Warring Jr., 2016-04-08 The failure of alternative and continuation schools to educate our most vulnerable adolescent populations is slowly eliminating them from our educational landscapes Millions of struggling teens lacking options are being set adrift without the necessary capabilities and without hope But recent research can provide avenues of change to lead these student populations to academic achievement Equipping educators with both the theoretical framework and a range of practical applications for program and classroom improvements *Beyond Dropping Out* provides a look into successful alternative education that will elevate academic strugglers to academic successes *Cultural Journeys in Higher Education* Jan Bamford, Lucie Pollard, 2019-06-27 This book focuses on student cultural diversity in HE and assesses how cultural difference affects students education and social experience The authors use interviews to look at these issues from both the perspective of international students and culturally diverse home populations **Digitalization and Women's Rights** Muharrem Kılıç, Sezer Bozkuş Kahyaoğlu, 2025-10-20 Technological advancements frequently hinder the progress of women in the business sphere In our current landscape the rapid evolution of technology driven by digital transformation has created significant barriers to women's participation This has given rise to new forms of discrimination that often go unacknowledged and unaddressed The unfortunate reality is that this issue is sidelined in discussions about the economy and broader implications for employment We must recognize and confront the unique challenges women face in this technological age as their exclusion not only impacts them but also stifles innovation and growth in our economy It is time to advocate for a more inclusive approach that empowers women in the tech world In this vital context it is essential to

recognize the discrimination and emerging challenges that women will face although these issues may not have been previously explored in sufficient detail This work has been thoughtfully created to fill that gap serving as a crucial reference about these matters By shedding light on existing gaps in the research this book promises to enrich future studies and provide invaluable insights for researchers who investigate and evaluate related works One of the most pressing challenges ahead for women in the rapidly evolving digital landscape is understanding and navigating the economic opportunities available to them As we enter this new era women will undergo a transformative journey that demands adaptability and learning in the face of continuous innovation This work aspires to contribute significantly to these conversations and empower women as they embrace the future

 Christopher Day, Qing Gu, 2013-12-17 This book unpicks the complex dynamic blend of individuals psychological and professional assets workplace conditions and leadership support which enable teachers who stay in teaching to continue to make a difference in their careers regardless of shifts in policy workplace professional and personal circumstances Whilst much has been written over the years about teacher stress and burnout there is very little research which reports on the conditions which are essential for teachers to sustain their commitment and effectiveness over their professional lives in contexts of challenge and change Drawing upon a range of educational psychological socio cultural and neuro scientific research together with vivid accounts from teachers in a variety of primary and secondary schools internationally and from their own research on teachers work and identities the authors discuss the dynamic nature forms and practices of teacher resilience They argue that resilience in teachers is not only their ability to bounce back in extremely adverse circumstances but that it is the capacity of teachers for everyday resilience which enables them to sustain their commitment and

effectiveness in responding positively to the unavoidable uncertainties inherent of their professional lives The authors conclude that resilience in teachers can be nurtured by the intellectual social and organisational environments in which teachers work and live rather than being simply a personal attribute or trait determined by nature Resilient Teachers Resilient Schools will be of key interest to policy makers head teachers teachers and training and development organisations who wish to improve quality and standards in schools *Revista de educación nº 370.
