Performing Emotions Peta Tait, 2017-07-05 In *Performing Emotions* Peta Tait's central argument is that performing emotions in realism is also performing gender identity Emotions are phenomena that are performable by bodies which have cultural identities In turn these create cultural spaces of emotions This study integrates scholarship on realist drama theatre and approaches to acting with interdisciplinary theories of emotion phenomenology and gender theory With chapters devoted to masculinity and femininity specifically as well as to emotions generally it investigates social beliefs about emotions through Chekhov's four major plays in translation and English language commentaries on Constantin Stanislavski's direction of the play's first productions and his approaches to acting and Olga Knipper's acting of the central women characters *Emotions* exists as social relationships they are imagined and embodied as gendered Tait demonstrates how theatrical emotions are predicated on social performances and vice versa In Chekhov's plays which came to dominate a twentieth century theatre of emotions characters interpret their emotions intertextually in relation to other theatrical and fictional narratives of emotions Tait here interrogates these plays as sustained explorations of the inherent theatricality of characters expressing emotions from their phenomenological awareness A theatrical language of gendered interiority is produced in the acting of emotions in Stanislavski's early realistic theatre Alternatively remapping the performances of emotional bodies can destabilise the culturally constructed boundary separating an inner private self and an outer social self in culturally produced geographies of emotions As Tait shows emotions can be performed as indivisible spatialities *Performing Emotions* integrates theories of theatre gender identity and emotion to investigate how sexual difference impacts on the representations of emotions The book develops an accumulative analysis of the meanings of emotions in twentieth century realist drama theatre and acting

influential component in creating a new society and new engineering revealing the importance of emotion in various aspects of the Connected World It addresses a wide variety of topics but with this one underlying aim throughout Further it stands out for the approach it takes to the Internet of Things and the Connected Society The contributing authors illustrate that humans are essentially either playmakers or playing managers with teamwork and play being crucial aspects of our lives They argue that strategy is becoming increasingly important and consider the most adaptable strategy one that will allow us to respond to today s quickly and radically changing situations The book is particularly focused on the Connected Society as the point of departure and explores what motivates humans what decisions they should make and what actions they should take With engineering quickly moving from product development to experience development and the role of emotion in engineering becoming increasingly apparent this book offers a timely and valuable resource for engineers and researchers alike

Personification Walter Melion,Bart Ramakers,2016-03-11 Personification or prosopopeia the rhetorical figure by which something not human is given a human identity or face is readily discernible in early modern texts and images but the figure s cognitive form and function its rhetorical and pictorial effects have rarely elicited sustained scholarly attention The aim of this volume is to formulate an alternative account of personification to demonstrate the ingenuity with which this multifaceted device was utilized by late medieval and early modern authors and artists in Italy France England Scotland and the Low Countries Personification is susceptible to an approach that balances semiotic analysis focusing on meaning effects and phenomenological analysis focusing on presence effects produced through bodily performance This dual approach foregrounds the full scope of prosopopoeic discourse not just the what but also the how not only the signified but also the signifier

Autism: The Movement Perspective Elizabeth B Torres,Anne M Donnellan,2015-05-19 Autism Spectrum Disorders ASD is portrayed as cognitive and social disorders Undoubtedly impairments in communication and restricted repetitive behaviors that now define the disorders have a profound impact on social interactions But can we go beyond the descriptive observational nature of this definition and objectively measure that amalgamate of motions and sensations that we call behavior In this Research Topic we bring movement and its sensation to the forefront of autism research diagnosis and treatment We gather researchers across disciplines with the unifying goal of recognizing movement and sensory disturbances as core symptoms of the disorder We also hear confirmation from the perspective of autism self advocates and parents Those important sources of evidence along with the research presented in this topic demonstrate without a doubt that profound movement and sensory differences do exist in ASD and that they are quantifiable The work presented in this Research Topic shows us that quantifiable differences in movements have a better chance than current observational techniques to help us uncover subtle solutions that the nervous system with autism has already spontaneously self discovered and utilized in daily living Where the naked eye would miss the unique subtleties that help each individual cope instrumentation and fine kinematic analyses of motions help us uncover inherent capacities and predispositions of the person

with autism The work presented in this topic helps us better articulate through the voices of parents and self advocates those sensory motor differences that current inventories could not possibly uncover These differences are seldom perceived as they take place at timescales and frequencies that fall largely beneath our conscious awareness To the person in the spectrum living with this disorder and to the caregiver creating accommodations to help the affected loved one these subtleties are very familiar though Indeed they are often used in clever ways to facilitate daily routines We have waited much too long in science to listen to the very people that we are trying to define understand and help Being autism a social problem by definition it is remarkable that not a single diagnosis inventory measures the dyadic social interaction that takes place between the examiner and the examinees Indeed we have conceived the autistic person within a social context where we are incapable by definition of accepting those differences The burden is rather placed on the affected person to whom much too often we refer to in the third person as non verbal without intentionality without empathy or emotions without a theory of mind among other purely psychological guesses It is then too easy and shockingly allowed to reshape that person to mold that person to better conform to our social expectations and to extinguish behaviors that are socially unacceptable even through the use of aversive punishing reinforcement techniques if need be And yet none of those techniques have had a single shred of objective scientific evidence of their effectiveness We have not objectively measured once nor have we physiologically characterized once any of those perceived features that we so often use to observationally define what we may think the autistic phenotype may be We have not properly quantified beyond paper and pencil methods the effectiveness of interventions in autism Let us not forget when we do our science that we are all part of the broad human spectrum

Gutsche Jr., Paola Prado, 2019-10-14 The acceleration of global climate change creates a nexus for the examination of power political rhetoric science communication and sustainable development This book takes an international view of twenty first century environmental communication to critically explore mediated expressions of climate change **The Pursuit of Reason** Charles Francis Keary, 1910 *Visions* C.G. Jung, 2022-05-29 For Jung the beautiful and brilliantly creative 28 year old Christiana Morgan was an inspired force whose path in self analysis paralleled his own quest for personal knowledge By teaching Morgan the trance like technique of active imagination Jung helped her embark on a series of archetypal adventures which she depicted in paintings of great virtuosity and he candidly recounted at a seminar given to some of his closest followers Through his eloquent description of the fiery mythic visions of a woman discovering her repressed sexuality and feminine power Jung reveals how deeply this encounter challenged his understanding of feminine psychology These two volumes bring together for the first time colour reproductions of Morgan s paintings with a complete transcript of the seminar *Visions* Carl Gustav Jung, 1997 Young Christiana Morgan recorded her vision quest experiences of inner archetypal encounters in words and paintings which Carl Jung later used as the basis for seminar work in Zurich First time available to the public here are transcriptions of the seminar notes combined with color reproductions of Morgan s paintings revealing archetypal parallels with western myth and eastern yoga 41 color and 77 line illustrations 10 photos in two volumes [A New Language for Psychoanalysis](#) Roy Schafer, 1976-01-01 Should be of considerable interest to a wider public since it proposes a radical reformulation of psychoanalytical theory which if accepted would render outmoded almost all the analytical jargon that has crept into the language of progressive enlightened post Freudian people Charles Rycroft The New York Review of Books Schafer s arguments have considerable cogency The tendency to over theorize so that the translation of abstractions into the language of ordinary discourse between analyst and patient has become increasingly difficult is a fault Schafer goes a long way towards redressing it and his efforts to include meaning and the person in the form of his language is an achievement Michael Fordham The Times Higher Education Supplement **Style in Narrative** Patrick Colm Hogan, 2020-11-12 Literary style is something many people talk about but few could define Yet it is crucial for our response to narrative art Style can facilitate or obscure the events of a story or the motivations of a character enhance the aesthetic appeal of a narrative or complicate its emotional impact and even inflect the political or ethical implications of a work It is precisely this complex operation of style that Patrick Colm Hogan explains in *Style in Narrative* Drawing on recent psychological research this book proposes a new and clear definition of style and provides a systematic theoretical account of

style in relation to cognitive and affective science Hogan's definition stresses that style varies by both scope or the range of text or texts that may share a style and level the components of an individual work that might involve a shared style The book uses rich examples from literature film and graphic fiction including analysis of Virginia Woolf's Mrs Dalloway Shakespeare's canon William Faulkner's As I Lay Dying and Art Spiegelman's Maus as well as visual analysis of films by Robert Rodriguez Deepa Mehta Eric Rohmer M F Husain Yasujiro Ozu and Chuan Lu Through these studies Hogan identifies stylistic concerns common across mediums as well as the most consequential stylistic differences between them Bringing together three often separated mediums within a coherent framework Style in Narrative makes an important contribution to and necessary intervention in the field of stylistics Emotional qualities of style Alexander Bain, 1888 **I Have a Theory about That** Judy Balan, 2019-08-25 Meg likes to plan her life on a spreadsheet Tania believes in letting the universe take charge Theirs is an unlikely friendship to say the least especially since the two met because they used to date the same guy At the same time Now as older wiser twenty nine year olds and flatmates no less they're determined to enter their thirties with the one thing that's still missing from their halfway happy lives that elusive long lasting romance When a routine conversation ends up with them laying bets on who will find love first the battle lines are drawn Now if only ridiculous first dates nose-y aunties betting on their bet and complicated professional lives would get out of their way for the girls to find their One And really what is the shortest way to finding love via probability calculations on a date a day week or just being in the right place at the right time when the planets are all aligned and there are no Venus Uranus oppositions
