Before the philosophical works of Lord Bolingbroke had appeared great things were expected from the leisure of a man who from the splendid scene of action in which his talents had enabled him to make so conspicuous a figure had retired to employ those talents in the investigation of truth Philosophy began to congratulate herself upon such a proselyte from the world of business and hoped to have extended her power under the auspices of such a leader In the midst of these pleasing expectations the works themselves at last appeared in full body and with great pomp Those who searched in them for new discoveries in the mysteries of nature those who expected something which might explain or direct the operations of the mind those who hoped to see morality illustrated and enforced those who looked for new helps to society and government those who desired to see the characters and passions of mankind delineated in short all who consider such things as philosophy and require some of them at least in every philosophical work all these were certainly disappointed they found the landmarks of science precisely in their former places and they thought they received but a poor recompense for this disappointment in seeing every mode of religion attacked in a lively manner and the foundation of every virtue and of all government sapped with great art and much ingenuity What advantage do we derive from such writings What delight can a man find in employing a capacity which might be usefully exerted for the noblest purposes in a sort of sullen labor in which if the author could succeed he is obliged to own that nothing could be more fatal to mankind than his success I cannot conceive how this sort of writers propose to compass the designs they pretend to have in view by the instruments which they employ Do they pretend to exalt the mind of man by proving him no better than a beast Do they think to enforce the practice of virtue by denying that vice and virtue are distinguished by good or ill fortune here or by happiness or misery hereafter Do they imagine they shall increase our piety and our reliance on God by exploding his providence and insisting that he is neither just nor good Such are the doctrines which sometimes concealed sometimes openly and fully avowed are found to prevail throughout the writings of Lord Bolingbroke and such are the reasonings which this noble writer and several others have been pleased to dignify with the name of philosophy If these are delivered in a specious manner and in a style above the

common they cannot want a number of admirers of as much docility as can be wished for in disciples To these the editor of the following little piece has addressed it there is no reason to conceal the design of it any longer The design was to show that without the exertion of any considerable forces the same engines which were employed for the destruction of religion might be employed with equal success for the subversion of government and that specious arguments might be used against those things which they who doubt of everything else will never permit to be questioned It is an observation which I think Isocrates makes in one of his orations against the sophists that it is far more easy to maintain a wrong cause and to support paradoxical opinions to the satisfaction of a common auditory than to establish a doubtful truth by solid and conclusive arguments When men find that something can be said in favor of what on the very proposal they have thought utterly indefensible they grow doubtful of their own reason they are thrown into a sort of pleasing surprise they run along with the speaker charmed and captivated to find such a plentiful harvest of reasoning where all seemed barren and unpromising This is the fairy land of philosophy And it very frequently happens that those pleasing impressions on the imagination subsist and produce their effect even after the understanding has been satisfied of their unsubstantial nature There is a sort of gloss upon ingenious falsehoods that dazzles the imagination but which neither belongs to nor becomes the sober aspect of truth I have met with a quotation in Lord Coke s Reports that pleased me very much though I do not know from whence he has taken it *Interdum fucata falsitas* says he *in multis est probabilior at s pe rationibus vincit nudam veritatem* In such cases the writer has a certain fire and alacrity inspired into him by a consciousness that let it fare how it will with the subject his ingenuity will be sure of applause and this alacrity becomes much greater if he acts upon the offensive by the impetuosity that always accompanies an attack and the unfortunate propensity which mankind have to the finding and exaggerating faults The editor is satisfied that a mind which has no restraint from a sense of its own weakness of its subordinate rank in the creation and of the extreme danger of letting the imagination loose upon some subjects may very plausibly attack everything the most excellent and venerable that it would not be difficult to criticise the creation itself and that if we were to examine the divine fabrics by our ideas of reason and fitness and to use the same method of attack by which some men have assaulted revealed religion we might with as good color and with the same success make the wisdom and power of God in his creation appear to many no better than foolishness There is an air of plausibility which accompanies vulgar reasonings and notions taken from the beaten circle of ordinary experience that is admirably suited to the narrow capacities of some and to the laziness of others But this advantage is in a great measure lost when a painful comprehensive survey of a very complicated matter and which requires a great variety of considerations is to be made when we must seek in a profound subject not only for arguments but for new materials of argument their measures and their method of arrangement when we must go out of the sphere of our ordinary ideas and when we can never walk surely but by being sensible of our blindness And this we must do or we do nothing whenever we examine the result of a reason which is not our own Even in matters

which are as it were just within our reach what would become of the world if the practice of all moral duties and the foundations of society rested upon having their reasons made clear and demonstrative to every individual The editor knows that the subject of this letter is not so fully handled as obviously it might it was not his design to say all that could possibly be said It had been inexcusable to fill a large volume with the abuse of reason nor would such an abuse have been tolerable even for a few pages if some under plot of more consequence than the apparent design had not been carried on

The Works of the Right Honourable Edmund Burke, Vol. 01 (of 12) Edmund Burke, 2018-07-12 The Works of the Right Honourable Edmund Burke Vol 01 of 12 by Edmund Burke Shall I venture to say my lord that in our late conversation you were inclined to the party which you adopted rather by the feelings of your good nature than by the conviction of your judgment We laid open the foundations of society and you feared that the curiosity of this search might endanger the ruin of the whole fabric You would readily have allowed my principle but you dreaded the consequences you thought that having once entered upon these reasonings we might be carried insensibly and irresistibly farther than at first we could either have imagined or wished But for my part my lord I then thought and am still of the same opinion that error and not truth of any kind is dangerous that ill conclusions can only flow from false propositions and that to know whether any proposition be true or false it is a preposterous method to examine it by its apparent consequences These were the reasons which induced me to go so far into that inquiry and they are the reasons which direct me in all my inquiries I had indeed often reflected on that subject before I could prevail on myself to communicate my reflections to anybody They were generally melancholy enough as those usually are which carry us beyond the mere surface of things and which would undoubtedly make the lives of all thinking men extremely miserable if the same philosophy which caused the grief did not at the same time administer the comfort On considering political societies their origin their constitution and their effects I have sometimes been in a good deal more than doubt whether the Creator did ever really intend man for a state of happiness He has mixed in his cup a number of natural evils in spite of the boasts of stoicism they are evils and every endeavor which the art and policy of mankind has used from the beginning of the world to this day in order to alleviate or cure them has only served to introduce new mischiefs or to aggravate and inflame the old Besides this the mind of man itself is too active and restless a principle ever to settle on the true point of quiet It discovers every day some craving want in a body which really wants but little It every day invents some new artificial rule to guide that nature which if left to itself were the best and surest guide It finds out imaginary beings prescribing imaginary laws and then it raises imaginary terrors to support a belief in the beings and an obedience to the laws Many things have been said and very well undoubtedly on the subjection in which we should preserve our bodies to the government of our understanding but enough has not been said upon the restraint which our bodily necessities ought to lay on the extravagant sublimities and eccentric roving of our minds We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have

The Works of the Right Honourable Edmund Burke, Vol. 05 of 12 by Edmund Burke

My dear Lord, The paper which I take the liberty of sending to your Grace was for the greater part written during the last session. A few days after the prorogation, some few observations were added. I was however resolved to let it lie by me for a considerable time, that on viewing the matter at a proper distance and when the sharpness of recent impressions had been worn off, I might be better able to form a just estimate of the value of my first opinions. I have just now read it over very coolly and deliberately. My latest judgment owns my first sentiments and reasonings in their full force with regard both to persons and things. During a period of four years, the state of the world except for some few and short intervals has filled me with a good deal of serious inquietude. I considered a general war against Jacobins and Jacobinism as the only possible chance of saving Europe and England as included in Europe from a truly frightful revolution. For this I have been censured as receiving through weakness or spreading through fraud and artifice a false alarm. Whatever others may think of the matter, that alarm in my mind is by no means quieted. The state of affairs abroad is not so much mended as to make me for one full of confidence. At home I see no abatement whatsoever in the zeal of the partisans of Jacobinism towards their cause, nor any cessation in their efforts to do mischief. What is doing by Lord Lauderdale on the first scene of Lord George Gordon's actions and in his spirit is not calculated to remove my apprehensions. They pursue their first object with as much eagerness as ever but with more dexterity. Under the plausible name of peace by which they delude or are deluded, they would deliver us unarmed and defenceless to the confederation of Jacobins whose centre is indeed in France but whose rays proceed in every direction throughout the world. I understand that Mr Coke of Norfolk has been lately very busy in spreading a disaffection to this war which we carry on for our being in the country in which his property gives him so great an influence. It is truly alarming to see so large a part of the aristocratic interest engaged in the cause of the new species of democracy which is openly attacking or secretly undermining the system of property by which mankind has hitherto been governed. But

we are not to delude ourselves No man can be connected with a party which professes publicly to admire or may be justly suspected of secretly abetting this French Revolution who must not be drawn into its vortex and become the instrument of its designs We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades The contents of the vast majority of titles in the Classic Library have been scanned from the original works To ensure a high quality product each title has been meticulously hand curated by our staff Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work We hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience *Edmund Burke and the Conservative Logic of Empire* Daniel O'Neill,2016-03

Edmund Burke long considered modern conservatism s founding father is also widely believed to be an opponent of empire However Daniel O Neill turns that latter belief on its head This fresh and innovative book shows that Burke was a passionate supporter and staunch defender of the British Empire in the eighteenth century whether in the New World India or Ireland Moreover and against a growing body of contemporary scholarship that rejects the very notion that Burke was an exemplar of conservatism O Neill demonstrates that Burke s defense of empire was in fact ideologically consistent with his conservative opposition to the French Revolution Burke s logic of empire relied on two opposing but complementary theoretical strategies Ornamentalism which stressed cultural similarities between civilized societies as he understood them and Orientalism which stressed the putative cultural differences distinguishing savage societies from their civilized counterparts This incisive book also shows that Burke s argument had lasting implications as his development of these two justifications for empire prefigured later intellectual defenses of British imperialism **The World's Great Orators and Their Orations** Charles Morris,1902 **The World Hunt** John F. Richards,2014-05-10

Presented here is the final and most coherent section of a sweeping classic work in environmental history The Unending Frontier The World Hunt focuses on the commercial hunting of wildlife and its profound global impact on the environment and the early modern world economy Tracing the massive expansion of the European quest for animal products The World Hunt explores the fur trade in North America and Russia cod fishing in the North Atlantic and whaling and sealing on the world s oceans and coastlands

The World's Great Masterpieces Harry Thurston Peck,1901 American Constitutionalism Heard Round the World, 1776-1989 George Athan Billias,2011-12 Winner of the 2010 Book Award from the New England Historical Association

American constitutionalism represents this country s greatest gift to human freedom yet its story remains largely untold For over two hundred years its ideals ideas and institutions influenced different peoples in different lands at different times American constitutionalism and the revolutionary republican documents on which it is based affected countless countries by helping them develop their own constitutional democracies Western constitutionalism of which America was a part along with Britain and France reached a major turning point in global history in 1989 when the forces of democracy exceeded the forces of autocracy for the first time Historian George Athan Billias traces the spread of American constitutionalism from Europe Latin America and the Caribbean region to Asia and Africa beginning chronologically with the American Revolution and the fateful shot heard round the world and ending with the conclusion of the Cold War in 1989 The American model contributed significantly by spearheading the drive to greater democracy throughout the Western world and Billias s landmark study tells a story that will change the way readers view the important role American constitutionalism played during this era **Memoir of the Life and Character of the Right Hon.
