**The Real World of College** Wendy Fischman, Howard Gardner, 2022-03-22 Why higher education in the United States has lost its way and how universities and colleges can focus sharply on their core mission For The Real World of College Wendy Fischman and Howard Gardner analyzed in depth interviews with more than 2 000 students alumni faculty administrators parents trustees and others which were conducted at ten institutions ranging from highly selective liberal arts colleges to less selective state schools What they found challenged characterizations in the media students are not preoccupied by political correctness free speech or even the cost of college They are most concerned about their GPA and their resumes they see jobs and earning potential as more important than learning Many say they face mental health challenges fear that they don't belong and feel a deep sense of alienation Given this daily reality for students has higher education lost its way Fischman and Gardner contend that US universities and colleges must focus sharply on their core educational mission Fischman and Gardner both recognized authorities on education and learning argue that higher education in the United States has lost sight of its principal reason for existing not vocational training not the provision of campus amenities but to increase what Fischman and Gardner call higher education capital to help students think well and broadly express themselves clearly explore new areas and be open to possible transformations Fischman and Gardner offer cogent recommendations for how every college can become a community of learners who are open to change as thinkers citizens and human beings

Zachary Karabell,1999-08-20 President Clinton declares that a two year education should be the right of all Americans Congress passes a 40 billion package of tax breaks and scholarships aimed at making a degree accessible to everyone Almost two thirds of high school graduates now go on to some form of higher education and yet at the same time those colleges and universities inundated with a new kind of student have been slow to respond to this revolutionary change Zachary Karabell spent over a year traveling the country interviewing students graduate students faculty and adjunct teachers and the result is a portrait of American higher education that is neither conservative nor liberal and that needs to be taken seriously There is a quiet revolution occurring that will that is changing the nature of education in this country Higher education is becoming mass education writes Karabell The crucial clash on today s campuses is not between traditionalists multiculturalists and tenured radicals but between the competing needs and desires of students professors administrators and the larger society The overwhelming majority of today s students are working class people seeking education to get a job they are not seeking a liberal education nor planning to go on to graduate school Most faculty members products of the elite graduate schools that have insulated them from the needs of real world people are often profoundly ill equipped to handle this changing student body By exploring the myriad perspectives of these conflicting expectations Karabell concludes that a radical democratization of higher education is not only inevitable it is desirable and it will require dramatic changes in the structure and presumptions about education beyond the high school level Topping 175 billion a year spending for American higher education will join health care and welfare as one of the top national issues yet there is precious little real or broad based understanding of the issues and social forces at work Eschewing any political agenda yet unafraid to ask as many questions as he answers Zachary Karabell has provided the first reasoned examination of what has become a national concern Sure to spark intense debate What s College For is a clarion call for reform *What's the Point of College?* Johann N. Neem,2019-08-13 Before we can improve college education we need to know what it s for In our current age of reform there

are countless ideas about how to fix higher education But before we can reconceptualize the college experience we need to remember why we have these institutions in the first place and what we want from them In *What's the Point of College* historian Johann N. Neem offers a new way to think about the major questions facing higher education today from online education to disruptive innovation to how students really learn As commentators reformers and policymakers call for dramatic change and new educational models this collection of lucid essays asks us to pause and take stock What is a college education supposed to be What kinds of institutions and practices will best help us get there And which virtues must colleges and universities cultivate to sustain their desired ends During this time of drift Neem argues we need to moor our colleges once again to their core purposes By evaluating reformers' goals in relation to the specific goods that a college should offer to students and society *What's the Point of College* connects public policy to deeper ethical questions Exploring how we can ensure that America's colleges remain places for intellectual inquiry and reflection Neem does not just provide answers to the big questions surrounding higher education he offers readers a guide for how to think about them

**College** Andrew Delbanco, 2014-12-28 The strengths and failures of the American college and why liberal education still matters As the commercialization of American higher

education accelerates more and more students are coming to college with the narrow aim of obtaining a preprofessional credential The traditional four year college experience an exploratory time for students to discover their passions and test ideas and values with the help of teachers and peers is in danger of becoming a thing of the past In College prominent cultural critic Andrew Delbanco offers a trenchant defense of such an education and warns that it is becoming a privilege reserved for the relatively rich In describing what a true college education should be he demonstrates why making it available to as many young people as possible remains central to America s democratic promise In a brisk and vivid historical narrative Delbanco explains how the idea of college arose in the colonial period from the Puritan idea of the gathered church how it struggled to survive in the nineteenth century in the shadow of the new research universities and how in the twentieth century it slowly opened its doors to women minorities and students from low income families He describes the unique strengths of America s colleges in our era of globalization and while recognizing the growing centrality of science technology and vocational subjects in the curriculum he mounts a vigorous defense of a broadly humanistic education for all Acknowledging the serious financial intellectual and ethical challenges that all colleges face today Delbanco considers what is at stake in the urgent effort to protect these venerable institutions for future generations In a new afterword Delbanco responds to recent developments both ominous and promising in the changing landscape of higher education

roles for students and faculty redefines educational breadth and depth and calls for deeper assessment of learning and teaching Muscatine highlights the outstanding colleges and universities including Harvard Boston University's University Professor's Program Evergreen State College and Fairhaven College at Western Washington University that have already remade their curricula successfully or adopted features like the ones he proposes Muscatine argues that the new curriculum is better able than the old to produce good scholars and good citizens for the twenty first century Beyond Free College Eileen L. Strempel, Stephen J. Handel, 2021-01-15 Beyond Free College outlines an audacious national agenda consistent with but far more comprehensive than the current free college movement that builds on the best of US higher education's populist history such as the G I Bill and the community college transfer function The authors align a wide constellation of higher education trends online learning prior learning assessment competency based learning high school college credit with a rapidly shifting student transfer environment that privileges college credit as the pivotal educational catalyst to boost access and completion The book's agenda seeks greater productive investment in postsecondary education by privileging a single metric lower cost per degree granted as the animating driver of a transfer pathway that will fulfill the potential of its historical progressive innovators Beyond Free College's goal is as simple as it is urgent To galvanize higher education advocates in an effort to reorganize reorient and reignite the transfer function to serve the needs of a neotraditional student population that now constitutes the majority of college goers in America and in ways that advance completion not just access to higher education In the Front Door Hugh Mehan, 2015-11-17 This book provides a critical analysis of the origins nature development and transformation of the state and society historically and today examining the class nature and social basis of politics and the state in different societal settings The book emphasizes the centrality of class relations in explaining political power and the role of the state in class divided societies by providing powerful theoretical and empirical analyses of themes in political sociology in an era of globalization It examines in detail the major political issues and events of our time and makes them relevant to the study of power and politics today Students from many ethnic minority backgrounds and low income families are underrepresented in American colleges and universities This book describes and assesses educational policies and practices that seek to rectify this important manifestation of structured inequality Inspired by a commitment to providing a pathway to college and beyond Mehan and his team document the innovative practices developed and implemented at the nationally recognized schools created by The Center for Research in Educational Equity Access and Teaching Excellence CREATE at the University of California San Diego the Preuss School a 6-12 charter school on the UCSD campus for underrepresented minority students and nearby schools located in economically depressed neighborhoods Based on long term research Mehan's book makes important contributions to the literature on educational achievement disparities that exist and are growing within the United States He sheds light on how we can improve public policy for the futures of secondary school students **Why Does College Cost So Much?** Robert B.
