Rao, 2014-06-11 The primacy of education in development agendas is unquestioned. With the gradual acknowledgement of the potential benefits that migration can hold for development the relationship between migration and education is a growing area of research. Migration Education and Socio Economic Mobility explores how the decisions people make in terms of both their migration choices and educational investments mediated as they are by gender class caste and nationality can potentially contribute to earning incomes building social and symbolic capital or reshaping gender relations all elements contributing to the process of economic and social mobility. Much of the existing literature examining the links between migration and education focuses either on the investment of migrant remittances in the education of their children back home or on brain drain that refers to the migration of skilled workers from the developing to the developed world. Most of these discussions are firmly rooted in materialist arguments and while undeniably important tend to underplay the social processes through which migration and education interact to shape people's lives identities and status in society. Along with economic security people also aspire to social mobility and status enhancement. The ideas presented in this book take a more varied and nuanced view of the relationship between education and migration. This book was originally published as a special issue of Compare A Journal of Comparative and International Education.
