Educational Media and Technology Yearbook, 1991 Brenda Branyan-Broadbent, R. Kent Wood, 1991-09 *Educational Media and Technology Yearbook 2006*

Robert Maribe Branch, Michael Orey, V. J. McClendon, 2006-03-30 The 2006 volume of the 31 year old Educational Media and Technology Yearbook series continues the legacy of its predecessors It highlights the major trends of the previous year noting both renewed interest in multicultural perspectives and the ever growing interest in online learning It discusses advances in the school and library media worlds which continue to reel from budget cuts and hiring freezes It profiles two outstanding individuals Michael Molenda Associate Professor Instructional Systems Technology Indiana University Bloomington and Ron Oliver Foundation Professor of Interactive Multimedia Edith Cowan University Perth Western Australia It also identifies instructional technology related organizations and graduate programs in North America The book concludes with a mediagraphy of journals books ERIC documents journal articles and nonprint resources As a repository of so much valuable data and information it is quite simply a volume no self respecting media and technology professional should be without Catalog of ERIC Clearinghouse Publications, 1995 The Evolution of American Educational Technology Paul Saettler, 2004-03-01 The primary purpose of this book is to trace the theoretical methodological foundations of American educational technology It must be emphasized that this work is essentially as history of the process of educational technology rather than of products in the form of devices or media Although media have played an important role in educational technology the reader should not lose sight of the central process which characterizes and underlies the true historical meaning and function of educational technology Moreover the assumption is made that all current theory methodology and practice rests upon the heritage of the past Indeed a common problem in the field has been the failure in many instances to take adequate account of past history in planning for the present or the future A related purpose of this book is to provide a selective survey of research in educational technology as it relates to the American public schools Such research reviews are not intended to be comprehensive but were included because of their historical importance and their relevance in understanding the process of educational technology **Leading Research in Educational Administration** Michael DiPaola, Patrick B. Forsyth, 2011-06-01 Leading Research in Educational Administration A Festschrift for Wayne K Hoy is the tenth in a series on research and theory dedicated to advancing our understanding of schools through empirical study and theoretical analysis that was initiated by Wayne and Cecil G Miskel This tenth anniversary edition honors and celebrates the research leadership Wayne has provided in the field of educational administration through his distinguished career The festschrift is organized around the analysis of school contexts and includes constructs Wayne and his protégés have studied and researched climate trust efficacy academic optimism organizational citizenship and mindfulness It concludes with the work of colleagues on the salient contemporary issues of innovation power leadership succession and several others focused on improving schools Chapter authors all have close connections to Wayne former students and their students as well as colleagues and friends **Learning From Media 2nd Ed.** Richard E. Clark, 2012-06-01 Richard Clark's observation that media are mere vehicles that deliver instruction but do not influence student achievement any more than the truck that

delivers our groceries causes changes in our nutrition is as misunderstood today as it was when first published in the Review of Educational Research in 1983 The convincing if little read scientific evidence presented by Clark has divided the field and caused considerable concern especially among the providers of newer media for learning A collection of writings about the media effects debate as it has come to be called was published in 2001 Edited by Clark Learning From Media was the first volume in the series Perspectives in Instructional Technology and Distance Education The series editors are convinced that the writings of Clark and those who take issue with his position are of critical importance to the field of instructional technology Thus a revised second edition of Learning From Media is now being offered The debate about the impact of media on learning remains a fundamental issue as new mediated approaches to teaching and learning are developed and Clark s work should be at the center of the discussion The critical articles on both sides of this debate are contained in Learning From Media 2nd Edition
