**Elements of Quality Online Education** John R. Bourne, Janet C. Moore, 2004 In the ten years since the inception of the Sloan Consortium the field of online learning has entered the mainstream of higher education making online learning a core ingredient of tomorrow s educational paradigms Now that digital natives are coming of age the blending of on ground and online education is continuous and unstoppable Growing demands for wide choice suggest that the blended agenda presses us rapidly into new realms of inquiry Thus the title of this collection the fifth volume in the Sloan C series on quality is Elements of Quality Online Education Into the Mainstream The 14 peer reviewed studies in this volume provide guidance for effectively responding to the challenges facing higher education The studies on Student Satisfaction recognize that significant populations remain underserved Yet asynchronous learning networks ALNs are widening access by easing some of the constraints of place based synchronous learning so that many more and many more new kinds of learners can achieve satisfaction and success The studies on Learning Effectiveness share an emphasis on the ways that ALN exceeds the no significant difference minimum standard for learning outcomes The studies on blending combining face to face and online

methods for learning offer rich possibilities for what many see as the best of both learning modes. The studies on assessment go to the core of the Sloan C quality framework and its emphasis on continuous quality improvement through demonstrating progress towards the overarching goal of affordable access for all in a wide range of disciplines. In our time of profound rapid and discontinuous change, these studies envision solutions to the challenges of online, blended, and face-to-face education in higher education. Sponsored by the Alfred P. Sloan Foundation, the purpose of the Sloan Consortium Sloan C is to help learning organizations continually improve quality, scale, and breadth according to their own distinctive missions so that education will become a part of everyday life, accessible and affordable for anyone, anywhere, at any time, in a wide variety of disciplines.

**Teaching and Learning at a Distance** Michael Simonson, Susan Zvacek, 2024-01-01

Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in-service teachers and for training programs that discuss teaching distant learners or managing distance education systems. This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs. The teacher or trainer who uses this book will be able to design courses, evaluate programs, and identify issues and trends affecting the field. In this text, we take the following themes:

The first theme is the definition of distance education. Before we started writing the first edition of Teaching and Learning at a Distance, we carefully reviewed the literature to determine the definition that would be at the foundation of our writing. This definition is based on the work of Desmond Keegan but is unique to this book and has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica.

The second theme of the book is the importance of research to the development of effective courses and programs offered at a distance. The best practices presented in Teaching and Learning at a Distance are validated by scientific evidence. Certainly, there are rules of thumb, but we have always attempted to only include recommendations that can be supported by research.

The third theme of Teaching and Learning at a Distance is derived from Richard Clark's famous quote published in the Review of Educational Research, asserting that media are mere vehicles that do not directly influence achievement. Clark's controversial work is discussed in the book but is also fundamental to the book's advocacy for distance education. In other words, we authors do not make the claim that education delivered at a distance is inherently better than other ways people learn. Distance-delivered instruction is not a magical approach that makes learners achieve more.

Equivalency theory is the fourth theme of the book. Here, we present the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment. Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face-to-face classroom.

The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive; that it should cover as much of the various ways instruction is made available to distant learners as is possible. It can serve as a stand-alone source of information.
