Kingdoms of the Yoruba. By ROBERT SMITH. Second Edition. London: Methuen, and New York: Barnes & Noble (Studies in African History, 2), 1976. Pp. xvi+266. £6.00, paperback £3.60.

The first edition of this book was published in 1969, and was reviewed in an earlier issue of this *Journal* (vol. XI, 1970, 162). The new edition is substantially revised. The principal changes are the updating of the archaeological evidence relating to the early history of Ile Ife (chapter II), the inclusion of a brief section dealing with the Igbomina and other little-known north-eastern Yoruba groups (in chapter IV), and a reinterpretation of the causes and chronology of the collapse of the Oyo empire in the early nineteenth century (in chapter X). Another new element is a brief analysis of the major regional dialects of Yorubaland, which is somewhat irritatingly given as an Appendix rather than being incorporated into the main text (pp. 243-4). But there are also minor revisions and additions throughout the book. The very useful bibliography is brought up to date as of May 1974, and includes over 80 new items.

The book is based essentially on available published material, supplemented by the author's own research into certain areas of Yoruba history. The quality of Smith's account therefore necessarily reflects the current state of historical scholarship, and the concentration of attention by modern academic historians upon the nineteenth century is very evident. For earlier times—apart from the archaeological evidence from Ile Ife—Smith still has to base his narrative mainly upon published histories by local amateur historians: his approach to these is generally conservative, though never uncritical. These materials yield a clear enough narrative of the political and military history of at least the major Yoruba kingdoms, but the social and economic basis of these political developments remains largely obscure before the nineteenth century. These limitations, however, are no fault of the author, who provides an admirably concise and readable introduction to the pre-colonial history of Yorubaland. To those who, as students or teachers, have to find their way through the often bewilderingly complicated histories of the numerous Yoruba states, it will continue to be an indispensable guide.

Emil Holub's Travels North of the Zambezi, 1885-6. Translated by CHRISTA JOHNS and edited by LADISLAV HOLY. Manchester University Press (for the University of Zambia), 1975. Pp. xvi+317. £9.

Apart from the unclassifiable Livingstone, the Czech naturalist Emil Holub was the first ethnographer to work in Central Africa. His first expedition, in 1872-7, was financed by Náprstek, founder of the ethnological museum in Prague, and recorded in Holub's *Sieben Jahre in Süd-Afrika*, which was promptly translated into English. In 1885, Holub returned to the Zambezi, with his newly-married wife, leading an 'Austro-Hungarian' expedition which planned to cross Africa from south to north. Beyond the Kafue, they ran into trouble among the
