Making All the Difference Martha Minow, 2016-10-01 Should a court order medical treatment for a severely disabled newborn in the face of the parents refusal to authorize it How does the law apply to a neighborhood that objects to a group home for developmentally disabled people Does equality mean treating everyone the same even if such treatment affects some people adversely Does a state requirement of employee maternity leave serve or violate the commitment to gender equality Martha Minow takes a hard look at the way our legal system functions in dealing with people on the basis of race gender age ethnicity religion and disability Minow confronts a variety of dilemmas of difference resulting from contradictory legal strategies strategies that attempt to correct inequalities by sometimes recognizing and sometimes ignoring differences Exploring the historical sources of ideas about difference she offers challenging alternative ways of conceiving of traits that legal and social institutions have come to regard as different She argues in effect for a constructed jurisprudence based on the ability to recognize and work with perceptible forms of difference Minow is passionately interested in the people different people whose lives are regularly mis shaped and mis directed by the legal system's ways of handling them Drawing on literary and feminist theories and the insights of anthropology and social history she identifies the unstated assumptions that tend to regenerate discrimination through the very reforms that are supposed to eliminate it Education for handicapped children conflicts between job and family responsibilities bilingual education Native American land claims these are among the concrete problems she discusses from a fresh angle of vision Minow firmly rejects the prevailing conception of the self that she believes underlies legal doctrine a self seen as either separate and autonomous or else disabled and incompetent in some way In contrast she regards the self as being realized through connection capable of shaping an identity only in relationship to other people She shifts the focus for problem solving from the different person to the relationships that

construct that difference and she proposes an analysis that can turn difference from a basis of stigma and a rationale for unequal treatment into a point of human connection The meanings of many differences can change when people locate and revise their relationships to difference she asserts The student in a wheelchair becomes less different when the building designed without him in mind is altered to permit his access Her book evaluates contemporary legal theories and reformulates legal rights for women children persons with disabilities and others historically identified as different Here is a powerful voice for change speaking to issues that permeate our daily lives and form a central part of the work of law By illuminating the many ways in which people differ from one another this book shows how lawyers political theorist teachers parents students every one of us can make all the difference

A Class by Themselves? Jason Ellis, 2019-03-14 In *A Class by Themselves* Jason Ellis provides an erudite and balanced history of special needs education an early twentieth century educational innovation that continues to polarize school communities across Canada the United States and beyond Ellis situates the evolution of this educational innovation in its proper historical context to explore the rise of intelligence testing the decline of child labour and rise of vocational guidance emerging trends in mental hygiene and child psychology and the implementation of a new progressive curriculum At the core of this study are the students This book is the first to draw deeply on rich archival sources including 1000 pupil records of young people with learning difficulties who attended public schools between 1918 and 1945 Ellis uses these records to retell individual stories that illuminate how disability filtered down through the school system s many nooks and crannies to mark disabled students as different from and often inferior to other school children *A Class by Themselves* sheds new light on these and other issues by bringing special education s curious past to bear on its constantly contested present

Skills in Collaborative Classroom Consultation Anne Jordan, 2012-12-06 As the integration of children with special educational needs into ordinary classrooms progresses most special needs professionals spend an increasing amount of time in mainstream schools working with teachers in the classroom on interventions for individual children and with head teachers and senior management teams on whole school policy *Skills in Classroom Consultation* is a practical guide to the tools and techniques required to work effectively with colleagues in defining goals allocating responsibility and formulating strategies It shows how consultative skills can be used to solve particular educational problems and also how the consultant professional can act in a more far reaching way as an agent of change within an institution

Everybody Belongs Arthur Shapiro, 2003-09 The evil prosthesis of Captain Hook the comical speech of Porky Pig and the bumbling antics of Mr Magoo are all examples of images in our culture which can become the basis of negative attitudes and subliminal prejudice towards persons with disabilities These attitudes influence and underlie discriminatory acts resulting in negative treatment and segregation A teacher s ability to recognize and counter such images may well determine the success of inclusion and mainstreaming programs in our schools and society Well researched and well written this book offers practical guidance as grounded in solid research to schools that are wrestling

with how to mainstream children with disabilities Disabled USA ,1987 **Language and the Law** Douglas A. Kibbee,2016-08-04 A comprehensive overview of the political and legal consequences of linguistic inequality in the United States The Making and Breaking of Minds: How social interactions shape the human mind Isabella Sarto-Jackson,2022-04-05 The human brain has a truly remarkable capacity It reorganizes itself flexibly adjusting to fluctuating environmental conditions a process called neuroplasticity Neuroplasticity provides the basis for wide ranging learning and memory processes that are particularly profuse during childhood and adolescence At the same time the exceptional malleability of the developing brain leaves it highly vulnerable to negative impact from the surroundings Abusive or neglecting social environments as well as socioeconomic deprivation and poverty cause toxic stress and complex traumas that can severely compromise cognitive development emotional processing self perception and executive brain functions The neurophysiological changes entailed impair emotional regulation lead to heightened anxiety and afflict attachment and the formation of social bonds Neuroplastic changes following severely adverse experiences are not something that a person grows out of and gets over These experiences alter the neurobiological and biochemical makeup and cause people to live in an emotionally relabeled world in which the evaluation of any social cue their behavior cognition and state of mind are biased towards the negative Even more worrying detrimental neurophysiological consequences are not limited to the traumatized individual but are often transmitted to subsequent generations through a process of social niche construction thereby creating a vicious cycle Thus the making and breaking forces of the brain are epitomized by parents alloparents peers and our socioeconomic niche This book expounds on the formative role that the social environment plays in healthy brain development especially during infancy childhood and adolescence Based on scientific findings the book advocates for bold measures and responsible stewardship to combat child abuse maltreatment and child poverty By bringing together insights from neuroscience evolutionary biology and social education work it lays out a fact based transdisciplinary endeavor that aims at rising to the societal challenge of providing a rewarding perspective to youth at risk It will be a valuable resource for academics from social education pedagogy cognitive science neuroscience as well as professionals in the fields of social work pedagogy education child welfare **Globalization, Social Justice, and the Helping Professions** William Roth,Katharine Briar-Lawson,2011-04-28 This landmark book brings together the reality of globalization and the imperative for social justice for helping professionals and students Helping professions such as social work counseling and community building in non profit agencies NGOs and government and the people and needs they serve can no longer be understood outside a global framework While the very notion of helping professions is entails a social justice perspective the relationship between the effects of globalization and the requirements of social justice have been missing from the literature education and practice of these fields This book provides an understanding of the economic and social dimensions of globalization how globalization increases the interdependence of nations the particular risks and opportunities it presents and how some aspects of

globalization can exacerbate oppression and marginalization There are particular explorations of the challenges globalization presents in Africa and South America and a consideration of the special needs of children and families in the global context This is a necessary volume Its distinguished contributors have various perspectives on globalization but all write to inform and assist the work of those whose vocation is to help others **Because Teaching Matters** Marleen C.

Pugach,2009-01-06 Real challenges Real choices And very real consequences That s what today s classrooms are about That s why Marleen Pugach s **Because Teaching Matter** An Introduction to the Profession 2e is all about depicting today s classrooms as they truly are while at the same time highlighting the enormous impact teachers have on students lives Organized around five professional commitments from learning from multiple sources of knowledge using the curriculum responsibly and embracing diversity to meeting the needs of individual students and contributing actively to the profession **Because Teaching Matter** An Introduction to the Profession 2e tells the true story of today s complex classrooms But there s more It also drives home that though the decision to teach is a serious one it is one that can be extremely rewarding Current research practical discussions and realistic cases capture the breadth and depth of the modern teaching experience while a warm engaging writing style make the text a pleasure to read Ideal for Foundations of Education and Introduction to Teaching courses designed to provide preservice teachers with an overview of the profession **The Politics of Inclusion and Exclusion** David Ericson,2011-01-26 Assessing the limits of pluralism this book examines different types of political

inclusion and exclusion and their distinctive dimensions and dynamics Why are particular social groups excluded from equal participation in political processes How do these groups become more fully included as equal participants Often the critical issue is not whether a group is included but how it is included Collectively these essays elucidate a wide range of inclusion or exclusion voting participation representation in legislative assemblies representation of group interests in processes of policy formation and implementation and participation in discursive processes of policy framing Covering broad territory from African Americans to Asian Americans the transgendered to the disabled and Latinos to Native Americans this volume examines in depth the give and take between how policies shape political configuration and how politics shape policy At a more fundamental level Ericson and his contributors raise some traditional and some not so traditional issues about the nature of democratic politics in settings with a multitude of group identities *From "Backwardness" to "At-Risk"* Barry M.

Franklin,1994-01-01 This book examines the joint effort of twentieth century public school administrators and private philanthropy to initiate reforms to provide for children with learning difficulties The author explores the development of these reforms from the establishment of special classes for backward children at the beginning of the century to the creation of programs for learning disabled children He considers what this history tells us about current efforts to provide for at risk students He looks at both the way school administrators conceptualized childhood learning difficulties and the institutional arrangements which they introduced to accommodate these students and pays particular attention to the preference of

school administrators throughout this century for accommodating low achieving children in segregated classes and programs

Inclusive Educational Administration Mary Konya Weishaar, Phillip M. Weishaar, John C. Borsa, 2014-01-30 The belief that regular and special education administrators should work together to create and maintain successful education programs for all students is not new nor is the assumption that administrator preparation programs should foster the development of an inclusive approach yet this critical educational partnership has not reached its full potential Despite the lack of agreement within the federal legislative branch on exactly what should be changed within our education system some promising points of consensus have emerged competitive grants college and career readiness multi tiered systems of support common core standards a rewards based rather than punitive system for school improvement the critical role of effective teachers and principals increased school choice options and evidence based learning strategies particularly in high need schools The third edition stresses the importance of these key points Each chapter features case studies that simulate real life situations readers are likely to encounter in their careers as administrators Within the safety of the classroom they will rehearse controversial scenarios involving inclusive school governance school reform identification and placement conflict resolution program evaluation fiscal issues transportation and discipline Enhanced practice situations and role play exercises emphasize the special education administrator's role in resolving difficult situations The case study approach is an effective learning tool for aspiring special and regular education administrators and instructors alike fostering enthusiastic classroom discussion and critical thinking about potential solutions to today's complex problems in inclusive educational administration
