates, 2006. Published in association with the Risk Management Association of the USA, RMA, the Association of Insurance and Risk Managers, AIRMIC and the Institute of Risk Management, IRM. Will stimulate the thinking of executives and leave them wanting to do something about it and give them the means to start. A topical and increasingly important issue reflected in recent scandals, Enron, Marconi, government responses e.g. the Combined Code in the UK and the continuing growth in consumerism. An organization's own reputation is a valuable asset that is often insufficiently managed if it is managed at all. This book not only outlines its importance but it presents a new and insightful definition of the risk and proposes an approach for managing it properly. For the first time a whole range of current issues, scandals and frauds, government legislation on risk management and reporting the growth of consumerism etc. is targeted in a single logical argument on how to deal with it. Aimed at directors and senior executives, professional risk managers, consultants and professional risk advisers and students in advanced courses.
