*Educating Citizens* Patrick J. Wolf, Stephen Macedo, 2004-09-30 The United States is in the midst of historic experiments with publicly funded choice in K 12 education experiments that recently received a green light from the Supreme Court Other nations have long experience with the funding and regulation of nonpublic schools including religious schools This book asks what U S policymakers public officials and citizens can learn from these experiences In particular how do other countries regulate or structure publicly funded educational choice with an eye toward civic values looking not only for improvements in test scores but also in tolerance civic cohesion and democratic values such as integration across the lines of class religion and race The experience of Europe and Canada with school choice is both extensive and varied In England and Wales public school choice is widespread as parents play a significant role in selecting the school their children will attend In the Netherlands and much of Belgium a majority of students attend religious schools at government expense In Canada France and Germany state financed school choice is limited to circumstances that serve particular social and governmental needs In Italy school choice has just recently arrived on the policy agenda In spite of the diversity of national experiences in all of these countries choice is regulated by the government in significant and varied ways to promote civic values In several of these countries school choice policy itself appears to have played an important role in promoting social cohesion and integration This book presents a wealth of experience designed to aid policymakers and citizens as they consider historic changes in American public education policy

**Educating Citizens** Kenneth Osborne, Ken Osborne, 1988 The Canadian left

has over the years paid remarkably little attention to the actual content of education. Apart from occasional bursts of concern about militarism, sexism, racism, or anti-labour bias, the school curriculum has gone largely unquestioned. Socialist values such as cooperation, participation, personal autonomy, and a sense of community do not appear out of thin air. They have to be acquired. Conservatives and liberals have long realized this and have shaped the schools accordingly so that the capitalist ethic of competitive individualism is now strongly entrenched and is learned early in life. If the vision of cooperative commonwealth is to become a reality, then education will have an important role to play. This book is an attempt to outline what this role might be. *Educating Citizens* outlines a working class curriculum designed to prepare students for participation in a socialist democracy. **An Our Schools Our Selves book      *Educating Citizens* Charles Venegoni, 2004-09-20** The United States is in the midst of historic experiments with publicly funded choice in K-12 education, experiments that recently received a green light from the Supreme Court. Other nations have long experience with the funding and regulation of nonpublic schools, including religious schools. This book asks what U.S. policymakers, public officials, and citizens can learn from these experiences. In particular, how do other countries regulate or structure publicly funded educational choice with an eye toward civic values, looking not only for improvements in test scores but also in tolerance, civic cohesion, and democratic values such as integration across the lines of class, religion, and race? The experience of Europe and Canada with school choice is both extensive and varied. In England and Wales, public school choice is widespread as parents play a significant role in selecting the school their children will attend. In the Netherlands and much of Belgium, a majority of students attend religious schools at government expense. In Canada, France, and Germany, state-financed school choice is limited to circumstances that serve particular social and governmental needs. In Italy, school choice has just recently arrived on the policy agenda. In spite of the diversity of national experiences, in all of these countries, choice is regulated by the government in significant and varied ways to promote civic values. In several of these countries, school choice policy itself appears to have played an important role in promoting social cohesion and integration. This book presents a wealth of experience designed to aid policymakers and citizens as they consider historic changes in American public education policy. *Quick Hits for Educating Citizens* James L. Perry, Steven Jones, 2006-06-06 This volume makes the statement that democracy matters, that engagement in the community is essential to maintain our democratic values, and that civic engagement plays a significant role in educating our citizens. Sharon Hamilton and Robert Orr, Directors, Indiana University Faculty Colloquium on Excellence in Teaching, FACET. *Quick Hits for Educating Citizens* presents university faculty and administrators with ideas and strategies for integrating civic education into university curricula. Fifty-eight succinct essays from across the disciplines offer successful models of curriculum-based civic education activities and strategies for engaging students outside the classroom. Reflecting best practices as well as individual approaches to educating students for citizenship, this is an outstanding resource for university faculty in every discipline as well as administrators and students in schools of education. *Brokering Britain*,

education within and across different national contexts This book illustrates the contingency of definitions the complexities of juxtaposing demands and priorities in different educational contexts and the difficulties and tensions of asking a question that is arguably one of the most pressing of our time how should we live together in interdependent ecologies in a finite planet In the discipline of education where market imperatives and the dictatorship of effective replicable results have laid siege to independent debates this book aims to emphasize the importance of raising our intellectual game as educators to interrupt new and old problematic patterns of engagements representations uncomplicated solutions and conceptual straightjackets Contributors to this volume address the tensions between homogenizing universalisms and parochial specificisms ethnocentrisms and relativisms deficit theorizations and romanticizations of difference fantasies of supremacy and paralyse in guilt the global and the local The chapters take different approaches to map the origins meanings workings ethics politics and implications of initiatives approaches and conceptual frameworks related to the ideas of globalization citizenship and education in different sites of knowledge production This book was originally published as a special issue of *Globalisation Societies and Education* Educating the Global Environmental Citizen Greg William Misiaszek, 2017-12-15 Misiaszek examines the disconnection between critical global citizenship education models and ecopedagogy which is grounded in Paulo Freire's pedagogy Exploring how concepts of citizenship are affected by globalization this book argues that environmental pedagogues must teach critical environmental literacies in order for students to understand global environmental issues through the world's diverse perspectives Misiaszek analyses the ways environmental pedagogies can use aspects of critical global citizenship education to better understand how environmental issues are contextually experienced and understood by societies locally and globally through issues of globalization colonialism socio economics gender race ethnicities nationalities indigenous issues and spiritualities SAGE Handbook of Education for Citizenship and Democracy James Arthur, Ian Davies, Carole Hahn, 2008-07-01 This handbook brings together new work by some of the leading authorities on citizenship education and is divided into five sections The first section deals with key ideas about citizenship education including democracy rights globalization and equity Section two contains a wide range of national case studies of citizenship education including African Asian Australian European and North and South American examples The third section focuses on perspectives about citizenship education with discussions about key areas such as sustainable development anti racism gender Section four provides insights into different characterisations of citizenship education with illustrations of democratic schools peace and conflict education global education human rights education etc The final section provides a series of chapters on the pedagogy of citizenship education with discussions about curriculum teaching learning and assessment **Research in Global Citizenship Education** Jason Harshman, Tami Augustine, Merry M. Merryfield, 2015-06-01 Globalization is changing what citizens need to know and be able to do by interrupting the assumption that the actions of citizens only take place within national borders If our neighborhoods and nations are affecting and being

affected by the world then our political consciousness must be worldminded The outcomes of globalization have led educators to rethink what students need to learn and be able to do as citizens in a globally connected world This volume focuses on research that examines how K 12 teachers and students are currently addressing the challenge of becoming citizens in a globally interconnected world Although there is an extensive body of literature on citizenship education within national contexts and a growing literature on global education this volume offers research on the work educators are doing across multiple countries to bring the two fields together to develop global citizens
