Speechwriting in Perspective Thomas H. Neale,Jean M.

Bowers,2003 Writing for the spoken word is a special discipline it requires that speechwriters products be written primarily although not exclusively to be heard not read Speeches are better cast in simple direct and often short sentences that can be easily understood by listeners Rhetorical devices such as repetition variation cadence and balance are available to and should be used by the speechwriter It is important for speechwriters to analyse audiences according to factors such as age gender culture profession and income level size of audience political affiliation if any and on the occasion for or purpose of the speech Most effective speeches do not exceed 20 minutes in length After researching a topic speechwriters must prepare an outline from which the speech will be developed They should strive to maintain a clear theme throughout the speech Most speeches will have a three part structure consisting of an introduction a body and a conclusion The accepted style of contemporary American public address is natural direct low key casual and conversational This puts the listeners at ease and promotes a sense of community between the audience and speaker Punctuation should reflect the sound structure of the speech reinforcing the rhythm and pace of actual speech Clarity of expression is as important a consideration in speech grammar as rigid adherence to the rules for written law This book presents the essentials of speechwriting Preface

Presidential Speechwriting Kurt Ritter,Martin J. Medhurst,2004-03-15 The rise of the media presidency through radio

and television broadcasts has heightened the visibility and importance of presidential speeches in determining the effectiveness and popularity of the President of the United States Not surprisingly this development has also witnessed the rise of professional speechwriters to craft the words the chief executive would address to the nation Yet as this volume of expert analyses graphically demonstrates the reliance of individual presidents on their speechwriters has varied with the rhetorical skill of the officeholder himself his managerial style and his personal attitude toward public speaking The individual chapters here two by former White House speechwriters give fascinating insight into the process and development of presidential speechwriting from Franklin D Roosevelt s administration to Ronald Reagan s Some contributors such as Charles Griffin writing on Eisenhower and Moya Ball on Johnson offer case studies of specific speeches to gain insight into those presidents Other chapters focus on institutional arrangements and personal relationships rhetorical themes characterizing an administration or the relationship between words and policies to shed light on presidential speechwriting The range of presidents covered affords opportunities to examine various factors that make rhetoric successful or not to study alternative organizational arrangements for speechwriters and even to consider the evolution of the rhetorical presidency itself Yet the volume s single focus on speechwriting and the analytic overviews provided by Martin J Medhurst not only bring coherence to the work but also make this book an exemplar of how unity can be achieved from a diversity of approaches Medhurst s introduction of ten myths in the scholarship on presidential speeches and his summary of the enduring issues in the practice of speechwriting pull together the work of individual contributors At the same time his introduction and conclusion transcend particular presidents by providing generalizations on the role of speechwriting in the modern White House
