The New Cambridge Bibliography of English Literature:

Volume 2, 1660-1800 George Watson, Ian R. Willison, 1971-07-02 More than fifty specialists have contributed to this new edition of volume 2 of *The Cambridge Bibliography of English Literature* The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis articulation and coordination that it has been retained in all its essentials for the new edition The task of the new contributors has been to revise and integrate the lists of 1940 and 1957 to add materials of the following decade to correct and refine the bibliographical details already available and to re shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries

Nature Peter Coates, 2013-04-26 *Nature* is a deceptively simple and ahistorical term suggesting intrinsic unchanging reality Yet nature has a history too both in terms of human attitudes and human impacts Coates outlines the major understandings of nature in the western world since classical times from nature as higher authority to its more recent meaning of threatened physical space and life forms Unlike many others this book places the history of attitudes to nature within the story of human induced changes in the material environment And few others take a supranational perspective or cross the divides between historical eras A distinctive unifying theme is Coates's interest in how green writers over the last thirty years have interpreted our past dealings with nature specifically their efforts to diagnose the roots of contemporary ecological problems and their search for ancestors He concludes with a discussion of the future of nature in the context of developments such as the new ecology global warming advances in genetic engineering and research on animal behaviour Assuming no previous knowledge *Nature* provides the reader with an accessible synthesis and introduction to some of environmental history's central features and debates confirming its status as one of the most enthralling current pursuits within historical studies This will be essential reading for second year undergraduates and above in cultural history and environmental history as well as to the general reader interested in environmental issues **The Eighteenth-century**

Background Basil Willey, 1987 *Eighteenth-century English Literature* Geoffrey Tillotson, Paul Fussell, Marshall Waingrow, 1969 A survey of prose poetry and drama from the Restoration to the beginning of the nineteenth century Treats major authors in depth but also includes lesser but important writers to give a complete picture of the century

Rethinking Nature Aurélie Choné, Isabelle Hajek, Philippe Hamman, 2017-05-18 This textbook provides an overview of different ways of conceptualising nature in epistemological terms reflecting the tensions between the polarities of humans as masters or protectors of nature or as part of or outside of nature **Protestants in an Age of Science** Theodore Dwight Bozeman, 2012-12-01 Since Princeton College and Princeton Seminary were major radii of Realist influence the conservative Presbyterianism headquartered there is an ideal choice for a case study in the American impact of Baconianism Presbyterian thinkers already committed to a synthesis of Protestant religion and Newtonian science were afforded with additional means of elaborating a doxological version of natural science and of defending it against naturalism and other enemies of Christian faith Originally published in 1977 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital

technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value **Under the Banner of Science** Maureen McNeil, 1987 **A Forgotten Christian Deist** Jan van den

Berg, 2021-07-22 This is a cultural and intellectual biography of a neglected but important figure Thomas Morgan 1671 2 1743 Educated at Bridgewater Academy he was active as Presbyterian preacher medical practitioner and one of the first who called himself a Christian Deist Morgan was not only a harbinger of the disparagement of the Old Testament but also a prolific pamphleteer about things religious and a publisher of medical books He received praise for his medical work but a negative press for his theological visions and he ended as a forgotten figure in history this book restores an overlooked writer to his due place in history It is the first modern biography of Morgan and its readership comprises historians of deism the enlightenment the eighteenth century theology and the church Presbyterianism and medical history **A Critical**
