Emerging Energy Technologies Michael Grubb, Royal Institute of International Affairs, Energy and Environmental Programme (Royal Institute of International Affairs), 1992 Technical change is a key factor in the energy world Failure to recognize the potential for technical change and the pace at which it may occur has limited the accuracy and usefulness of past energy projections Conversely programmes to develop and deploy advanced energy technologies have often proved disappointing in the face of technical and commercial obstacles This study examines potentially important new and emerging energy technologies and the mechanisms by which they may develop and enter the market The project concentrates on the potential and probable role of selected energy technologies which are in existence and likely to be of rapidly growing importance over the next decade and the way in which market conditions and policy environment may affect their implementation Energy Abstracts for Policy Analysis ,1984 **Prospects and Strategies for Nuclear Power** Peter Beck, 1994 Examining the global strategic energy issues raised by the use of nuclear power this study argues that uncertainties about future electricity needs and constraints make the option of nuclear power a clear necessity However the author points out the problems posed by existing stockpiles of waste and plutonium as well as the dismantling of old power stations and states that a new generation of technologies must be produced to reduce these problems *Energy Research Abstracts* ,1983 Semiannual with semiannual and annual indexes References to all scientific and technical literature coming from DOE its laboratories energy centers and contractors Includes all works deriving from DOE other related government sponsored information and foreign nonnuclear information Arranged under 39 categories e g Biomedical sciences basic studies Biomedical sciences applied studies Health and safety and Fusion energy Entry gives bibliographical information and abstract Corporate author subject report number indexes *ERDA Energy Research Abstracts* United States.
