

## INDIA'S EDUCATION CHALLENGE:

# Low Learning Outcomes & Underperforming Higher Education

*"Education is the most powerful weapon which you can use to change the world." — Nelson Mandela*

**I**NDIA, HOME TO 20 per cent of the world's youth population, stands at the cusp of a demographic dividend set to peak in 2041. This demographic advantage can only transform India's growth if the country's youth population is equipped with the requisite skills to enhance the country's productivity on the global stage. To empower the younger population with a high level of requisite skills, a robust and efficient education system is essential, particularly at the higher education level. In recent years, India has made significant strides in improving its access to basic education, but considerable gaps persist at the higher education level that must be addressed to fully harness this potential.

Two key factors determine an education system's effectiveness in improving a coun-

cent. This low GER at the higher secondary level further contributes to fewer people enrolling in undergraduate and post-graduate programmes, causing the GER at the higher education level to fall to just 28.40 per cent. This worrying trend is underscored by Periodic Labour Force Survey (PLFS) data, which reveals that less than 10 per cent of the population has completed a graduate degree or above. In contrast, 52.4 per cent of the Indian workforce has only primary education, and 37.8 per cent have secondary education. The low attainment of higher-level education consequently leads to most of the population being employed at low-level occupations and less high-skilled activities in the country.

Newell, 2006-08-01 Does education have any relation to theology How do the educator s worldview commitments speak to his or her practice of education James Michael Lee brought a definite answer to these questions a firm no to the relations question and an advocacy for empirical findings over and against any speculative or

theoretical positions in reply to the commitments question Lee claimed to have a universal neutral metatheory for all religious education a theory that would apply to all religious educators in any and every religion But in proposing his theory he overlooked the way that empirical facts express worldviews This book is a detective story tracing commitments that lay underneath empirical neutrality In the process the reader will see avenues that unmistakably link education to theology Education turns out to be a thoroughly worldview conditioned process This new work is essential reading for professors and students in both religious and general education Global Governance of Education Maren Elfert, Christian

Ydesen, 2023-09-22 This book examines the educational role of three international organizations created as part of the post World War II multilateral architecture the United Nations Educational Scientific and Cultural Organization UNESCO the World Bank and the Organisation for Economic Co operation and Development OECD These organizations have significantly promoted and shaped education as a fundamental feature of the modernization of society and contributed to the globalization of educational norms policies and technologies Drawing on primary source materials and interviews the book provides novel perspectives to the literature on the global governance of education by focusing on the historical entanglements relations and power struggles between these three organizations rather than treating them separately The study sheds light on the homogenizing effects of globalized educational policy making and the shifting power dynamics in the global governance of education This book makes a very distinctive and important contribution to the literature that critically analyses the influence of the global agencies on education globally it goes beyond the standard discursive analyses of policy texts to also explore the history of those organisations through archival research and in depth interviews of the key personnel What emerges is a powerful analysis which locates those agencies within their historical epochs and shines a light on their tensions and micro politics both internally and between organisations Paul Morris Professor of Comparative Education Institute of Education University College London UK A must read historical account of the intermingling boundary setting and competition between the three big intergovernmental organizations IOs in education OECD UNESCO and the World Bank Different from other scholars that document how these IOs have transformed themselves in response to external and internal changes Elfert and Ydesen draw attention to the relational aspect how have these three IOs navigated conflict carved niches and used and abused each other to amplify and expand their own mission How have they done so in an environment that is crowded with intergovernmental and international organizations each with a claim to govern education globally Gita Steiner Khamsi Professor of Comparative and International Education Teachers College Columbia University UNESCO Chair of Comparative Education Policy of the Geneva Graduate Institute of International and Development Studies This volume is a thoughtful and timely work of scholarship Understanding the roles of UNESCO the OECD and the World Bank is central to understanding contemporary education in global perspective Elfert and Ydesen s historical analysis sets out in rigorous detail how these organisations have evolved and what has shaped and driven this evolution The historical analysis is complemented by

contemporary interview data facilitating an actor level analysis as well as a broader picture The book is conceptually and theoretically rich while being accessibly written the authors manage complexity remarkably well For anyone interested in global governance and the role of international organisations or anyone who wants to understand in general how global educational agendas have developed and converged this book is a most valuable read Michele Schweisfurth Professor of Comparative and International Education University of Glasgow UK Chapter UNESCO the OECD and the World Bank A Global Governance Perspective is available open access under a Creative Commons Attribution 4.0 International License via [link.springer.com](https://link.springer.com)

President's Advisory Commission on Educational Excellence for Hispanic Americans,1992 *Higher Education for Sustainability* Kerry Shephard,2020-01-02 This book explores how higher education and sustainability interact in New Zealand and argues that higher education at present may be contributing as much to unsustainability as it does to sustainability It considers how education and higher education in particular works alongside a wide range of other life experiences to impact individuals attitudes and actions In turn it

envision a form of higher education that supports graduates to decide what their contribution to a sustainable future will be. This book addresses those aspects of higher education that are best suited to fostering the development of students' abilities and dispositions to think deeply critically and independently about the world and how higher education will know if it is on the right track if it chooses this path. **Negotiating Patriarchy and Gender in Africa** Ngozi Edeagu, Egodi Uchendu, 2021-08-26

A 2022 Choice Reviews Outstanding Academic Title. *Negotiating Patriarchy and Gender in Africa: Discourses, Practices, and Policies* examines the entrenchment of patriarchy in Africa and its attendant socioeconomic and political consequences on gender relations. The contributors analyze the historical and modern ways in which gender expectations have enabled women in African societies to be systematically abused and marginalized from unpaid labor to poor representation in decision-making areas. Exploring regions such as rural Uganda, the suburbs of Zimbabwe, the Gold Coast, South Africa, and Nigeria, contributors incorporate a wide range of academic theories and disciplines to establish the need for improved policy implementation on gender issues at both the local and national government levels in Africa.

*Educational Satellite Loan Guarantee Program Act, and Distance Learning* United States. Congress. Senate. Committee on Commerce, Science, and Transportation. Subcommittee on Science, Technology, and Space, 1996. This document presents witness testimony and supplemental materials from a Congressional hearing focused on the role of technology in promoting distance learning in the United States.
