**Bhagavad Gita Demystified Volume 1** Nithyananda

Paramahansa, 2009      The Midwife-Mother Relationship Mavis Kirkham, 2010-09-15 The foundation between midwife and mother is the foundation upon which maternity care depends Covering completely new topics areas the new edition of this ground breaking text brings together classic and current research to establish key tenets for maternity care within hospital and home This ground breaking essential text reaffirms the fragility and the power of the relationship between midwife and mother and remains the definitive guide to the complex area of midwife mother relations New to this Edition Fully revised and expanded to reflect key developments in midwifery philosophy over the past decade applying a theoretical approach to emerging concepts such as emotional labour and midwifery partnership Covers completely new topics areas including the effects of emotional labour poverty and health policy Combines new works from the previous edition with new chapters on innovative midwifery practice Brings together classic and current research to establish key tenets for maternity care within hospital and home      *Complex Adaptive Systems* Ted Carmichael, Andrew J. Collins, Mirsad Hadžikadić, 2019-06-14 This book emerged out of international conferences organized as part of the AAAI Fall Symposia series and the Swarmfest 2017 conference It brings together researchers from diverse fields studying these complex systems using CAS and agent based modeling tools and techniques In the past the knowledge gained in each domain has largely remained exclusive to that domain By bringing together scholars who study these phenomena the book takes knowledge from one domain to provide insight into others Most interesting phenomena in natural and social systems include constant transitions and oscillations among their various phases wars companies societies markets and humans rarely stay in a stable predictable state for long Randomness power laws and human behavior ensure that the future is both unknown and challenging How do events unfold When do they take hold Why do some initial events cause an avalanche while others do not What characterizes these events What are the thresholds that differentiate a sea change from a non event Complex adaptive systems CAS have proven to be a powerful tool for exploring these and other related phenomena The authors characterize a general CAS model as having a large number of self similar agents that 1 utilize one or more levels of feedback 2 exhibit emergent properties and self organization and 3 produce non linear dynamic behavior Advances in modeling and computing technology have led not only to a deeper understanding of complex systems in many areas but they have also raised the possibility that similar fundamental principles may be at work across these systems even though the underlying principles may manifest themselves differently      *They Call It Love* Alva Gotby, 2024-02-20 A fascinating and exhaustive explanation as to why emotions are a political issue Brit Dawson Another Magazine The work of love is a feminist problem and it demands feminist solutions Comforting a family member or friend soothing children providing company for the elderly ensuring that people feel well enough to work this is all essential labour Without it capitalism would cease to function They Call It Love investigates the work that makes a haven in a heartless world examining who performs this labor how it is organised and how it might change In this groundbreaking book Alva Gotby calls this work emotional reproduction unveiling its inherently political nature It not

only ensures people's well-being but creates sentimental attachments to social hierarchy and the status quo. Drawing on the thought of the feminist movement, Wages for Housework, Gotby demonstrates that emotion is a key element of capitalist reproduction. To improve the way we relate to one another will require a radical restructuring of society. The Oxford Handbook of Evolution and the Emotions Laith Al-Shawaf, Todd K. Shackelford, 2024. In this Handbook, Laith Al-Shawaf and Todd K. Shackelford have gathered a group of leading scholars in the field to present a centralized resource for researchers and students wishing to understand emotions from an evolutionary perspective. Experts from a number of different disciplines including psychology, biology, anthropology, psychiatry, and others tackle a variety of how proximate and why ultimate questions about the function of emotions in humans and nonhuman animals, how emotions work, and their place in human life. Comprehensive and integrative in nature, this Handbook is an essential resource for students and scholars from a diversity of fields wishing to build upon their theoretical and empirical understanding of the emotions. Handbook of the Sociology of Emotions: Volume II Jan E. Stets, Jonathan H. Turner, 2014-08-18. Handbook of the Sociology of Emotions, Volume II presents all new chapters in the ever-developing area of the sociology of emotions. The volume is divided into two sections: Theoretical Perspectives and Social Arenas of Emotions. It reviews major sociological theories on emotions which include evolutionary theory, identity theory, affect control theory, social exchange theory, ritual theory, and cultural theory, among others. Social arenas where emotions are examined include but are not limited to the economy and the workplace, the family, mental health, crime, sports, technology, social movements, and the field of science. All the chapters review the major theories and research in the area, and each chapter ends with some discussion of directions for future research. The Sociology of Emotions is a fast-growing and vital field in the broad discipline of Sociology. This volume II follows the Handbook of the Sociology of Emotions, which was first published in 2006. In 2008, this first handbook received the Outstanding Recent Contribution in the Emotions Section of the American Sociological Association. With contributions from leading scholars from different areas in the discipline such as neurosociology, culture, economics, mental health, gender, social movements, discussing state-of-the-art theory and research on emotions in sociology, this volume will generate wider appeal to the sociological community. Cognitive and emotional mechanisms of time perception Huazhan Yin, Philip Gable, Zhijie Zhang, 2023-02-06. **Psychology of Emotion** Paula M. Niedenthal, François Ric, 2017-04-20. This textbook is designed for upper-level courses on affective science. The lively integrative chapters review empirical research on emotion at every level of analysis, including the neural bases of emotions, complex emotions, emotion and cognitive processes, emotion regulation, and an examination of social levels of analysis, including emotions in groups, gender, and cultural differences. This 2nd edition has greater inclusion of research findings from neuroscience and includes highly effective learning devices such as Development Detail boxes, bolded key terms, Learning Links to online supplemental materials, and many tables, figures, and illustrations that make topics come alive.
