Empathy Rogers Therapeutic Conditions Evolution Theory And Practice:

Empathy Sheila Haugh, Tony Merry, 2001 What is empathy Is it a basic human characteristic Is there a biological basis for it How does it work in therapy Is it a necessary condition for therapeutic change This title helps the serious students examine these and other important questions The Person-Centred Approach to Therapeutic Change Michael McMillan, 2004-03-05 From the Foreword It is an honour to be asked to write a foreword for this new book by Michael McMillan I have been excited about this book ever since I read early drafts of its first two chapters some time ago at the birth of the project At different times thereafter I have read other parts and my consistent impression has been that this is an author who has both a sophisticated academic understanding of the material and a great skill in communicating that widely Those two qualities do not often go together The book is about change After a first chapter in which the author introduces us to the person centred concept of the person chapter two is devoted to the change process within the client including a very accessible description of Rogers process model Chapter three goes on to explore why and how change occurs in the human being while chapter four introduces the most up to date person centred theory in relation to the nature of the self concept and its changing process Chapters five and six explore why change occurs in therapy and the conditions that facilitate that change while chapter seven looks beyond the core conditions to focus on the particular quality of presence begging the question as to whether this is a transpersonal transcendental quality or an intense experiencing of the core conditions themselves This is an intensely modern book particularly in its postmodern emphasis Rogers is sometimes characterised as coming from modernist times but he can also be seen as one of the early post modernists in his emphasis on process more than outcome and relationship more than personal striving The modern nature of the book is also emphasised by a superb analysis of the relationship between focussing and person centred therapy in Chapter five linking also with Polanyi's notion of indwelling in this and other chapters In suggesting that in both focussing and person centred therapy the therapist is inviting the client to indwell himself or herself the author provides a framework for considering many modern perceptions of the approach including notions such as presence and relational depth Also the link with focussing is modern in the sense that the present World Association for the approach covers a fairly broad family including traditional person centred therapists experiential therapists focussing oriented therapists and process guiding therapists Important in this development is the kind of dialogue encouraged by the present book Dave Mearns Strathclyde University The belief that change occurs during the therapeutic process is central to all counselling and psychotherapy The Person Centred Approach to Therapeutic Change examines how change can be facilitated by the counsellor offering empathy unconditional positive regard and congruence The Person Centred Approach to Therapeutic Change outlines the main theoretical cornerstones of the person centred approach and then applying these describes why change occurs as a result of a person centred therapeutic encounter The author explores the counselling relationship as an environment in which clients can open themselves up to experiences they have previously

found difficult to acknowledge and to move forward Integral to the person centred approach is Carl Rogers radical view that change should be seen as an ongoing process rather than an alteration from one fixed state to another In Rogers view psychological health is best achieved by the person who is able to remain in a state of continual change Such a person is open to all experiences and is therefore able to assimilate and adapt to new experiences whether good or bad By focusing explicitly on how change is theorized and facilitated in counselling this book goes to the heart of person centred theory and practice making it essential reading for trainees and practitioners alike Humanising Psychiatry and Mental Health Care Rachel Freeth,2017-11-22 This book explores in depth the link between modern psychiatric practice and the person centred approach It promotes an open dialogue between traditional rivals counsellors and psychiatrists within the NHS to assist greater understanding and improve practice Easy to read and comprehend it explains complex issues in a clear and accessible manner The author is a full time psychiatrist and qualified counsellor who offers a unique perspective drawing on personal experience Humanising Psychiatry and Mental Health Care will be of significant interest and help to all mental health professionals including psychiatrists and psychiatric nurses social care workers occupational therapists psychologists person centred counsellors and therapists Health and social care policy makers and shapers including patient groups will also find it helpful and informative *The Handbook of Person-Centred Psychotherapy and Counselling* ,2024-09-05 Written by a diverse range of expert contributors unified by a relational ethics based reading of person centred theory and practice this seminal text is the most in depth and comprehensive guide to person centred therapy Divided into four parts it examines the theoretical philosophical and historical foundations of the person centred approach the fundamental principles of person centred practice as well as new developments in and applications of person centred clinical work explorations of how person centred conceptualisations and practices can be applied to groups of clients who bring particular issues to therapy such as bereavement or trauma and professional issues for person centred therapists such as ethics supervision and training 10 years after it was last published this third edition includes new content on the climate crisis intersectionality and working with racism and anti racism It includes new dedicated chapters on the Non directive Attitude Relational Depth Experiential Practices Working with Trauma Online PCA and Person Centred approaches around the Globe International and interdisciplinary in conception this is a cutting edge resource for students of psychotherapy and counselling on a range of programmes as well as professional practitioners working in the field *The Therapeutic Relationship in Counselling and Psychotherapy* Rosanne Knox,Mick Cooper,2014-02-28 What is a therapeutic alliance How do I create a bond What might lead to the alliance breaking down What do I do when the relationship feels stuck These are just some of the questions addressed in this important new book for trainee and qualified therapists wanting to understand engage in and make the most of the therapeutic relationship Taking you through each stage of the therapeutic process from initial boundary setting to effective endings the book considers a number of different settings and client groups such as working in an online

environment and with children and young people Structured around Frequently Asked Questions an accessible and engaging narrative guides you through the skills and considerations for an effective therapeutic relationship as well as the potential challenges it might face Bringing to the forefront the mutuality of the relationship and the client as a proactive agent this book will equip you with the knowledge and skills needed to develop trusting and productive relationships with your clients

Person-Centred Counselling Supervision Richard Bryant-Jefferies, 2017-11-22 Each preceding book in the Living Therapy series provides a demonstration of the application of the person centred approach to counselling and psychotherapy to clients presenting with particular issues To complement these this book focuses more on the supervisory element of the therapeutic process It brings together examples of supervision sessions from the Living Therapy series and presents each one as an example of person centred supervisory practice of person centred counselling The supervision sessions deal with a range of issues that arise when working with clients who are seeking counselling in order to resolve difficulties from a wide range of difficult human experience Each supervision session is introduced with a summary of the background and points for discussion are included at the end of each chapter to stimulate further thought and debate The book does not attempt to demonstrate a definitive way to apply person centred principles to supervision but does demonstrate core principles It will prove valuable to experienced and novice supervisors and to those uncertain about supervising counsellors working in areas outside their own professional experience It should also be read by counsellors in training who are preparing to be supervised for whom the book offers insights into this collaborative process

Skills in Person-Centred Counselling & Psychotherapy Janet Tolan, 2012-03-05 This book has already helped thousands of beginning practitioners understand the subtleties of the person centred approach and develop skills in person centred counseling practice Now in its Second Edition this step by step guide takes the reader through the counseling process providing advice on how to structure and manage therapeutic work in ways which are thoroughly grounded in person centred principles Janet Tolan defines the key tenets of the approach psychological contact congruence empathy and unconditional positive regard and demonstrates how they are used effectively in a range of counsellor client interactions
