modern model of organic change is not necessarily linear uniform measured and determined but is one of emergence and growth made possible by interaction transaction disequilibrium and consequent equilibrium Transformation not a set course the book argues should be the rule and open endedness is an essential feature of the post modern framework In the book the author envisages a curriculum in which the teacher s role is not causal but transformative The curriculum is not the race course but the journey itself metaphors can be more useful than logic in generating dialogue in the community and educative purpose planning and evaluation is flexible and focused on process not product Scholarly yet direct and to the point Doll s ideas make sense to front line educators in the real world of today s schools Kenneth Graham Seaford Union Free School District

Whitehead and Philosophy of Education Malcolm D. Evans, 2021-10-25 That process philosophy can be the foundation of the theory and practice of educating human beings is the main argument of this book

The process philosophy of Alfred North Whitehead 1861 1947 is the particular thinking on which this book is based Readers are shown that Whitehead s process philosophy provides a frame a conceptual matrix that addresses their concerns about education and offers direction for their educative acts Whitehead theorized that all living entities are connected in some way Relatedness connectedness and holism are recurring themes in this exploration of Whitehead s implied philosophy of education Whitehead never wrote a philosophy of education but his writings over a period of nearly thirty years reveal a persistent interest and concern with education His work ranging from Introduction to Mathematics 1911 to Adventures of Ideas 1938 is drawn on here to construct not Whitehead s philosophy of education but a Whiteheadian philosophy of education Whitehead and Philosophy of Education brings to scholars and students of education an understanding of Whitehead as an important figure in philosophy particularly philosophy of education an acquaintance with process philosophy a brief treatment of Whitehead s life and an account of events and experiences that influenced his philosophizing and an exploration of the educationally salient concepts found in Whitehead s formal and informal philosophy with special attention to Whitehead s ideas about creativity process rhythm wisdom and knowledge Whitehead writes of phases of the rhythm of education romance precision and generalization The book is organized with attention to these three phases Part One Romance introduces readers to Whitehead the person and the change of context for educating from a mechanistic world view to an organismic one Part Two Precision examines Whitehead s writings as they relate to process philosophy and to educating Part Three Generalization is an application of the explorations of Parts One and Two yielding a construction of a Whiteheadian philosophy of education and suggestions for educational practice

Teaching with the Wind Michael Dallaire, 2011-08-25 Teaching with the Wind tackles the question Can education for a Canadian civic spirituality bridge the sometimes incommensurable worldviews of faith based schools and secular public schools An affirmative answer is offered based on two foundations First that a national soul can be identified and thus serve as the content of spiritual education in Canada schools Second that a reconstructed approach to the contemplation in action method found in world religions and philosophy can provide an appropriate pedagogy for Canadian spiritual education This book argues that education for civic spirituality is of paramount importance as Canada continues its

transition from a Judeo Christian and bicultural nation to a multi faith and multicultural nation within a secular democracy It offers a direction that would enrich religious and secular education systems as well as Canada as a whole *Understanding Curriculum* William F. Pinar,1995 Perhaps not since Ralph Tyler s 1949 Basic Principles of Curriculum and Instruction has a book communicated the field as completely as *Understanding Curriculum* From historical discourses to breaking developments in feminist poststructuralist and racial theory including chapters on political theory phenomenology aesthetics theology international developments and a lengthy chapter on institutional concerns the American curriculum field is here It will be an indispensable textbook for undergraduate and graduate courses alike
