Fagan, Lawrence W. Green, 2014-11-26 Presents current and future public health professionals with a range of methods geared towards helping people make healthy choices from informing the individual to modifying the surroundings and circumstances that drive decision making From publisher description *Alcohol Research & Health*, 2006 Encyclopedia of Criminology J. Mitchell Miller, Richard A. Wright, 2013-12-17 This three volume work offers a comprehensive review of the pivotal concepts, measures, theories and practices that comprise criminology and criminal justice. No longer just a subtopic of sociology, criminology has become an independent academic field of study that incorporates scholarship from numerous disciplines including psychology, political science, behavioral science, law, economics, public health, family studies, social work, and many others. The three volume *Encyclopedia of Criminology* presents the latest research as well as the traditional topics which reflect the field's multidisciplinary nature in a single authoritative reference work. More than 525 alphabetically arranged entries by the leading authorities in the discipline comprise this definitive international resource. The pivotal concepts, measures, theories and practices of the field are addressed with an emphasis on comparative criminology and criminal justice. While the primary focus of the work is on American criminology and contemporary criminal justice in the United States, extensive global coverage of other nations' justice systems is included and the increasing international nature of crime is explored thoroughly. Providing the most up to date scholarship in addition to the traditional theories on criminology, the *Encyclopedia of Criminology* is the essential one stop reference for students and scholars alike to explore the broad expanse of this multidisciplinary field. **Alcohol, Drugs, and Driving**, 1991-04 **Research Awards Index**, 1989 **HRIS Abstracts**, 1988 Biomedical Index to PHS-supported Research, 1990 Special Report to the U.S. Congress on Alcohol and Health from the Secretary of Health and Human Services, 1997 **Social Casework**, 1989 **Treating Alcohol and Drug Abuse** Mats Berglund, Sten Thelander, Egon Jonsson, 2006-03-06 What are the most promising strategies to treat alcohol and drug abuse? What are their medical implications? Despite the enormous resources spent on treating alcoholism and drug dependence, there is still no satisfactory evaluation of their effectiveness or of the cost of the different alternatives. Programs designed to treat substance abuse should be built on a foundation of evidence based knowledge. Yet it is almost impossible to cope with the increasing amount of scientific literature. This book thus represents a guide through the myriads of articles. The most comprehensive scientific review of its kind, it presents the findings from more than 1,600 studies on the effectiveness of different treatments. The work also includes a summary of the methods available to intervene against

harmful levels of alcohol with most of the studies making use of the Diagnostic and Statistical Manual of Mental Disorders DSM system The extensive results are arranged in detailed tables which may be searched using the accompanying CD ROM Also enclosed are a quality checklist and an extensive glossary explaining more than 70 terms An invaluable tool for medical researchers clinicians and doctors as well as healthcare providers and insurers allowing them to save major resources by identifying ineffective treatments and being aware of cost effective alternatives With a foreword by Henry R Kranzler University of Connecticut USA
