Pedagogy, Oppression and Transformation in a 'Post-Critical' Climate Andrew O'Shea, Maeve O'Brien, 2011-09-22 Pedagogy Oppression and Transformation in a Post Critical Climate provides an urgent reflection on Freire's work in particular his central principles of pedagogy and praxis offering a variety of critical responses from philosophical sociological and egalitarian perspectives The editors explore whether Freire's revolutionary work has stood the test of time and its relevance to educational discourses today discourses that frequently contest the ontological and historical aspects of human development While Freire's work emerged as a response to the problem of providing a transformative educational praxis for justice and equality within a specific cultural and economic milieu Pedagogy Oppression and Transformation in a Post Critical Climate seeks to explore the value and possibilities of transformative praxis in perpetually diverse educational settings and within an increasingly divided globalised world By building on the earlier emancipatory approach of Freire's Pedagogy of the Oppressed it creates an international conversation between academics educational practitioners and community activists for a new generation [The Routledge International Handbook of Critical Education](#) Michael W. How Interval and Fuzzy Techniques Can Improve Teaching Olga Kosheleva, Karen Villaverde, 2017-10-23 This book explains how to teach better and presents the latest research on processing educational data and presents traditional statistical techniques as well as probabilistic interval and fuzzy approaches Teaching is a very rewarding activity it is also a very difficult one because it is largely an art There is a lot of advice on teaching available but it is usually informal and is not easy to follow To remedy this situation it is reasonable to use techniques specifically designed to handle such imprecise knowledge the fuzzy logic techniques Since there are a large number of statistical studies of different teaching techniques the authors combined statistical and fuzzy approaches to process the educational data in order to provide insights into improving all the stages of the education process from forming a curriculum to deciding in which order to present the material to grading the assignments and exams The authors do not claim to have solved all the problems of education Instead they show using numerous examples that an innovative combination of different uncertainty techniques can improve teaching The book offers teachers and instructors valuable advice and provides researchers in pedagogical and fuzzy areas with techniques to further advance teaching

Human Rights Education and the Politics of Knowledge Joanne Coysh,2017-02-24 Around the world there are a myriad of NGOs using human rights education HRE as a tool of community empowerment with the firm belief that it will help people improve their lives One way of understanding these processes is that they translate universal human rights speak using messages and symbols which make them relevant to people s daily lives and culturally resonant However an alternative more radical perspective is that these processes should engage individuals in modes of critical inquiry into the

ways that that existing power structures maintain the status quo and control not only how we understand and speak about social inequality and injustice but also act on it This book is a critical inquiry into the production distribution and consumption of HRE and how the discourse is constructed historically socially and politically through global institutions and local NGO practice The book begins with the premise that HRE is composed of theories of human rights and education both of which are complex and multifaceted However the book demonstrates how over time a dominant discourse of HRE constructed by the United Nations institutional framework has come to prominence and the ways it is reproduced and reinforced through the practice of intermediary NGOs engaged in HRE activities with community groups Drawing on socio legal scholarship it offers a new theoretical and political framework for addressing how human rights pedagogy knowledge and power can be analysed between the global and local by connecting the critical but well trodden theories of human rights to insights on critical pedagogy It uses critical discourse analysis and ethnographic research to investigate the practice of NGOs engaged in HRE using contextual evidence and findings from fieldwork with NGOs and communities in Tanzania
