Education In Retrospect Policy And Implementation Since 199:

Education in Retrospect Andre Kraak, Michael F. D. Young, 2001 The Institute of Education has been closely involved with post apartheid developments in education policy in South Africa The book examines the current policy dilemmas in South Africa It also provides a sophisticated exploration of the tensions that can occur between and among policy makers and policy researchers as a local vision is translated into reality in a global context At the same time the book provides clear evidence of the value as well as the difficulty of continuing dialogue between these groups which might usefully be heeded in those countries where such interaction too rarely takes place *Higher Education Pathways* Paul Ashwin, M.

Case, 2018-12-13 In what ways does access to undergraduate education have a transformative impact on people and societies What conditions are required for this impact to occur What are the pathways from an undergraduate education to the public good including inclusive economic development These questions have particular resonance in the South African higher education context which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent Higher education is recognised in core legislation as having a distinctive and crucial role in building post apartheid society Undergraduate education is seen as central to addressing skills shortages in South Africa It is also seen to yield significant social returns including a consistent positive impact on societal institutions and the development of a range of capabilities that have public as well as private benefits This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues

International Handbook of Technology Education, 2006-01-01 This first volume in the International Technology Education Series offers a unique worldwide collection of national surveys into the developments of Technology Education in the past two decades For twenty two countries from five continents the major changes of this school subject are described by experts that have been involved in these changes for many years themselves The studies deal with national curricula teacher education programs educational research into effects of Technology Education and practical issue at classroom level After the 15th International Pupils Attitude Towards Technology conference which was held in Haarlem in April 2005 a distinguished group of scholars from the area of Technology Education decided that after 20 years it was time to give account of the state of the art in this area This book should be of interest to students teachers researchers and policy makers who are involved in technology education

Re-imagining Academic Staff Development Lynn Quinn, 2012-11-01 Re-imagining Academic Staff Development Spaces for Disruption a book with a strong commitment to social transformation is a welcome addition to the field of academic development studies South Africa may have unique social challenges but in highlighting higher education's central role in responding to them this book reminds academic developers everywhere of the intrinsic politicalness of our work In a series of theoretically diverse chapters all written by members of the Centre for Higher Education Research Teaching and Learning at Rhodes University we are provoked to reconsider the meaning of our

practice and why we do it An enlivening read Barbara Grant The University of Auckland New Zealand **The Routledge International Handbook of Teacher and School Development** Christopher Day, 2012-06-25 The International Handbook of Teacher and School Development brings together a collection of research and evidence based authoritative writings which focus on international teacher and school development Drawing on research from eighteen countries across seven continents the forty chapters are grouped into ten themes which represent key aspects of teacher and school development Issues of Professionalism and Performativity What Being an Effective Teacher Really Means Reason and Emotion in Teaching Schools in Different Circumstances Student Voices in a Global Context Professional Learning and Development Innovative Pedagogies School Effectiveness and Improvement Successful Schools Successful Leader Professional Communities their practices problems possibilities Each theme expertly adds to the existing knowledge base about teacher and school development internationally They are individually important in shaping and understanding an appreciation of the underlying conditions which influence teachers and schools both positively and negatively and the possibilities for their further development This essential handbook will be of interest to teacher educators researchers in the field of teacher education and policy makers

Selling Out Education Stephanie Allais, 2014-08-07 Selling Out Education argues that basing education policy on qualifications and learning outcomes dramatized by the phenomenal expansion of qualifications frameworks is misguided Qualifications frameworks are intended to make education more responsive to the needs of economies and societies by improving how qualifications and credentials are used in labour markets But using learning outcomes as the starting point of education programmes neglects the core purpose of education giving people access to bodies of knowledge they would not otherwise have Furthermore instead of creating demand for skilled workers through industrial and economic policy qualifications frameworks are premised on the flawed idea that a supply of skilled workers leads to industrial and economic development And skilled workers are to be supplied not by encouraging governments to focus attention on creating improving and supporting education institutions but by suggesting that governments take a quality assurance role As a result in poor countries where provision is weak to start with qualifications have been created and institutions established to monitor providers without increasing or improving education provision The weaknesses of many current policy approaches make clear Allais argues that education is inherently a collective good and that the acquisition of bodies of knowledge provide the basis for its integrity and intelligibility **State of the Nation** John Daniel, Adam Habib, Roger Southall, 2003

This anthology provides insightful political analysis of post apartheid South Africa Written by leading South African intellectuals these analyses cover topics such as unemployment trade unionism race relations land reform education international relations and the South Africanisation of the African economy Within each work the inherited apartheid legacy the policies introduced to overcome those legacies and the effectiveness of those policies are addressed *Higher Education in the BRICS Countries* Simon Schwartzman, Rómulo Pinheiro, Pundy Pillay, 2015-03-24 In spite of the increasing

attention attributed to the rise in prominence of the BRICS Brazil Russia India China and South Africa countries few studies have looked at the ways in which broader social expectations with respect to the role of higher education across the BRICS have changed or not in recent years Our point of departure is that contrary to the conventional wisdom focusing on functionalistic perspectives higher education systems are not just designed by governments to fulfill certain functions but have a tendency for evolving in a rather unpredictable fashion as a result of the complex interplay between a number of internal and external factors In reality national higher education systems develop and change according to a complex process that encompasses the expectations of governmental agencies markets the aspirations of the population for the benefits of education the specific institutional traditions and cultures of higher education institutions and increasingly so the interests and strategies of the private firms entering and offering services in the higher education market This basically means that it is of outmost importance to move away from conceiving of universities or higher education as single monolithic actors or sector One way of doing this is by investigating a selected number of distinct but nonetheless interrelated factors or drivers which taken together help determine the nature and scope of the social compact between higher education its core actors and institutions and society at large government industry local communities professional associations

Language, Knowledge and Pedagogy Frances Christie, 2009-02-01 This book explores the nature of knowledge language and pedagogy from the perspective of two complementary theories systemic functional linguistics and Bernstein inspired sociology Bernstein's sociology of knowledge makes a distinction between horizontal and vertical discourses as ways in which knowledge is transmitted in institutional settings with teachers as agents of symbolic control Systemic functional linguists have explored educational discourse according to similar hierarchies and by bringing the two perspectives together this book shows the impact of language on knowledge and pedagogy The contributors examine the different structures of knowledge and the flow of information within the school context but also according to language in early childhood literacy English the social sciences science and mathematics The result is a progressive and dynamic analysis of knowledge structures at work in educational institutions *Language Knowledge and Pedagogy* makes a major contribution to linguistics applied linguistics and educational theory It will be of interest to researchers working in these areas

Social Policy in Sub-Saharan African Context J. Adésinà, 2007-07-12 This volume reviews Africa's past experiences of social policy with an eye on the future Contributions examine a range of social policy issues around healthcare education the labour market and social welfare and highlight important conceptual and policy issues for rebuilding Africa

The Politics of Knowledge in Education Elizabeth Rata, 2012-05-23 This book explores the decline of the teaching of epistemic conceptual knowledge in schools its replacement with everyday social knowledge and its relation to changes in the division of labor within the global economy It argues that the emphasis on social knowledge in postmodern and social constructionist pedagogy compounds the problem and examines the consequences of these changes for educational opportunity and democracy itself

International Handbook of

Comparative Education Robert Cowen, Andreas M. Kazamias, 2009-08-22 A big project like this Handbook means that you incur debts and not only to your authors and your publisher As editors we along with our colleague Elaine Unterhalter who edited the section on postcolonialism would like to thank most warmly those authors who delivered on time and who did not fuss but just got on and did a r rate job We would also like to thank all authors who did deliver which was almost everyone we asked We know that some of our authors worked in very dif cult private circumstances as they were nishing their chapters and we hope the publication of the Volumes will later be for them a happy reminder of dif culties and disasters overcome The only sad theme is that some very close colleagues with whom we were wo ing and for whom we had the greatest respect and liking became very ill and died while the volumes were being prepared We decided to ask for copyright permissions to publish something of theirs These permissions were graciously given by two major journals and with the agreement also of our publishers Springer Rolland Paulston and Terry McLaughlin have examples of their writing in this Handbook

World Yearbook of Education 2011 Lyn Yates, Madeleine Grumet, 2011-02-01 How do curriculum conceptions of knowledge and the schooling experiences of young people engage the great issues of this tumultuous time Curriculum is always influenced by the events that shape our world but when testing and bench marking preoccupy us we can forget the world that is both the foundation and the object of curriculum This edited volume brings together international contributors to analyze and reflect on the way the events of the last decade have influenced the curriculum in their countries As they address nationalism in the face of economic globalisation the international financial crisis immigration and the culture of diaspora they ask how national loyalties are balanced with international relationships and interests They ask how the rights of women and of ethnic and racial groups are represented They ask what has changed about history and civics post 9 11 and they ask how countries that have experienced profound political and economic changes have addressed them in curriculum These interactions and changes are a subject of particular interest for an international yearbook in that they are almost always permeated by global movements and influenced by multinational bodies and practices And as these essays show in curriculum global and international issues are explicitly or implicitly also about local and national interests and about how citizens engage their rights and responsibilities This volume brings together a new approach to perspectives on curriculum today and a new collection of insights into the changes from different parts of the world which discuss How is the world represented in curriculum How do responses to world events shape the stories we tell students about who they are and can be This book will be of great benefit to educational researchers and policy makers as well as undergraduate and postgraduate students

Knowledge, Power and Educational Reform Rob Moore, Madeleine Arnot, John Beck, Harry Daniels, 2006-10-16 Selected writings from an international team of scholars highlighting the contribution made to the field of educational policy and educational policy research by Basil Bernstein s work on the sociology of pedagogy

Doctoral Education in South Africa Nico Cloete, Johann Mouton, 2015-12-08 Worldwide in Africa and in South Africa the importance of the doctorate has

increased disproportionately in relation to its share of the overall graduate output over the past decade This heightened attention has not only been concerned with the traditional role of the PhD namely the provision of future academics rather it has focused on the increasingly important role that higher education and particularly high level skills is perceived to play in national development and the knowledge economy This book is unique in the area of research into doctoral studies because it draws on a large number of studies conducted by the Centre of Higher Education Trust CHET and the Centre for Research on Evaluation Science and Technology CREST as well as on studies from the rest of Africa and the world In addition to the historical studies new quantitative and qualitative research was undertaken to produce the evidence base for the analyses presented in the book The findings presented in Doctoral Education in South Africa pose anew at least six tough policy questions that the country has struggled with since 1994 and continues to struggle with if it wishes to gear up the system to meet the target of 5 000 new doctorates a year by 2030 Discourses framed around the single imperatives of growth efficiency transformation or quality will not however generate the kind of policy discourses required to resolve these tough policy questions effectively What is needed is a change in approach that accommodates multiple imperatives and allows for these to be addressed simultaneously

Implementing National Qualifications Frameworks Across Five Continents Michael Young, Stephanie Matseleng Allais, 2016-04-08 This book assesses the impact and implementation of national qualifications frameworks in sixteen different countries It presents two major lessons for policy makers thinking of introducing a National Qualifications Framework NQF First that an NQF is only a way of framing existing provision it cannot on its own lead to the acquisition of skills or knowledge Second as an attempt to standardize learning something that is only to a limited extent standardizable NQFs have disadvantages as well as advantages The research was funded by the International Labour Organization ILO and the European Training Foundation ETF and partly as a result of the ILO ETF Report the Editors were asked by the World Bank to help them in advising the government of India on introducing a NQF for vocational qualifications Building on the findings of the report the editors of this book presented an NQF implementation strategy to the Government of India on behalf of the World Bank It laid out the steps and stages that would be involved and took account of the earlier experiences of introducing an NQF Although this strategy was prepared specifically for the Government of India others who have read it felt it deserved wider circulation The report has therefore been included in this volume Since this research was undertaken the number countries especially developing countries implementing or introducing a NQF has continued to increase This book will be of interest to policy makers and researchers This book was originally published as a special issue of the Journal of Education and Work

International Perspectives on Teaching Excellence in Higher Education Alan Skelton, 2013-05-13 There has been an explosion of interest in teaching excellence in higher education Once labelled the poor relation of the research teaching divide teaching is now firmly on the policy agenda pressure on institutions to improve the quality of teaching has never been greater and significant funding seeks to promote teaching excellence in higher education

institutions This book constitutes the first serious scrutiny of how and why it should be achieved International perspectives from educational researchers award winning teachers practitioners and educational developers consider key topics including policy initiatives research led teaching teaching excellence and scholarship the significance of academic disciplines research into teaching excellence rewarding through promotion inclusive learning and ICT Teaching Excellence in Higher Education provides a guide for all those supporting promoting and trying to achieve teaching excellence in higher education and sets the scene for teaching excellence as a field for serious investigation and critical enquiry South African Social Attitudes Udesch Pillay,Benjamin Roberts,Stephen P. Rule,2006 A country s attitudinal profile is as much a part of its social reality as are its demographic make up its culture and its distinctive social patterns It helps to provide a nuanced picture of a country s circumstances its continuities and changes its democratic health and how it feels to live there It also helps to measure the country s progress towards the achievement of its economic social and political goals based on the measurement of both objective and subjective realities South African Social Attitudes Changing Times Diverse Voices is a new series aimed at providing an analysis of attitudes and values towards a wide range of social and political issues relevant to life in contemporary South African society As the series develops we hope that readers will be able to draw meaningful comparisons with the findings of previous years and thus develop a richer picture and deeper appreciation of changing South African social values This the first volume in the series presents the public s responses during extensive nation wide interviews conducted by the HSRC in late 2003 The findings are analysed in three thematic sections the first provides an in depth examination of race class and politics the second gives a critical assessment of the public s perceptions of poverty inequality and service delivery and the last explores societal values such as partner violence and moral attitudes South African Social Attitudes is essential reading for anyone seeking a guide to contemporary social or political issues and debates It should prove an indispensable tool not only for government policy makers social scientists and students but also for general readers wishing to gain a better understanding of their fellow citizens and themselves **Pedagogic Rights and Democratic**

Education Philippe Vitale,Beryl Exley,2015-07-24 The basis of Bernstein s sociology of education lays in is his theorisation of the different approaches to curriculum pedagogy and assessment and the implications for pedagogic rights and social justice This edited collection presents 15 empirical case studies and theoretical accounts from 22 international scholars who focus on the experiences of students and teachers in contexts marked by economic social cultural linguistic and or geographic diversity Located in systems of education in Australia France Germany Greece Portugal South Africa and the United States each chapter contributes to a better understanding of the conditions of a democratic education across time and place

Understanding Higher Education Chrissie Bowie,Sioux McKenna,2021-08-23 Drawing on the South African case this book looks at shifts in higher education around the world in the last two decades In South Africa calls for transformation have been heard in the university since the last days of apartheid Similar claims for quality higher education to be made

available to all have been made across the African continent In spite of this inequalities remain and many would argue that these have been exacerbated during the Covid pandemic Understanding Higher Education responds to these calls by arguing for a social account of teaching and learning by contesting dominant understandings of students as decontextualised learners premised on the idea that the university is a meritocracy This book tackles the issue of teaching and learning by looking both within and beyond the classroom It looks at how higher education policies emerged from the notion of the knowledge economy in the newly democratic South Africa and how national qualification frameworks and other processes brought the country more closely into conversation with the global order The effects of this on staffing and curriculum structures are considered alongside a proposition for alternative ways of understanding the role of higher education in society
