Educating Tomorrows Valuable Citizen:

Educating Tomorrow's Valuable Citizen Joan N. Burstyn, 1996-01-01 The authors discuss the dilemmas that face those who would educate tomorrow's valuable citizens and describe the day to day commitment needed to maintain a community. Important questions are asked: How do our public schools educate children to become members of our particular public? What problems face citizens of a democracy committed to both pluralism and equity? How has the meaning of citizenship changed as our society has evolved? In a world made interdependent through technology, how can one best define citizenship? The book's various perspectives provide guidelines for action through examples of current programs, and the reader is invited to join new forums to discuss questions raised in forums that allow for heated but civil disagreement. Only by engaging in such discussions can a public consensus be reached on the best ways to educate for tomorrow. Contributors include John Covalleskie, Ellen Giarelli, James Giarelli, Jerilyn Fay, Kelle Thomas, Mauhs Pugh, Barbara McEwan, Mary B. Stanley, Donald Warren, and Zeus Yiamouyiannis.

Resources in Education, 1997 *Education with Character* James Arthur, 2003 Education with character is the latest buzzphrase, but until now there's been no real consensus on some of the key issues. This book addresses the gap by adopting a cross-disciplinary approach to the matters in hand.

Preventing Violence in Schools Joan N. Burstyn, Geoff Bender, Ronnie Casella, Howard W. Gordon, Domingo P. Guerra, 2001-04 Examines the complex problem of school violence using qualitative ethnographic data from observations, individual interviews, focus groups, as well as published data. Analyzes violence prevention programs, assesses their effectiveness.

Active Citizenship Education for a Better Tomorrow Oliver Holz, Katrijn D?Herdt, Dorien Sampermans, 2025 This publication offers a reflection on citizenship education in Europe. By bringing together experts from various countries, it illustrates how historical events, national contexts, and European policies shape the way citizenship is taught in schools. Global events such as the migration crisis and the increasing ongoing environmental issues have demanded and continue to demand international responses. These changes and crises influence identities, provoke us to ask what

citizenship means in our societies and lead us to question how citizenship education is perceived today Countries can no longer solely focus on national values rather they now emphasize international democratic values and encourage citizens to develop the knowledge skills and attitudes necessary to become active and critical members of society Bringing together an overview of citizenship education opportunities and challenges this book provides substantial food for thought and helps us to better understand the international perspective on citizenship education Each chapter of the book provides a synthesis of how citizenship education is organized within specific national contexts Furthermore the results of a comparative study on citizenship in Flanders Belgium Czech Republic Greece The Netherlands Spain and Turkey is illustrated in this publication

Research Review for School Leaders William G. Wraga, Peter S. Hlebowitsh, Founding Editor Tanner, Daniel Tanner, 2012-08-06 The Research Review for School Leaders Volume III is specifically designed as a practical resource for school leaders whose schedules preclude opportunities to locate and review key research on every issue they must address It places comprehensive current and accessible reviews of educational research at their fingertips and is organized to make the research and practices it summarizes useful to them in their professional endeavors This is the third volume of the Review Although the title has changed its purpose and substance is continuous with the work of the earlier volumes The first Annual Review of Research for School Leaders 1996 summarized research on the status of public schooling interdisciplinary curriculum and educational applications of computers The second volume 1998 addressed the topics of middle level education the extracurriculum mathematics education reform and drop outs The present Volume III offers educational leaders reviews of research on five timely educational issues citizenship education multicultural education gifted and talented education classroom assessment and scheduling A basic premise of this volume is that to make sound decisions professionals need to be up to date on current research related to the problems with which they grapple A second premise is that research cannot simply be imposed in a formulaic way on a local setting the nature of the particular problem to be solved will always bear upon the relevance of research to a specific context Thus this volume is envisioned as a helpful resource for school leaders as they engage in important discussions of the research with teachers school board members parents and other interested parties as they collaboratively seek effective resolutions to local educational problems

Learning Democracy Brian M. Puaca, 2009 Scholarship on the history of West Germany's educational system has traditionally portrayed the postwar period of Allied occupation as a failure and the following decades as a time of pedagogical stagnation Two decades after World War II however the Federal Republic had become a stable democracy a member of NATO and a close ally of the West Had the schools really failed to contribute to this remarkable transformation of German society and political culture This study persuasively argues that long before the protest movements of the late 1960s the West German educational system was undergoing meaningful reform from within Although politicians and intellectual elites paid little attention to education after 1945 administrators teachers and pupils initiated significant changes in schools at the

local level The work of these actors resulted in an array of democratic reforms that signaled a departure from the authoritarian and nationalistic legacies of the past The establishment of exchange programs between the United States and West Germany the formation of student government organizations and student newspapers the publication of revised history and civics textbooks the expansion of teacher training programs and the creation of a Social Studies curriculum all contributed to the advent of a new German educational system following World War II The subtle incremental reforms inaugurated during the first two postwar decades prepared a new generation of young Germans for their responsibilities as citizens of a democratic state

Dissent, Injustice, and the Meanings of America Steven H. Shiffrin, 2000-07-30

Americans should not just tolerate dissent They should encourage it In this provocative and wide ranging book Steven Shiffrin makes this case by arguing that dissent should be promoted because it lies at the heart of a core American value free speech He contends however that the country s major institutions including the Supreme Court and the mass media wrongly limit dissent And he reflects on how society and the law should change to encourage nonconformity Shiffrin is one of the country s leading first amendment theorists He advances his dissent based theory of free speech with careful reference to its implications for such controversial topics of constitutional debate as flag burning cigarette advertising racist speech and subsidizing the arts He shows that a dissent based approach would offer strong protection for free speech he defends flag burning as a legitimate form of protest for example but argues that it would still allow for certain limitations on activities such as hate speech and commercial speech Shiffrin adds that a dissent based approach reveals weaknesses in the approaches to free speech taken by postmodernism Republicanism deliberative democratic theory outsider jurisprudence and liberal theory Throughout the book Shiffrin emphasizes the social functions of dissent its role in combating injustice and its place in cultural struggles over the meanings of America He argues for example that if we took a dissent based approach to free speech seriously we would no longer accept the unjust fact that public debate is dominated by the voices of the powerful and the wealthy To ensure that more voices are heard he argues the country should take such steps as making defamation laws more hospitable to criticism of powerful people loosening the grip of commercial interests on the media and ensuring that young people are taught the importance of challenging injustice Powerfully and clearly argued Shiffrin s book is a major contribution to debate about one of the most important subjects in American public life

Educational Foundations Brian W. Dotts, 2018-11-29

This educational foundations book offers a comprehensive overview of American education history and a variety of classical Enlightenment and contemporary educational philosophers While Educational Foundations includes a history of American education it also looks at numerous policies constitutional law cases events and political religious and social conflicts for students to consider while learning their subject matter The text is divided into two sections the first is a look at a broad array of philosophical influences from the Western canon while the second is an exploration of the history of American education focusing on a few specific eras With strong and helpful pedagogical features and resources such as class

activities suggested files chapter objectives and sidebar questions this textbook is an excellent resource for students It is useful for undergraduate and graduate courses in educational foundations *Resources in Education* ,1997 **Journal of Education** ,1918 **School Library Media Programs in Action** Gail Bush,2009 As Gail Bush reports each section of this monograph includes articles that invite the reader to explore his or her own response to the authors messages The purpose here is not to set in stone principles and practices to be followed blindly but to present a disposition toward intellectual behaviors that seriously consider our responsibilities and actions as educators in a democratic society And Ms Bush has pulled articles to do just that from Knowledge Quest AASL s official highly respected journal on school library media programs You will find topics addressing the big picture of civic engagement equity democracy and social justice and of course best practices *The Best Books for Academic Libraries: Political science, law, education* ,2002 Books recommended for undergraduate and college libraries listed by Library of Congress Classification Numbers Baltimore Bulletin of Education ,1929 **Choice** ,1997 *International Journal of Religious Education* ,1924 **Philosophy of Education** Philosophy of Education Society (U.S.),1999 **The Journal of Arkansas Education** Everett Brackin Tucker,H.
