## **Empires Horizon:**

Empires Susan E. Alcock, 2001-08-09 Empires the largest political systems of the ancient and early modern world powerfully transformed the lives of people within and even beyond their frontiers in ways quite different from other non imperial societies Appearing in all parts of the globe and in many different epochs empires invite comparative analysis yet few attempts have been made to place imperial systems within such a framework This book brings together studies by distinguished scholars from diverse academic traditions including anthropology archaeology history and classics The empires discussed include case studies from Central and South America the Mediterranean Europe the Near East South East Asia and China and range in time from the first millennium BC to the early modern era The book organises these detailed studies into five thematic sections sources approaches and definitions empires in a wider world imperial integration and imperial subjects imperial ideologies and the afterlife of empires

**Empires of Trust** Thomas F. Madden, 2008-07-17 An acclaimed historian offers an optimistic view of the future of the United States in the light of Roman history Maybe the end of the American ascendancy is not upon us Maybe the U S will continue to dominate the world for centuries Now award winning historian Thomas Madden delivers an optimistic view of our nation s future Madden shows that the power of the ancient Roman republic and the U S was built on trust between allies not the conquest of enemies The far reaching implications of this fact are essential reading for anyone who cares about the challenges we face now and in the years ahead Packed with stories from Roman history that offer amazingly obvious and explicitly stated parallels to our recent history Empires of Trust is a narrative pleasure and a hopeful inspiration

Intermediate Elites in Pre-Columbian States and Empires Christina M. Elson, R. Alan Covey, 2022-06-21 From the Mesoamerican highlands to the Colca Valley in Peru pre Columbian civilizations were bastions of power that have largely been viewed through the lens of rulership or occasionally through bottom up perspectives of resistance Rather than focusing on rulers or peasants this book examines how intermediate elites both men and women helped to develop sustain and resist state policies and institutions Employing new archaeological and ethnohistorical data its contributors trace a 2 000 year trajectory of elite social evolution in the Zapotec Wari Aztec Inka and Maya civilizations This is the first volume to consider how individuals subordinate to imperial rulers helped to shape specific forms of state and imperial organization Taking a broader scope than previous studies it is one of the few works to systematically address these issues in both Mesoamerica and the Central Andes It considers how these individuals influenced the long term development of the largest civilizations of the ancient Americas opening a new window on the role of intermediate elites in the rise and fall of ancient states and empires worldwide The authors demonstrate how such evidence as settlement patterns architecture decorative items and burial patterns reflect the roles of intermediate elites in their respective societies arguing that they were influential actors whose interests were highly significant in shaping the specific forms of state and imperial organization Their emphasis on provincial elites particularly shifts examination of early states

away from royal capitals and imperial courts explaining how local elites and royal bureaucrats had significant impact on the development and organization of premodern states Together these papers demonstrate that intricate networks of intermediate elites bound these ancient societies together and that competition between individuals and groups contributed to their decline and eventual collapse By addressing current theoretical concerns with agency resistance to state domination and the co option of local leadership by imperial administrators it offers valuable new insight into the utility of studying intermediate elites *Latin American Horizons* Don Stephen Rice,1993 *European Elites and Ideas of Empire, 1917–1957* Dina Gusejnova,2016-06-16 Who thought of Europe as a community before its economic integration in 1957 Dina Gusejnova illustrates how a supranational European mentality was forged from depleted imperial identities In the revolutions of 1917 to 1920 the power of the Hohenzollern Habsburg and Romanoff dynasties over their subjects expired Even though Germany lost its credit as a world power twice in that century in the global cultural memory the old Germanic families remained associated with the idea of Europe in areas reaching from Mexico to the Baltic region and India Gusejnova s book sheds light on a group of German speaking intellectuals of aristocratic origin who became pioneers of Europe s future regeneration In the minds of transnational elites the continent s future horizons retained the contours of phantom empires This title is available as Open Access *De-Scribing Empire* Alan Lawson,Chris Tiffin,2002-03-11 De Scribing Empire is a stunning collection of first class essays Collectively they examine the formative role of books writing and textuality in imperial control and the fashioning of colonial world views The volume as a whole puts forward strategies for understanding and neutralising that control and as such is a major contribution to the field It will be invaluable for students in post colonialist criticism **Archaeologies of Empire** Anna L. Boozer,Bleda S. Düring,Bradley J. Parker,2020-10-15 Throughout history a large portion of the world s population has lived under imperial rule Although scholars do not always agree on when and where the roots of imperialism lie most would agree that imperial configurations have affected human history so profoundly that the legacy of ancient empires continues to structure the modern world in many ways Empires are best described as heterogeneous and dynamic patchworks of imperial configurations in which imperial power was the outcome of the complex interaction between evolving colonial structures and various types of agents in highly contingent relationships The goal of this volume is to harness the work of the next generation of empire scholars in order to foster new theoretical and methodological perspectives that are of relevance within and beyond archaeology and to foreground empires as a cross cultural category This book demonstrates how archaeological research can contribute to our conceptualization of empires across disciplinary boundaries **Objects of Empire** Tamara L. Bray,2025 The beautiful polychrome ceramics of the imperial Inca state have long been noted for their uniformity so much so that it was once said a whole jar could be reconstructed from a single shard This book is an attempt to move beyond the seen one seen em all mentality There is evidence of mass production yes but the widespread distribution of Inca state pottery and the high degree of standardization hint at the importance of this particular category of material

culture to the imperial project Despite that significance relatively little comparative work has been undertaken This book shows the variability and rich semiotic content of imperial Inca pots and in doing so it advances our understanding of how power and legitimacy are produced and reproduced through the material culture of daily life Bray takes a comparative empire wide approach making it clear that Inca pottery is not as homogeneous as it is thought to be Her book works through what constitutes the state style as well as the parameters and significance of the variability From there she takes up the more socially significant questions of where when and why deviations from the norm occurred Focusing on variations in the material assemblages and approaches helps illuminate the strategies of territorial expansion and political control that lay at the heart of the Inca juggernaut as well as the role of objects in the calculus of would be rulers and subjects Shadow Empires Thomas J. Barfield, 2025-12-02 An original study of empire creation and its consequences from ancient through early modern times The world's first great empires established by the ancient Persians Chinese and Romans are well known but not the empires that emerged on their margins in response to them over the course of 2 500 years These counterempires or shadow empires which changed the course of history include the imperial nomad confederacies that arose in Mongolia and extorted resources from China rather than attempting to conquer it as well as maritime empires such as ancient Athens that controlled trade without seeking territorial hegemony In Shadow Empires Thomas Barfield identifies six kinds of counterempire and explores their rise politics economics and longevity What all these counterempires had in common was their interactions with existing empires that created the conditions for their development When highly successful these counterempires left the shadows to become the world's largest empires for example those of the medieval Muslim Arabs and of the Mongol heirs of Chinggis Khan Three former shadow empires Manchu Qing China Tsarist Russia and British India made this transformation in the late eighteenth century and came to rule most of Eurasia However the DNA of their origins endured in their unique ruling strategies Indeed world powers still use these strategies today long after their roots in shadow empires have been forgotten Looking afresh at the histories of important types of empires that are often ignored Shadow Empires provides an original account of empire formation from the ancient world to the early modern period Africa and the Metaphysical Empire Frank Aragbonfoh Abumere, 2025-02-03 This book investigates whether African cultures can appropriate some useful aspects of Western cultures or whether doing so risks falling into the metaphysical empire and diluting African identity Ngugi wa Thiong'o and Ndlovu Gatsheni characterise the metaphysical empire as an intangible non physical and non geographical invasion of the mental universe of formerly colonised peoples As mutual exclusivists they argue that authentic decolonization necessitates a complete dissociation of the African and her culture from colonial heritage However cultural appropriationists such as Wole Soyinka Chinua Achebe and Chimamanda Ngozi Adichie argue that the African adoption of colonial heritage such as the English language is in no way antithetical to decolonization This book delves into the debate by exploring the strengths and weaknesses of cultural appropriationism and on the other hand testing the

validity of mutual exclusivism The book demonstrates that cultural appropriation without falling into the metaphysical empire is possible but that this poses important questions about the nature of the decolonization project itself and where it should start and stop A more accommodative decolonization would recognize the relationship between cultural universals and particulars whilst also creating room for cultural appropriation Ultimately the book argues that both cultural appropriationists and mutual exclusivists must simultaneously renounce absolutism By being amenable to a fusion of horizons discourse can move beyond the decolonization fallacy of arguing that things are always either or This original and important contribution to the metaphysical empire debate will be a seminal read for researchers across the fields of philosophy political science African studies and Black studies

**Beyond the Spirit of Empire** Joerg Rieger, 2013-01-25

How does empire mould human subjectivity for instance and how does it affect the understanding of humans within the whole of creation This title analyzes the global empire in its political and economic dimensions in its symbolic constructions of power and in its general assumptions often taken for granted

**Frank Capra's Eastern Horizons** Elizabeth

Rawitsch, 2014-10-16 Frank Capra has long had a reputation as being the quintessential American director the man who perfectly captured the identity and core values of the United States with a string of classic films in the 1930s and 40s including *It Happened One Night* *Mr Smith Goes to Washington* and *It's a Wonderful Life* However as Elizabeth Rawitsch argues Capra's construction of national identity did not occur within an exclusively national context She points out that many of his films are actually set in or include sequences set in China Latin America the Philippines and the South Seas Featuring in depth textual analysis supported by original archival research Frank Capra's *Eastern Horizons* explains that Capra's view of what constituted America changed over time extending its boundaries to embrace countries often far from the United States Complicating Edward Said's theory of Orientalism as a strict binary in which the West constructs the East as an inferior other it demonstrates that East and West often intermingle in films such as *The Bitter Tea of General Yen* and in Capra's orientation documentaries for World War II American servicemen Capra imagined a kind of global community albeit one with heavy undertones of British and American imperialism Investigating shifts in what Capra's America has meant over time both to Capra and to those who have watched and studied his films this innovative book offers a startlingly fresh perspective on one of the most iconic figures in American film history

Ilhan Niaz,2024-11-15 This book is a sweeping reexamination of the evolution of the state covering the indigenous orders of pre Columbian America the Spanish Portuguese and British Empires in the Americas and their major successor states of Mexico Brazil and the United States Exploring the mechanisms of colonial order construction and the way in which that process prepared the ground for the emergence of national empires after independence Niaz contends that the destruction of indigenous demography and culture was so complete that the societies and states of the New World are colonial in their basic fabric thereby diverging from the Asian and African experience of European colonial rule Independence from European empires intensified repression instability and inequality in each of the successor states turning the rhetoric of equality and revolutionism into a legitimizing device for extraordinarily brutal regimes that completed the colonizing mission begun by European states The volume examines these contradictions from a South Asian perspective and places the Americas in the broader narrative of the world s historical experience of governance and arbitrary rule New World Empires is intended for academics professionals and students interested in American Studies political studies and the history of governance in the Americas **Andean Archaeology III** William Isbell,Helaine Silverman,2008-02-01 The third volume in the Andean

Reconceptualising the ways in which the Algerian War has been debated evaluated and commemorated in the subsequent

five decades From empire to exile makes an original contribution to important discussions surrounding the contentious issues of memory migration and empire in contemporary France that will appeal to students and scholars of history and cultural studies
