### **Lucky Eddie Goes Sailing** Eddie

Johnson, 2012-07-17 Extracts from book Once the ship had passed we settled down to wait for the next plan to emerge Finally once we were east of the Shivering sands towers another ship came into view This ship was coming from Sheerness docks and looked as if it would pass quite a distance from us I found myself along with my father and our friend jumping up and down shouting Help were here I knew this was futile as the ship was at least a mile away and the visibility was failing and though I used to laugh when I saw this happen in films it was the only thing that we could do Incredibly the crew on the ship did see us and changed course As the ship circled us we heard a German accent calling to us Are you in da trouble we looked at each other and the boat Our first instinct was to shout back that we were all OK and that we always sailed around with a broken mast But considering our circumstances we decided not to be clever and shouted out yes and how grateful we were that the ship had come to our assistance My father had contacted the firing range and told them our estimated time of arrival before leaving home so it was no surprise that we were hours later than we anticipated It was mid summer and we were all just lying about in shorts and T shirts and there was barely a ripple on the water We were all enjoying the trip when I noticed a flash coming from Shoeburyness I turned and immediately informed my father who began to say dont be silly they know were coming unfortunately he only got as far as they know were when a thundering boom shattered a tranquil sail This as immediately followed by a gust of wind that must have pushed the boat at four knots for a couple of seconds On reaching the bank my father pulled the dingy out of the water and headed for the bridge We could clearly see him walking around the by the control tower of the bridge for about five minutes and I believe he was just about to give up and return to the boat when things got a little more exciting A military Land rover sped up towards the bridge control tower and two Military Police officers jumped out ran over to my father and promptly shoved him into the back of the Land rover They then drove off at

speed in the same direction they had come from My father did have a slight problem when putting the wheel on The fitting to fix the wheel too was round while the hole in the centre of the wheel was square To get over this obstacle he used a generous amount of plastic padding to fill the void between the wheel and the spindle We were coming up to Kings Ferry Bridge and I was at the helm and as per usual the bucket was lifted up the mast As today there was always a wait while the demigod operator who lives in the bridge decides when we are worthy enough to lift his mighty bridge Until the mast can clear the underside of the lifting bridge we would circle As we approached for our second or third turn the wheel stopped responding and as I tried in vain to will the boat to turn the wheel came off in my hands Like most of the Wharrem catamarans this boat though 34 feet did not have a proper heads and after finishing the Chinese food Mick decided he needed to use the heads Like my fathers boat prior to the rebuild the net on the front was seen as the gents My father did mumble to anyone interested that in his opinion the net looked a bit rotten but this warning fell on deaf ears Mike staggered to the bow of the boat and dropped his jeans and pants and settled into the net Joe who was not by any stretch of the imagination was standing quite close coiling a rope Suddenly the net on which Mike was sitting gave up trying to support the weight of Mick Mick vanished into the cloudy depths of the harbour when he surfaced he was immediately having problem

Shank,2012-09-17 A number of years ago now as one of my grandsons first birthday approached I thought about what to give a one year old There are a million things that will be played with for a short while then either broken or ignored I wanted to give something special something lasting something that even when older he might still enjoy Then it struck me since he likes the silly little stories I tell him upon his request that maybe I could write some cute little short stories with a moral as well just for him and any of my other grandchildren as well when shared Thats all it took to get me started Since then each year I write a little story that somehow relates to something in his life When another grandchild came along he also was added to the list of recipients of original stories When I got to thinking about it I decided there may be other grandparents that would like to spend time with their grandchild reading a little story Now a few years down the pike and I have enough for a book And so herein I offer my readers a chance to share the joy of time spent reading to a child That is why my stories were written in the first place Children go through phases as with my grandchildren there were the dinosaurs whales especially the blue whale hedge hogs puppies and gold fish Im sure you get my drift All of these fed my imagination and help to produce stories that have a connection and personal touch for both the child and me These stories are not written for children to read but rather for a loving adult to sit down with child on their lap or side by side on a shared sofa and be read to I recommend using funny voices and lots of emphasis and maybe a tickle or two at just the right moment to add flavor and a garnish to each story The giggles like sparklers on the 4th of July will shower joy in all directions and warm the heart of the one reading the story and those close by Do not be concerned about the content all the stories contained in this book are rated PG to be read by Parent or Grandparent I hope you will enjoy these short stories even more that I did writing them

tornado roared across southern Missouri southern Illinois and southwestern Indiana for many hours during the afternoon on March 18th in 1925 there was now way that people along the tornado path would know it was occurring before they could see it This was because there was no radar systems then and the National Weather Service was not able to let people know that a tornado was going to occur or that there was a tornado already occurring since they did not know much about tornadoes So the only way a person then was able to know that a tornado was occurring and it was going to hit them was when they were able to see it close to where they were and realize that it was a tornado This story shows in Franklin Hamilton and White Counties in Illinois what some people saw and what they did and what happened to them when the tornado hit them This story also has many detailed maps across the townships in Franklin Hamilton and White Counties in Illinois that show where many peoples homes many schools and churches and other things were located when they were hit by the tornado and damaged or destroyed Some of the maps also show where some people landed after they were blown well away from there home There are also some pictures in this story that shows what some homes schools and other things looked like when they were damaged or damaged by the tornado And a few of them show what they looked like before they were hit by the tornado Some of the eyewitnesses of this tornado that I net with and went on driving surveys with are shown on pictures in this book      **Taps** ,2004 This publication lists names and biographical information on graduates and former cadets who have died      Fast Eddie - In 60 Seconds He Grabbed £1.2 Million.
